About this guide

Status of this proof. This proof holds 54 entries, all checked claim by claim against their sources. Figures may still be wrong. Do not use this proof operationally.

How to read an entry. The black box at top right is the mobility code. *Operated by* lists unit types that hold the equipment. Each row ends with a tag of three parts, such as `D 2016 H`: basis, date and confidence. Basis is D for doctrinal tables of organisation, O for observed with an identified unit, R for reported or claimed. Confidence is H, M or L. *Recognise* bullets follow a fixed order and start with the first letter of the feature. Unknown values are printed INA.

Caution. Since 2022, army and district assets are often parcelled out to groupings of forces, new formations are under strength, and legacy or civilian vehicles appear in any unit. Equipment indicates a unit type. It does not prove it.

BM-21 Grad 122 mm MRL 5M-21 «Град»

NATO: M1964

WH-AT

Truck-mounted 40-tube 122 mm area-fire rocket launcher (divisional and brigade MRL) In service 1963

OPERATED BY motor rifle brigade, MRL battalion; 6 launchers per battery, 18 per battalion [D 2016 M]

artillery regiment, one Grad MRL battalion in division field artillery regiment, being replaced by Tornado-G [D 2019 M]

motor rifle regiment, BTG, attached MRL element, 3 in one BTG

[O 2022-04 M] seen with 228th Motor Rifle Regiment, 90th Tank Division

motor rifle brigade, BTG, attached BM-21 battery, 1 battery

[O 2022-04 M] seen with 57th Motor Rifle Brigade, 5th Army

INDICATES A group of about 18 launchers points to a brigade MRL battalion; 6 launchers to one battery. A few launchers inside a battalion tactical group suggest an attached MRL element.

RECOGNISE Cab Unarmoured Ural 6x6 truck cab [Ural-375D; Ural-4320 on BM-21-1]. The 40-tube pack can be turned away from the cab.

Body Rear pack of 40 tubes in four rows of ten, each tube 3 m long, on a welded cradle; elevates 0 to +55 degrees. Traverse 102 left, 70 right of the vehicle.

Axles Three axles, 6x6 truck chassis, wheeled; not amphibious.

Details Stabilizing jacks at the rear for firing (stated for the BM-21V; the text says the BM-21 has the same). Reload rockets carried on separate resupply trucks.

NOT TO BE CONFUSED WITH BM-21V Grad-V (9P125) 12 tubes

on a GAZ-66B 4x4 truck, airborne version

9P138 Grad-1 36 tubes on a ZIL-131 6x6 truck

RM-70 (Czechoslovak) 40 tubes on an 8x8 Tatra 813 with an armoured cab and room behind the cab for 40 spare rockets

MILRU (Ministry of Defence of the Russian Federation), CC BY 4.0

MOBILITY Unarmoured truck chassis on wheels with central tyre inflation. Fords 1.5 m without preparation. Not amphibious.

Weight, combat 13.7 t BM-21 on Ural-375D, loaded with crew

L × W × H 7.35 × 2.4 × 3.09 m travelling

Road speed 75 km/h maximum, hard road, loaded

Road range 750 km

Range, 9M22U HE-frag

20.4 km maximum, 9M22U (M-210F) HE-fragmentation rocket

Minimum range, 9M22U HE-frag

5 km 9M22U (M-210F) HE-fragmentation rocket

Range, 9M28F HE-frag

15 km maximum, 9M28F HE-fragmentation rocket

Minimum range, 9M28F HE-frag

1.5 km minimum effective, 9M28F HE-fragmentation rocket

Tornado-G 9K51M «Торнадо-Г»

WH-AT

122 mm 40-tube truck MRL; automated Grad upgrade for brigade and division artillery In service 2012

OPERATED BY motor rifle division, artillery regiment, MRL battalion (replacing Grad battalion) [D 2019 H]

tank division, artillery regiment, MRL battalion [D 2019 H]

motor rifle brigade, brigade artillery, MRL battalion, INA for Tornado-G; it replaces the BM-21, 18 per brigade MRL battalion (RWW p.100); 18

delivered to one brigade 2012 (RBASE) [D 2019 M]

motor rifle brigade, 18 [O 2012-04 M] seen with 20th Guards Separate

Motor Rifle Brigade

INDICATES Tornado-G replaces the Grad in the MRL battalion of motor rifle and tank brigades and of division artillery regiments. A group of them suggests a manoeuvre brigade or division artillery group nearby.

RECOGNISE Cab Ural-4320 6x6 truck; cab seats driver and two.

Launcher is laid and returned to travel position from inside the cab.

Body Single pack of 40 122 mm tubes, 10 × 4, on the rear body; traverses 102 deg left and 70 deg right, elevates 0 to 55 deg.

Axles Three axles, all driven (6x6); Ural-4320 has central tyre pressure regulation.

Details Rebuilt BM-21 Grad on Ural-4320 (about 20 rebuilt in 2019); additions are GLONASS navigation, a ballistic computer and a video monitor in the cab.

NOT TO BE CONFUSED WITH BM-21-1 Grad [Ural-4320] p. 4

Same truck and 40-tube pack. Tornado-G lays from the cab with no crew at the launcher; no reliable external mark found in text sources.

9A51 Prima 50 tubes instead of 40 on the same Ural-4320 chassis.

9K515 Tornado-S p. 4 12 tubes of 300 mm on an 8x8 MAZ-543M chassis, against 40 small tubes on a 6x6 Ural.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY 6x6 truck; WEG claims small-arms protection, WEG 2015 BM-21 page gives none. Fords about 1.5 to 1.75 m. Can fire from an unsurveyed position and leave straight after firing.

Weight, combat 14 t

L × W × H 7.35 × 2.5 × 3.1 m travelling

Road speed 85 km/h maximum

Road range 650 km cruising range

Range, 9M521 HE-frag

40 km maximum, 9M521 extended-range HE-frag rocket; attribution to 9M521 from RUWIKI [Karpenko], WEG, ZR and WWW1 give 40 km as system maximum

Range, 9M522 HE-frag

37.5 km maximum, 9M522 rocket, separable HE-frag warhead

Range, 9M538 HE-frag

20 km maximum, 9M538 rocket, enhanced monobloc HE-frag warhead, claim

Range, 9M539 HE-frag

20 km maximum, 9M539 rocket, separable HE-frag warhead; Tecmash statement at IDEX 2019, claim

BM-27 Uragan 9П140 «Ураган»

NATO: M1977

WH-AT

220 mm 16-tube MRL on ZIL-135LM 8x8 for area fire and remote minelaying at 10–35 km In service 1975

OPERATED BY rocket artillery regiment, three rocket launcher battalions, 54 per regiment (3 battalions of 18) [D 1991 M] rocket artillery brigade, rocket launcher battalions, 54 per brigade (3 battalions of 18) [D 1991 M] self-propelled artillery regiment, Uragan rocket artillery battalion, 8 per battalion [R 2017-12 M]

INDICATES A 9P140 points to army-level rocket or artillery brigade fires, or to a Uragan battalion (8 launchers) in a division artillery regiment; the MoD also planned such battalions for combined arms brigades. In the Airborne Forces it indicates the artillery brigade.

RECOGNISE Cab ZIL-135LM cab with a blast shield that is raised during firing.

Body 16 tubes in three banks at the rear: two lower rows of six, upper row of four. In travel the pack faces rearward; muzzles covered by a sheet-metal cover when loaded.

Axles Four axles, 8x8; only the front and rear axles steer. Two petrol engines, each driving the wheels on one side.

Details Two manually emplaced hydraulic jacks at the rear of the chassis are lowered for firing. Newer launchers sit on a 6x6 BAZ-69092 chassis.

NOT TO BE CONFUSED WITH 9T452 transloader Same ZIL-135 chassis but a flatbed with 16 rockets in two stacks either side and a loading device between them; no tube pack.

BM-21 Grad p. 4 40 tubes on a Ural-375 truck, against 16 larger tubes on an 8x8 ZIL-135.

9A52 Smerch 12 tubes of 300 mm on a MAZ-543A chassis, against 16 tubes on a ZIL-135.

Unknown author, CC BY 4.0

MOBILITY Unarmoured 8x8 petrol truck; rear jacks must be lowered to fire; fords 1.2 m unprepared; 60% gradient.

Weight, combat	20 t
L × W × H	9.63 × 2.8 × 3.23 m travel position
Road speed	65 km/h maximum
Road range	500 km cruising

Range, 9M27F HE-frag	35 km maximum, 9M27F HE-frag rocket
Minimum range, 9M27F HE-frag	10 km 9M27F HE-frag rocket

Range, 9M27K cluster	35 km maximum, 9M27K rocket, 30 9N210 HE-frag submunitions

Range, 9M27K2 AT mines	35 km maximum, 9M27K2 rocket, 24 PTM-1 anti-tank mines
Minimum range, 9M27K2 AT mines	10 km 9M27K2 rocket, 24 PTM-1 anti-tank mines

SEEN WITH 9T452 transloader; ZIL-135LM (1)

SOURCES CNA D242 FAS4 GS19 IISS25 IZ17 MIL31 MIL32 MIL110 MPER ORYX RUSIPL RWW W1R WEG46 WEG2015 WP-EN49 WP-EN50 WP-RU62

Uragan-1M 9K512 «Ураган-1М»

WH-AT

Heavy 220/300 mm MRL with swappable rocket pods; successor to 9K57 Uragan In service 2007

OPERATED BY self-propelled artillery regiment, rocket artillery battalion (planned replacement for 9K57 Uragan, MoD statement; no holding confirmed) [R 2017-12 L]

artillery brigade, MRL battalion (Uragan 'being succeeded' by Uragan-M1; no holding confirmed) [R 2019-10 L]

INDICATES Planned for divisional artillery regiments and army artillery brigades as the Uragan successor. Few were built and front-line use is unconfirmed, so a sighting is notable and should be checked against the 6x6 9K57-1.

RECOGNISE Cab Forward-control cab on the MZKT-7930 8x8 chassis, seating the driver and two passengers.

Body Launcher on a turntable at the rear carrying two launcher pods instead of a fixed tube rack.

Axles Four axles (8x8), all driven; same chassis family as the 9T249 transporter-loader.

Details 300 mm pods hold 6 tubes each in two layers of three; 220 mm pods hold 15 tubes each. Pods can be mixed, one of each calibre.

NOT TO BE CONFUSED WITH 9K57-1 Uragan-1 p. 5 6x6 BAZ-69092 chassis with armoured cab, three axles not four; Russian press also calls it Uragan-1M.

9P140 Uragan p. 5 Fixed rack of 16 tubes on a ZIL-135 8x8; no detachable pods.

9A52-2 Smerch p. 6 Fixed 12-tube block in 3 rows of 4 on a MAZ-543M 8x8; Uragan-1M has two separate 6-tube pods.

9A52-4 Tornado p. 6 KamAZ-63501 8x8 truck with a replaceable 6-rocket module (WEG 2015); Uragan-1M carries two pods on the larger MZKT-7930.

Ministerstwo Obrony Rosyjskiej Federacji | Министерство Обороны Российской Федерации / Ministry of Defence of the Russian Federation, CC BY 4.0

MOBILITY Heavy 8x8 truck; fords 1.4 m, climbs 45% gradient, crosses 2.0 m trench.

Weight, combat	40 t
L × W × H	13.0 × 3.0 × 3.29 m travelling
Road speed	70 km/h maximum, maximum, road
Road range	1,000 km maximum, road

Range, 9M27F HE-frag 220 mm	35 km maximum effective, 9M27F unguided HE-frag rocket
Minimum range, 9M27F HE-frag 220 mm	10 km minimum effective, 9M27F unguided HE-frag rocket

Range, 9M27K cluster 220 mm	35 km maximum effective, 9M27K rocket, 30 9N210 fragmentation submunitions
Range, 9M55F HE-frag 300 mm	70 km maximum, 9M55F HE-frag rocket with trajectory correction

Minimum range, 9M55F HE-frag 300 mm	20 km 9M55F HE-frag rocket

BM-30 Smerch 9A52-2 «Смерч»

NATO: 280mm M1983

WH-AT

Heavy 300 mm 12-tube rocket launcher for deep area fire; Tornado-S adds guided rockets In service 1987

OPERATED BY rocket artillery brigade, three groups of 4 x 9A52-2 in ATP fig. 5-16; whether each group is a battalion or a battery is not readable from the text, 12 x 9A52-2 shown in ATP fig. 5-16 (3 groups of 4) D 2024 M

rocket artillery brigade, 7 delivered April 2017, 5 more announced

O 2017-04 M seen with rocket artillery brigade, Tver Oblast, Western MD (named as the 79th Guards Rocket Artillery Brigade by Wikipedia only)

rocket artillery brigade O 2026-09 M seen with 79th Guards Rocket Artillery Brigade (Zapad group), Tornado-S, 2026-09, 232nd Guards Rocket Artillery Brigade (Tsentr group), Tornado-S, 2026-08 and 2026-09

INDICATES *Smerch or Tornado-S points to an army-level rocket artillery brigade, not a manoeuvre brigade, whose MRL battalion holds BM-21. Expect deep fires out to 70-120 km and ammunition resupply by MAZ-543 transloaders.*

RECOGNISE Cab MAZ-543M 8x8 truck; driver cab front left, commander behind him; launch and fire-control cabin to the rear of the driver cab, one door each side, two small front windows.

Body Single package of 12 long 300 mm tubes over the rear deck, 3 rows of 4 (two banks of four with four more on top); traverses 30 deg each side, elevates to 55 deg.

Axles Four axles, 8x8; hydraulic jacks between the wheels of the 3rd and 4th axles are lowered to steady the rear of the launcher when firing.

Details Tornado-S (9A54): satellite navigation antenna on the roof of the fire control cab; otherwise laid out like the 9A52-2.

NOT TO BE CONFUSED WITH BM-27 Uragan (9P140) p. 5 16 tubes of 220 mm on a ZIL-135 chassis; Smerch has 12 larger tubes on the MAZ-543.

9A53 Uragan-1M p. 5 Two quick-change pods of six tubes on an MZKT-7930 8x8; Smerch has one fixed 12-tube package.

9A52-4 Tornado KamAZ-63501 8x8 truck with a single six-tube pod; Smerch has one fixed 12-tube package on the MAZ-543M.

9T234-2 and 9T255 transloaders Same MAZ-543A family chassis; carry 12 rockets and a crane (850 kg on the 9T255) with no launch tube package.

Vilkha (Ukraine) Ukrainian development that uses the same Smerch launcher vehicle; not separable by shape alone.

SEEN WITH MAZ-543M 8x8 chassis (1 per launcher); 9T234-2 transloader (TZM) (INA; carries 12 rockets); 9T255 transloader (Tornado-S) (INA; carries 12 rockets); 1K123 Vivary automated fire control system (up to 3 battalion and 18 battery vehicles per brigade system); 9S936 command and staff vehicle (Tornado-S); 1V168 ASUNO-S fire control; 1T12-2M survey vehicle; 1B44 meteorological complex; Zoopark counter-battery radar (INA; reported cueing Smerch fire 2024-03)

VARIANTS 9A54 Tornado-S Satellite antenna on the fire control cab roof; same MAZ-543M chassis and 12-tube package. GLONASS, automated laying and fire control; fires 9M544 and 9M549 guided rockets to 120 km; crew 3. 9A52-4 Tornado KamAZ-63501 8x8 truck with one six-tube 300 mm pod. Half the load; pod replaced after firing; lighter and more mobile. ISS25 lists none in Russian service.

Vitaliy V. Kuzmin, CC BY-SA 4.0

MOBILITY Heavy 43.7 t 8x8; fords 1.1 m unprepared; not amphibious; rear jacks must be lowered to fire.

Weight, combat, 9A52-2 **43.7 t** loaded
 Weight, empty **33.7 t** 9A52-2 (WEG) and 9A54 (MISSTS)
 L × W × H **12.1 × 3.05 × 3.05 m** travelling

Range, 9M528 HE-frag	90 km maximum, unguided extended-range rocket, separable HE-frag warhead, claim
Range, 9M544 and 9M549 guided	120 km maximum, Tornado-S guided cluster rockets, inertial and GLONASS, claim
Minimum range, 9M544 and 9M549 guided	20-40 km Tornado-S guided rockets; crew statement, claim
Employment range, Smerch	35-70 km practical, unguided rockets, Ukraine 2022, used at or near maximum range, observed
Employment range, Tornado-S	about 100 km practical, guided rockets against a command post (2026-08) and a fortified strongpoint (2026-09); MoD figures via state media, claim
Crew, 9A52-2	4
Crew, 9A54 Tornado-S	3
Tubes	12 x 300 mm 9A52-2 and 9A54
CEP, 9M55K cluster	150 m inertial range and attitude correction, no terminal guidance; also given for 9M528
CEP, 9M544 and 9M549 guided	5-10 m inertial and GLONASS; official claim, claim

TOS-1A Solntsepek TOC-1A «Солнцезёк»

TR

Tracked 220 mm thermobaric and incendiary rocket launcher of the RKhBZ troops In service 1988

OPERATED BY RKhBZ brigade, flamethrower battalion of 3 batteries, each 6 BM-1 and 6 TZM-T; RWW places these battalions in NBC defence brigades and regiments and does not state the echelon, 18 per battalion (6 per battery) [\[D 2016 M\]](#)

RKhBZ brigade, TOS battalion of 3 companies of 6 launchers (ATP para 5-146), 18 per battalion [\[D 2024 M\]](#)

INDICATES TOS launchers belong to army or district RKhBZ units, not manoeuvre brigades. Seeing one suggests an attached flamethrower company or battalion supporting an attack or breach, since it must close to within about 6 km of the target.

RECOGNISE Hull T-72 tank hull with no gun turret; a large launcher box fills the hull roof. Paired with look-alike T-72-based TZM-T reload vehicles.

Armament 24 tubes of 220 mm in a heavy armoured box. Launchers shipped from Nov 2025 add a factory armour shell over the tubes that lifts open when the tubes elevate.

Turret No turret: the launcher box sits on a rotating platform and elevates to fire. Improvised anti-drone cover was fitted in the field before factory kits.

Suspension Standard T-72 tracked running gear with large-diameter road wheels. Road wheel and return roller counts not confirmed in cited sources.

NOT TO BE CONFUSED WITH TOS-1 Buratino 30 tubes, without the heavy armoured housing added on TOS-1A, which has 24 tubes.

TZM-T reload vehicle Same T-72 hull but carries two rocket racks with a crane between them instead of a trainable launcher.

Vitaliy V. Kuzmin, CC BY-SA 4.0

MOBILITY Tracked T-72 chassis, not amphibious; fords 1.2 m; must close to within 6 km of the target to fire the longest-range thermobaric rocket.

Weight, combat	44.3 t
L × W × H	6.86 × 3.46 × 2.60 m
Road speed, maximum	60 km/h
Off-road speed, maximum	45 km/h

Range, thermobaric rocket	6,000 m maximum, MO.1.01.04M thermobaric rocket, 3.7 m, 217 kg
Range, incendiary rocket	6,000 m maximum effective, MO.1.01.04M.OP incendiary rocket, 3.7 m, 204 kg
Range, original short rocket	2,700 m maximum, MO.1.01.04 thermobaric rocket, 3.3 m, 173 kg, fired from TOS-1A
Range, minimum	600 m MO.1.01.04M rocket
Launch tubes	24 × 220 mm

SOURCES AR20 AR21 ATP CNA EMP GS17 MIL28 MIL29 MIL30 MISS14 RWW TASS13 TASS14 TASS15 TASS16 WEG42 WMC17 WP-EN42 WP-EN44 WP-EN45

2S5 Giatsint-S 2C5 «Гиацинт-С»

NATO: M1981

TR

Army-level 152 mm self-propelled gun for long-range counter-battery and deep fire In service 1975

OPERATED BY artillery brigade, gun battalion (152 mm), 18 per battalion (24 in forward armies); 2S5 or 2A36 or M-46 [\[D 1991 M\]](#) unit not identified, Airborne Forces artillery; unit not named, 18 (IISS 2024 figures) [\[R 2024 M\]](#)

INDICATES In Soviet doctrine the 2S5 marked the gun battalion of an army artillery brigade. Russian MoD reporting (2026) also places it with motor rifle brigade artillery, so alone it no longer points to army-level artillery.

RECOGNISE Hull Low tracked hull, engine and driver at front; front dozer blade; large spade or baseplate at rear, lowered to the ground before firing.

Armament Very long 152 mm barrel with five-part multi-baffle muzzle brake, held by a travel lock; with gun forward, length 8.95 m against a hull of 8.33 m.

Turret No turret: gun on an open mount at the rear of the hull roof, crew exposed; 15 deg traverse each side. Commander's cupola carries a 7.62 mm PKT and a searchlight.

Suspension Six rubber-tyred double road wheels and four return rollers per side; drive sprocket front, idler rear; torsion bars, track shoes 484 mm wide.

NOT TO BE CONFUSED WITH 2S3 Akatsiya Large enclosed turret at hull rear, 360 deg traverse, cupola offset left; double-baffle muzzle brake and fume extractor. 2S5: open mount, no turret, multi-baffle brake.

2S4 Tyulpan p. 9 Same chassis family, but a 240 mm mortar travels folded with muzzle forward, not reaching past the first road wheel; no long barrel over the front.

One half 3544, Public domain

MOBILITY Tracked; fords about 1 m; rear spade must be lowered to fire; gun traverse only 15 deg each side, so the hull is laid on the target line.

Weight, combat	28.2 t

TR

152 mm tracked self-propelled howitzer of brigade, division and army artillery In service 1989

OPERATED BY motor rifle brigade, two self-propelled artillery battalions, each of three batteries of 6 howitzers; ATP notes 2S3 may be held instead, 18 per battalion (6 per battery), 36 per brigade; ATP: some battalions up to 24 systems [\[D 2024 M\]](#)

tank brigade, two howitzer (self-propelled artillery) battalions, three batteries of 6, 18 per battalion, 36 per brigade [\[D 2016 M\]](#)

INDICATES A battery of 6 or battalion of 18 Msta-S points to a self-propelled artillery battalion of a motor rifle or tank brigade, a division artillery regiment or an army artillery brigade. Wartime batteries may be smaller.

RECOGNISE Hull Tank-type tracked hull with T-72 hull geometry and T-80 running gear, built-in dozer blade, travel lock for the barrel. About 11.9 m long overall with the gun forward.

Armament Very long 152 mm L/47 barrel with double-baffle muzzle brake and a bore evacuator. 12.7 mm NSVT machine gun on the commander's cupola.

Turret Large turret over the hull centre; vehicle about 3 m high. Six 81 mm smoke launchers. 2S19M2: two stowage boxes on the right turret side.

Suspension T-80 type running gear: six road wheels and five return rollers per side, 580 mm tracks.

NOT TO BE CONFUSED WITH 2S3 Akatsiya (152 mm SP howitzer) Engine at front and turret toward the rear; much shorter L/27 barrel; four return rollers; about 28 t against 42 t. 2S5 Giatsint-S (152 mm SP gun) p. 7 152 mm 2A37 L/54 gun; most of the crew, all but the gunner, work outside the vehicle when firing; about 28 t.

MILRU, CC BY 4.0

MOBILITY Heavy tracked vehicle, not amphibious. Fords 1.2 m unprepared; WEG gives 5 m with preparation. About 42 t, needs heavy bridging.

Weight, combat	42 t 2S19 and 2S19M1
Weight, combat, 2S19M2	43.24 t 2S19M2
L × W × H	11.917 × 3.584 m overall; 3.38 m without skirts × 2.985 m
Road speed, maximum	60 km/h

Range, HE-frag	24.7 km maximum, 30F45 (OF-45) HE-frag, full charge
Range, HE-frag base bleed	29 km maximum, 30F61 HE-frag base bleed (round 3V0F91)
Range, rocket-assisted	36 km HE rocket-assisted projectile (HERA/RAP), type not named
Range, guided	20 km maximum, Krasnopol laser-guided projectile; laser designation by an observer required

152 mm self-propelled howitzers: tracked autoloader 2S35 and wheeled 8x8 2S43 In service 2020

OPERATED BY self-propelled artillery battalion, self-propelled howitzer battery, 6 per battery, 18 per battalion [\[D 2016 M\]](#)

self-propelled artillery regiment, 8 2S35 on troop trials

[\[R 2020-05 M\]](#)

artillery brigade, self-propelled artillery battalions, INA; planned replacement of the brigade's 2S19 by 2S35, reported 2017, not carried out by late 2024 [\[R 2019 L\]](#)

INDICATES 2S35 or 2S43 suggests new-build guns above manoeuvre-brigade level: 2S35 was planned for army artillery brigades and trialled in a division SP artillery regiment; 2S43 is reported with the 273rd Artillery Brigade, 34th Artillery Division. Rare (IIS: 8, 20).

RECOGNISE Hull 2S35: T-90-type tracked hull with reshaped front; driver, commander and gunner sit side by side in the front, three hatches across the hull front; engine at rear.

Armament 2S35: very long 152 mm 2A88 barrel (52 calibres) with muzzle brake, held by a travel lock on the glacis; Kord 12.7 mm remote weapon station on turret roof.

Turret 2S35: large unmanned turret mid-hull; 902 smoke dischargers on both sides and roof; laser warning sensors at front and rear of roof. From 2021 two boxes on turret front.

Suspension 2S35: six road wheels each side, idler front, drive sprocket rear, torsion bars; upper track covered by a skirt. Return roller count INA.

NOT TO BE CONFUSED WITH 2S19 Msta-S / 2S19M2 Msta-SM2 p. 8 2S19 has a crew of five with gun crew in the turret and a shorter 47-calibre barrel; 2S35 has three crew hatches across the hull front. 2S44 Giatsint-K Same BAZ 8x8 chassis as 2S43 but carries the gun of the 2A36 Giatsint-B towed gun.

Kirill Borisenko, CC BY-SA 4.0

MOBILITY 2S35 tracked, 48–55 t, not amphibious. 2S43 wheeled 32 t, for road and off-road use, fits IL-76; fords 1.4 m.

Weight, 2S35	48–55 t combat
Weight, 2S43	32 t combat

artillery brigade, 12 x 2S7 each (RUWIKI, 2019) **O 2019 L**

INDICATES A 203 mm tracked gun points to army-level artillery: a high-power artillery brigade or an army artillery brigade's heavy battalion, not a manoeuvre brigade's guns. Used on high-value targets, in urban fighting and, since 2022, for counter-battery fire.

RECOGNISE Hull Purpose-built tracked chassis using T-72/T-80 automotive parts. Four compartments: driver, power pack, crew, rear. Front dozer blade.

Armament Very long 203 mm 2A44 gun (about 12 m) on an open mount outside the hull; on the march it lies forward, overhanging the nose. No muzzle brake, no fume extractor.

Turret No turret. Gun on open external mount at hull rear. Large recoil spade at rear lowered to the ground when firing.

Suspension Seven twin rubber-tyred road wheels and six return rollers per side; drive sprocket front, idler rear, idlers lowered to the ground when firing. Torsion bar suspension.

NOT TO BE CONFUSED WITH 2S4 Tyulpan p.9 Also given the NATO name M-1975. A 240 mm self-propelled mortar, not a gun: no 12 m barrel overhanging the hull.

Boevaya mashina, CC BY-SA 3.0 de

MOBILITY Not amphibious. Needs firm ground to emplace; recoil spade and dozer blade used to dig in.

Weight, combat	46,500 kg
L × W × H	10.5 × 3.38 × 3.0 m
Road speed	51 km/h maximum
Road range	500 km cruising

Range, HE-frag	37.5 km maximum, Conventional HE-frag, 110 kg projectile
Range, HE rocket-assisted	47.5 km maximum, RAP projectile, 103 kg
Rate of fire	1.5 rds/min (2S7); 2.5 rds/min (2S7M) maximum

Ammunition carried	4 (2S7); 8 (2S7M) On the vehicle
Crew	7 (2S7); 6 (2S7M) on the vehicle; 2S7 crew is 14 with the auxiliary vehicle crew (WIKI)

Elevation	0 to +60 deg; traverse 30 deg

TR

240 mm self-propelled breech-loading heavy mortar for destroying fortified targets In service 1971

OPERATED BY high-power artillery brigade, 2S4 battalion (ATP figure 5-18 shows two 2S4 groups; subunit name not given), ATP fig. 5-18: groups of 6 and 4 2S4 (OCR uncertain); 8 reported in 45th brigade (2017) **D 2024 H**

high-power artillery brigade, heavy mortar battalion (240-mm);

brigade allocated to a front (Soviet RVGK) **D 1991 M**

INDICATES Held by high-power artillery brigades and by heavy battalions of army-level artillery brigades. A 2S4 sighting points to army-level heavy artillery tasked against fortified positions or built-up areas.

RECOGNISE Hull Turretless tracked hull; engine front right, driver front left, commander behind driver; ammunition drums in mid-hull; open, externally mounted mortar at rear.

Armament Very large 240 mm breech-loading mortar, barrel about 5 m, carried with its baseplate on the hull roof; in action it swings back onto a baseplate on the ground.

Turret No turret. Commander's rotating cupola behind the driver with an external 7.62 mm PKT and a searchlight.

Suspension Six rubber-tyred road wheels and four return rollers per side, drive sprocket front, idler rear, torsion bars. Road wheel size and spacing INA.

NOT TO BE CONFUSED WITH 2S3 Akatsiya Fully enclosed turret with 152 mm gun at the rear on a similar six-road-wheel chassis; 2S4 has no turret and a roof-carried mortar.

2S5 Giatsint-S p.7 Same chassis family, also turretless, but a long 152 mm gun overhangs the front; the 2S4 mortar muzzle is only level with the first road wheel, baseplate folded above it.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Tracked; heavy. Fords about 1 m unprepared. Mortar must be lowered onto a ground baseplate to fire.

Weight, combat	27.5 t
L × W × H	7.94 × 3.25 × 3.225 m travelling
Road speed	60 km/h maximum
Road range	500 km

Range, 53-F-864 HE mine	9.65 km maximum, HE mine 130.7 kg, full charge

2A36 Giatsint-B 152 mm towed gun 2A36 «Гіатсинт-Б»

NATO: M1976

TW

152 mm towed gun for long-range and counter-battery fire at army level In service 1976

OPERATED BY artillery brigade, gun battalion (152 mm) of the army artillery brigade; 2A36 or 2S5 or M-46, 36 per brigade (two 18-tube gun battalions) or 48 (four 24-tube battalions) [D 1991 M]

artillery brigade, gun brigade of the front artillery division; 2A36 or 2S7, 72 per brigade [D 1991 M]

unit not identified, IISS estimate: 150 in service, 350 in store [Ground Forces total] [R 2024-T2 M] seen with Russian Ground Forces, holdings by type

unit not identified, IISS estimate: 50 across Naval Infantry; holding unit not stated [R 2024-T2 L] seen with Russian Naval Infantry, holdings by type

INDICATES ATP: towed artillery remains in some units. The 2A36 went to the gun battalions of artillery brigades and divisions at army and front level (FM 100-2-3, Victory Museum), so it indicates an artillery formation rather than a manoeuvre unit.

RECOGNISE Barrel Long 152 mm barrel, 8197 mm with muzzle brake; multi-slot slit-type muzzle brake; recoil brake and recuperator sit above the barrel.

Shield Shield on the upper carriage protects the crew against bullets and fragments.

Carriage Split box-section welded trails; gun rests on a base plate for firing, wheels raised by a hydraulic jack.

Wheels Two axles, twin pneumatic-tyred wheels each side (four wheels), torsion-bar suspension.

NOT TO BE CONFUSED WITH 2A65 Msta-B p. 10 2A65 has a two-wheeled carriage (2A36 has four wheels), a shield sloping to the rear over the wheels and a caster wheel on each trail.

Ministry of Defense of Ukraine, CC BY-SA 2.0

MOBILITY Towed by truck or tracked tractor; fired from a base plate with wheels raised, so needs a prepared firing position. Ground pressure and fording not found.

Weight, firing position 9,760 kg
L × W × H 12.92 × 2.788 × 2.76 m travel position
Road speed, towed 80 km/h maximum, on road
Off-road speed, towed 35 to 45 km/h

Range, HE-frag 3VOF39 28.5 km maximum, HE-frag 3OF29, full charge
Range, rocket-assisted 33.5 km maximum, active-rocket projectile 3OF30
Minimum range, HE-frag 3VOF39 8.6 km ammunition not stated; listed with HE-frag maximum
Range, direct fire 1,530 m ammunition and target not stated in source
Rate of fire 6 rpm maximum

2A65 Msta-B 2A65 «Мста-Б»

NATO: M1987

TW

Towed 152 mm howitzer for army-level artillery brigades and regiments In service 1986

OPERATED BY artillery brigade, artillery battalions (several per brigade; 2S19 or 2A65) [D 2019 M]

unit not identified, Naval Infantry artillery; brigade not named, 50 (IISS 2024 figures) [R 2024 M]

unit not identified, Russian deployment in Syria; unit not named, 12 (IISS 2024 figures) [R 2024 M]

INDICATES A towed 152 mm howitzer points to an army-level artillery brigade or a division artillery regiment. CNA says replaced 2S19s and 2A65s move to division regiments and brigade battalions.

RECOGNISE Gun Conventional towed howitzer, 152.4 mm, 47 calibres, monoblock barrel with a three-chamber muzzle brake and no bore evacuator.

Carriage Split trail with box-section trails, each with a caster wheel that swings up over the trail when firing. Hydraulic firing jack under the front.

Shield Gun shield on the upper carriage.

Running gear Sprung two-wheel running gear; springing cuts out automatically when the trails are spread.

Towing Towed by Ural-4320 6x6 or KamAZ-63501AT 8x8; in the travel position the base plate is raised and clamped to barrel and cradle.

NOT TO BE CONFUSED WITH 2S19 Msta-S p. 8 Self-propelled turret version of the same gun; the 2S19 barrel has a bore evacuator, the 2A65 does not.

2A36 Giatsint-B p. 10 Four-wheeled carriage, two wheels each side; the 2A65 has two-wheeled running gear.

One half 3544, public domain

Iskander-M 9K720 «Искангеп-М»

NATO: SS-26 Stone

WH-AT

Army-level operational-tactical ballistic and cruise missile system for deep strike In service 2007

OPERATED BY missile brigade, 3 missile battalions of 2 batteries each; 2 launchers per battery, 12 launchers and 12 transloaders per brigade; 4 of each per battalion [D 2021 H](#)

combined arms army, army missile brigade, 1 missile brigade (12 launchers) per army [D 2024 H](#)

tank army, army missile brigade, 1 missile brigade (12 launchers)

[O 2021 M](#)

army corps, corps missile brigade, 1 missile brigade (12 launchers)

[O 2021 M](#)

combined arms army, army missile brigade, 12 launchers per brigade

[O 2023 M](#)

missile battalion, 4 launchers [O 2008 M](#)

INDICATES Iskander vehicles indicate an army-level missile brigade of 12 launchers. The army commander holds it as a reserve for priority strikes; it is not part of brigade artillery groups, so it does not by itself mark a manoeuvre brigade.

RECOGNISE Launcher Iskander-M: two ballistic missiles lie in the rear body on separate lift arms, raised to 85 deg to fire. Iskander-K: 2 x 9M728 or 4 x 9M729 in canisters.

Radar No radar is described on the launcher; it has satellite navigation and its own fire-control post. Target data comes from the 9S920 and 9S552 vehicles.

Chassis MZKT-7930 8x8 heavy truck, about 13 m long and 3 m wide, first two axles steered. Four hydraulic jacks lower to level the vehicle before launch.

Complex Launchers move with 9T250 transloaders on the same 8x8 chassis, which carry a crane. Command, data preparation, maintenance and living vehicles are KamAZ trucks.

NOT TO BE CONFUSED WITH 9T250 transporter-loader (same complex) Same MZKT-7930 chassis and two missiles, but has a loading crane and no launch equipment.

K-300P Bastion-P coastal launcher (MZKT-7930) Coastal troops system: two Oniks anti-ship missiles fired vertically; battery of four launchers with KamAZ command vehicles.

Bal coastal missile launcher (MZKT-7930) Carries eight Kh-35 anti-ship missiles, not two large missiles.

9A53 Uragan-1M MRL (MZKT-7930) [p. 5](#) Rear carries two rocket pods of six tubes each instead of two missiles.

SEEN WITH 9P78-1 self-propelled launcher, MZKT-7930 8x8 (2 per battery, 4 per battalion, 12 per brigade); 9T250 transporter-loader, MZKT-7930 8x8 with crane, 2 missiles (2 per battery, 4 per battalion, 12 per brigade); 9S552 command and staff vehicle, KamAZ truck (1 per battery; 11 per brigade); 9S920 information preparation point (mission planning), KamAZ truck (1 per brigade); Maintenance vehicle (MRT0), KamAZ truck (1 per brigade in the 51-vehicle brigade set); Life support vehicle, KamAZ truck, living space for up to 8 (14 per brigade); 9M723 ballistic missile (2 per launcher, 2 per transloader; 48 per brigade); 9M728 (R-500) and 9M729 cruise missiles (2 x 9M728 or 4 x 9M729 per launcher); MZKT-7930 8x8 chassis

VARIANTS 9K720 Iskander-M with 9M723 Baseline: two ballistic missiles about 7.3 m long and 0.92 m wide on lift arms. Quasi-ballistic missile, up to about 500 km; reported to release decoys during flight. Iskander-K with 9M728 (R-500) Same 9P78-1 launcher, loaded with two cruise missile canisters instead of two ballistic missiles. Low-flying subsonic cruise missile; official range up to 500 km. Used against Chernihiv in Aug 2023. Iskander launcher with 9M729 Special launcher configuration with four cruise missile canisters; the missile is 530 mm longer than 9M728. Range disputed: US assessed over 500 km in breach of the INF Treaty; Russia said it was within limits.

NATO: SA-21 Growler

WH-AT

Long-range SAM system against aircraft, cruise missiles and ballistic missiles In service 2007

OPERATED BY military district, SAM regiments of the district's Air Force and Air Defence Army, IISS late 2024, SAM regiments listed with S-400 in each district's Air Force and Air Defence Army: 45th (Leningrad MD) 5, plus 4 listed with S-300PS, S-300PM1 and S-400; 14th (Central MD) 4; 4th (Southern MD) 3; 11th (Eastern MD) 4 listed with S-300PS and S-400, plus 1 with S-300V and S-400; 6th (Moscow MD) none (Moscow area: 5 regiments under Aerospace Defence Command). Launchers per district INA **[D 2024 H]** air defence missile regiment, about 12 launchers reported at the unit site; 4 launchers and 96L6 and 92N6 radars reported destroyed **[O 2025-11 M]**

air defence missile regiment, air defence missile battalion (division), usually 2 battalions of 8 launchers each (16 per regiment); 2012 press report relaying MoD press service **[R 2012 M]** aerospace forces air defence regiment, IISS: 13 Aerospace Forces regts with S-400 and Pantsir-S1, plus 2 mixed with S-300 **[R 2024 M]** air defence missile regiment, Navy: regiments under fleet air defence divisions, IISS: 64 S-400 in Navy; 3 SAM regts: 2 Baltic Fleet, 1 Pacific Fleet (naval aviation) **[R 2024 M]** air defence missile battalion, IISS: 2 SAM bn in Belarus; 1 SAM bty in Syria **[R 2024 M]**

INDICATES S-400 belongs to Aerospace Forces or Navy SAM regiments, not ground-force brigades. A regiment usually has two battalions of eight launchers; launchers imply a 92N6 engagement radar nearby, and often Pantsir-S1 in the same regiment.

RECOGNISE Launcher Four large missile canisters on an erector, raised vertical to fire. One canister can hold four small 9M96 missiles instead of one 48N6.

Radar 92N6 Grave Stone engagement radar: phased array on MZKT-7930 8x8. 91N6 acquisition radar: back-to-back phased array, MZKT-7930 tractor. 96L6 may sit on a 40V6M mast.

Chassis Launchers self-propelled on MAZ-543M 8x8 (5P85SM2-01), or on a semitrailer towed by a BAZ-6402-series 6x6 tractor (5P85T2; export 5P85TE2 on BAZ-64022).

Complex 92N6 and 96L6 radars on MZKT-7930 8x8; 55K6 command post on Ural 8x8 truck. A battalion site holds about eight launchers around one 92N6.

NOT TO BE CONFUSED WITH S-300PM1/PM2 (SA-20 Gargoyl) Same 5P85 launcher family, 96L6 radar and a look-alike command post; S-400 has the redesigned 92N6 Grave Stone, not the 30N6 Flap Lid/Tomb Stone.

64N6E Big Bird (S-300PMU family) Same two-faced array layout; the S-400 91N6E is readily told apart by its new-build MZKT-7930 tractor (APA).

SEEN WITH 55K6E command post (30K6E control system) (1 per 30K6E system of up to 6 fire units (export composition)); 91N6E Big Bird acquisition radar (1 per 30K6E system (export composition)); 92N6E Grave Stone engagement radar (domestic 92N6A) (1 per 98Zh6E fire unit); 96L6E all-altitude radar (domestic 96L6-TsP); 5P85SM2-01 / 5P85T2 launcher (APA export list: 5P85SE2 / 5P85TE2) (8 per battalion (Russian regiments, 2012); up to 12 per fire unit (export composition)); BAZ-64022 6x6 tractor (1 per 5P85TE2 semitrailer launcher); 40V6M/MD mast (INA (optional)); 5T58-2 missile transporter and 22T6-2 loading crane; 96K6 Pantsir-S1 (INA; listed in the same regiments)

VARIANTS 5P85SM2-01 Self-propelled launcher on MAZ-543M 8x8; no separate tractor. INA. 5P85T2 Launcher on a semitrailer towed by a BAZ-6402-series 6x6 tractor. INA. 5P90S Self-propelled TEL on BAZ-6909-022; new gantry, folding mast with directional antenna, satnav antennas on a longer baseline. Intended to carry a heavier missile payload than the MAZ-79100-series TELs (APA). 51P6 Launcher on MZKT-7930 chassis (RU Wikipedia only); Oryx lists 51P6 TELs among S-400 losses. INA.

S-300V4 C-300BA

NATO: SA-23 **TR**

Tracked long-range SAM and theatre anti-ballistic-missile system of Army air defence In service 1988

OPERATED BY air defence missile brigade, air defence missile battalion (up to 4 per brigade, under Polyana-D4M1 brigade CP); battalion CP 9S457M controls up to 4 batteries; WEG: an upper-level 9S52 Polyana-D4 command post may integrate S-300V with Buk into one brigade, S-300V battery: 1 9S32, 4 9A83, 2 9A82, 1 9A84, 2 9A85; S-300V4 battery counts INA [\[D 2017 M\]](#)

air defence missile brigade, INA. IIS lists S-300V and S-300V4 in Army holdings without a count and counts 16 SAM brigades, but does not say which hold them; Izvestia reports S-300V4 brigades under the OSK [\[R 2024 M\]](#)

INDICATES S-300V4 vehicles point to an Army air defence missile brigade: a front-level asset directly under a district (OSK) or front commander, covering main troop groupings. Older S-300V also serves in Aerospace Forces SAM regiments and at the Armenia base (IIS).

RECOGNISE Launcher 9A83 TELAR: four large tubes carried flat, raised vertical to fire; illuminator radar at the front on a folding mast. 9A82: two tubes, radar fixed over the cab.

Launcher Loader-launchers (9A84, 9A85) look like TELARs but carry a hydraulic crane in place of the radar. In S-300V4 heavy missiles ride only on 9A84-2 loader-launchers.

Radar 9S32 guidance station: large phased array raised hydraulically on its own tracked vehicle. S-300VM/V4 9S32M uses a larger High Screen-type space-fed array.

NOT TO BE CONFUSED WITH S-300PS/PM, S-400 [SA-10, SA-20, SA-21] p. 12 Launchers are wheeled: S-300P on 8x8 trucks, S-400 on trailers behind 6x6 tractors. The S-300V family is on tracked vehicles.

TELAR, Alexey Ivanov, CC BY 4.0

radar, Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Heavy tracked vehicles, not amphibious; ford 1.2 m. Deploy from march and fire from unprepared sites in about 5 min; ready to move about 5 min after shutdown.

S-350 Vityaz C-350 «Бумраг»

NATO: SA-28 **WH-AT**

Wheeled medium-range SAM against aircraft, cruise missiles, UAVs and ballistic missiles In service 2019

OPERATED BY air defence missile battalion, Battalion set: 1 command post 50K6A, 2–3 multifunction radars 50N6A, 12 launchers 50P6A, 12 launchers (12 missiles each) per battalion, per Russian MoD statement [\[R 2020 M\]](#)

unit not identified, training centre of the Anti-aircraft Missile Forces, Zhukov Military Academy of Aerospace Defence, first S-350 set (crews and instructors training) [\[R 2020-02 M\]](#)

INDICATES An S-350 battalion covers important sites or groups of forces against cruise missiles and aircraft. Russian statements tie deliveries to VKS air defence regiments and brigades and to Navy units; units seen near the front in 2022–25 are unidentified.

RECOGNISE Launcher 50P6 launcher carries 12 missiles in vertical-launch containers; the container pack is raised upright to fire ('cold' vertical launch).

Launcher From photograph: forward-control boxy cab; container pack in two horizontal tiers behind a machinery box. Four axes (8x8 in text sources): two front, gap, two rear.

Radar 50N6A multifunction radar: rotating phased-array antenna, 360° cover, circular and sector modes; unmanned, remote-controlled from the command post.

Chassis Launcher on 8x8 BAZ-6909 (WEG, Almaz-Antey 2023). WEG puts the radar on 6x6 BAZ-69092; Aif puts all modules, launcher included, on BAZ-69092-012.

NOT TO BE CONFUSED WITH S-300PS/PM and S-400 launcher p. 12 Four missile canisters per launcher, against twelve containers on the 50P6.

50P6T launcher-loader Described as very similar to the 50P6 launcher; no distinguishing mark found in text sources.

M1»; «Byk-M2»; «Byk-M3»

NATO: SA-11 Gadfly, SA-17 Grizzly, SA-27

TR

Tracked medium-range SAM complex; army-level air defence of ground forces In service 1983

OPERATED BY air defence missile brigade, 4 air defence missile battalions, each 3 batteries; brigade command post Polyana-D4, Buk-M1: 6 TELARs, 3 loader-launchers, 1 CP, 1 search radar per battalion; 24 TELARs per 4-battalion brigade (JIT: 53rd Bde had 3 operational battalions in 2014) [D 2016 H]

air defence missile brigade, battalion TELAR, INA per battalion; brigade had 3 operational battalions in 2014 (JIT) [O 2014-07 M]

air defence missile brigade, air defence missile battalion (brigade set of Buk-M3), Buk-M3: up to 6 TELARs or 9S36M radars and up to 12 launchers per battalion [R 2019 M]

aerospace forces air defence regiment, 4 Aerospace Forces regiments with Buk-M1-2, Buk-M2 and S-300V; about 80 Buk-M1-2/Buk-M2 in Aerospace Forces holdings [R 2024 M]

air defence missile brigade, air defence missile battalion [R 2018 L]

INDICATES Buk vehicles usually indicate an army-level air defence missile brigade, nominally of four battalions (the 53rd had three in 2014). The army may detach Buk subunits to its divisions, so a battery alone does not fix the brigade's position.

RECOGNISE **Launcher** M1 and M2 TELAR: four bare missiles on a trainable launcher above the hull, radar at its front. M3 TELAR 9A317M: six missiles in cylindrical containers.

Launcher Loader-launcher has no radar. M1/M2: 8 missiles (4 on rails, 4 on cradles) and a crane. M3 9A316M: 12 containers on two arms. TELAR: 4 missiles (M3: 6).

Radar M1 TELAR carries the 9S35 radar, not a phased array. M2 and M3 TELARs carry a flat phased-array panel. Tell M2 from M3 by missiles: 4 bare vs 6 in tubes.

Radar 9S18M1 search radar: flat array on a tracked hull, 8 m high when raised, turns 360 deg. M2/M3 9S36: array on a telescopic mast up to 21–22 m, no missiles.

Chassis All combat vehicles on similar heavy tracked chassis, about 8–9.6 m long, 3.3 m wide, 30–38 t. M1/M2: GM-567M, 569, 577, 579. M3: GM-5969.

NOT TO BE CONFUSED WITH **Tor-M1/M2 (SA-15)** p. 15 One self-contained vehicle with its own search radar; missiles in 4-round container modules, not on an arm. No separate radar vehicle; battery has two transloader trucks.

2K12 Kub (SA-6) 2P25 launcher carries three missiles on a lighter 19.5 t chassis and has no radar; radar is on a separate 1S91 vehicle.

S-300V 9A83/9A82 (SA-12) p. 13 Launcher carries four (9A83) or two (9A82) large missiles fired vertically, on an MT-T-based chassis. Buk fires from an inclined arm.

SEEN WITH 9S52 Polyana-D4 brigade command post (1 per brigade); 9S470M1 command post (Buk-M1) (1 per battalion); 9S18M1 Kupol-M1 target acquisition radar (Buk-M1) (1 per battalion); 9A310M1 TELAR (Buk-M1) (2 per battery, 6 per battalion); 9A39M1 loader-launcher (Buk-M1) (1 per battery, 3 per battalion); 9S510 command post (Buk-M2) (1 per battalion; controls up to 6 fire sections); 9S18M1-3 target acquisition radar (Buk-M2) (1 per battalion); 9A317 TELAR (Buk-M2) (Up to 4 per battalion, each with 1 loader-launcher); 9S36 mast-mounted illumination and guidance radar (Buk-M2) (Up to 2 per battalion, each with 2 loader-launchers)

VARIANTS 9K37M1 Buk-M1 TELAR 9A310M1 with 9S35 radar and four bare 9M38M1 missiles; loader-launcher 9A39M1 with 8 missiles. 9K37M1-2 Buk-M1-2 Looks like Buk-M1: TELAR 9A310M1-2 with 9S35M1-2 radar and bare missiles. 9K317 Buk-M2 TELAR 9A317 with flat phased-array radar, four bare missiles; adds 9S36 radar on a 21–22 m mast. 9K317M Buk-M3 Missiles in containers: 6 on TELAR 9A317M, 12 on launcher 9A316M. All vehicles on GM-5969 chassis.

Buk-M2 TELAR. Boevaya mashina, CC BY-SA 3.0

Buk-M3 TELAR. Ministry of Defence of the Russian Federation, CC BY 4.0

9S36M radar on mast. Boevaya mashina, CC BY-SA 4.0

MOBILITY Heavy tracked, not amphibious; fords 1 m. TELAR section ready 5 min from march; 9S36 mast-radar section needs 10–15 min.

Weight, combat 34 t Buk-M1; WEG does not say which vehicle (MISM1 gives 35 t for the 9S18M1 radar)

L × W × H 9.3 × 3.25 × 3.8 m Buk-M1; WEG does not say which vehicle (MISM1 gives 9.59 m for the 9S18M1 radar)

aerospace forces air defence regiment, INA per regiment; IIS lists 9 SAM regts with Pantsir-S1 in the 45th, 4 in the 14th, 3 in the 4th and 4 in the 11th AF&AD Army **R 2024 M**

air defence missile regiment, INA (1 SAM regt with S-400 and Pantsir-S1) **R 2024 M**

INDICATES Usually marks a nearby S-400 (or S-300) battalion or a defended strategic site: VKS regiments deploy Pantsir with their long-range SAM battalions (three per S-400 battalion, Armada). IIS lists none in Ground Forces holdings.

RECOGNISE Launcher Turret with two blocks of six missile tubes, one each side, and a twin-barrel 30 mm 2A38M gun beside each block; 12 missiles ready.

Radar Flat rectangular search array, about 1.8 x 0.9 m, rotating on the turret roof; folds forward flat on the roof when stowed.

Radar Tracking radar on the turret front face; small electro-optical post on a pedestal on the turret top, ahead of the search radar.

Chassis Russian systems on an 8x8 KAMAZ-6560 truck; four hydraulic jacks level the vehicle to fire. Some later ones on MZKT-7930 with armoured two-piece-windshield cab.

Complex Battery of up to six combat vehicles linked by data link, with one transloader truck per two combat vehicles.

NOT TO BE CONFUSED WITH 2K22M1 Tunguska-M1 (SA-19 Grison) p. 17 Tracked chassis and 8 missiles; Pantsir-S1 in Russian service is on an 8x8 truck with 12 missiles.

Pantsir-SM-SV Same Pantsir turret family but on a tracked GM-5970-series chassis.

SEEN WITH S-400 (SA-21 Growler) battalion (one Pantsir battery per S-400 battalion (Red Star); 3 Pantsir per battalion (Armada)); Transloader vehicle (designation not confirmed) (1 per 2 combat vehicles); Maintenance, repair, alignment and spares vehicles; KAMAZ-6560 8x8 truck (1 per combat vehicle); 1L122 Garmon radar (INA; reported ringing Pantsir positions in Ukraine)

VARIANTS Pantsir-S2 INA. Modernised Pantsir for Russian forces, in service 2015; IIS lists VKS holdings as Pantsir-S1/S2. Details INA. **Pantsir-SM** New multifunction radar with active phased array; reported on a new 8x8 KAMAZ with armoured cab. KBP claim: engagement range 40 km and detection 75 km, against 20 km and 40 km for Pantsir-S1. **Pantsir-SM-SV** Tracked GM-5970-series chassis instead of a truck. For Ground and Airborne Forces; 1RS2-3 radar; 57E6M and TKB-1055 missiles; imagery with army units reported March 2025 (likely taken 2024). **Pantsir-S1 (MZKT-7930)** MZKT-7930 8x8 chassis with armoured cab and two-piece windshield; one destroyed near Mariupol Feb 2026. Same 72V6 combat module as the KAMAZ version; chassis ordered from Belarus in 2024. **Pantsir-S1M** INA. Export version of Pantsir-SM; new missile with 30 km range (claim). Oryx records one destroyed in Ukraine.

© Wladimir Kuzmin, CC BY-SA 4.0

MOBILITY 8x8 truck, fast on roads. KAMAZ chassis has limited off-road mobility and tends to roll over (high centre of gravity, narrow track). Jacked level to fire guns accurately.

Weight	14.85 t WEG 'curb weight'; basis unclear also up to 30 t depending on chassis WP-RU29
L × W × H	10.3 × 2.5 × 3.27 m
Road speed	90 km/h maximum
Road range	1,000 km maximum also 500 km WP-RU29
Fording	1.8 m
Time into action	3 min WEG 'time in action'; WEG also gives deployment time 5 min; which is time into action is not stated also about 15 min WP-RU29
Time out of action	INA
Ground pressure	INA

Range, 57E6 missile	20 km maximum, aircraft-type targets; KBP figures for export 57E6-E, claim also 12 km CSIS4
Minimum range, 57E6 missile	1.2 km KBP figures for export 57E6-E, claim also 1.5 km CSIS4
Altitude, 57E6 missile	5 m to 15 km maximum, KBP figures for export 57E6-E; 5 m only in optical mode over water, claim also 10 km CSIS4
Range, 30 mm 2A38M gun	4 km maximum, air and ground targets, claim
Minimum range, 30 mm 2A38M gun	200 m air targets, claim
Altitude, 30 mm 2A38M gun	0 to 3 km maximum, air targets, claim

Tunguska 2K22 «Тунгуска»

NATO: SA-19 Grison

TR

Tracked short-range gun and missile air defence vehicle, 30 mm guns and SAMs In service 1982

OPERATED BY motor rifle brigade, air defence missile-artillery battalion, Tunguska battery, 6 launcher vehicles per battery

[D 2016 M](#)

tank brigade, anti-aircraft missile-artillery battalion, SA-19 battery; ATP 4-161 gives this battalion to tank brigades, but the battery figure is for brigades generally, 6 per battery (generic brigade figure: RWW 'maneuver brigade', ATP fig. 4-19) [D 2024 L](#)

INDICATES A Tunguska battery in a forward position points to a manoeuvre brigade's air defence missile-artillery battalion covering its first-echelon battalions; doctrine places it in brigade air defence, not in area air defence units.

RECOGNISE Launcher 2S6M and 2S6M1 carry eight missile tubes, four each side of the turret; original 2S6 had four, two each side (APA and FM 100-2-3: eight).

Radar Search radar at turret rear, folded over the rear when travelling; tracking radar at turret front; search antenna a cylindrical parabolic section, tracker a dish.

Chassis Tracked, six road wheels per side, three return rollers, rear sprocket; driver front left, engine at rear. GM-352 chassis; GM-5975 on 2S6M1.

NOT TO BE CONFUSED WITH **Pantsir-S1** p. 16 Usually an 8x8 truck with 12 missile tubes in two blocks of six, one each side of the turret; the tracked GM-352M1E Pantsir is a rarer offer with 8 missiles. **ZSU-23-4 Shilka** Gun-only predecessor, four 23 mm barrels, no missile tubes; Tunguska has two twin 30 mm guns with missile tubes outboard and a second radar at the turret front.

Vitaliy V. Kuzmin, CC BY-SA 4.0

MOBILITY Fires guns on the move but must be stationary to fire missiles. Not amphibious (WEG); fords 1.0 m (WEG 2S6M asset, RUWIKI).

Weight, combat **34 t**
 L × W × H **7.93 × 3.24 × 4.02 m** radar up; 3.36 m radar down m

Strela-10 and Osa short-range SAM 9K35, 9K33 «Смерла-10», «Оса»

NATO: SA-13 Gopher

TR

Short-range SAM: tracked Strela-10 (optical/IR) and wheeled Osa (radar command guidance) In service 1971

OPERATED BY motor rifle brigade, air defence missile-artillery battalion, missile battery (SA-13), 6 launchers per battery [D 2024 M](#)

tank brigade, air defence missile-artillery battalion, missile battery (SA-13), 6 launchers per battery [D 2024 L](#)

air defence missile regiment, division air defence regiment (Osa-AKM, being deactivated in 2019) [D 2019 L](#)

INDICATES SA-13 in a brigade fits the missile battery of its air defence missile-artillery battalion, six launchers in doctrine; two platoons cover the artillery group. Osa-AKM fits a division air defence regiment, being withdrawn in 2019; it covers troops on the march.

RECOGNISE Launcher Strela-10: turret with four missile canisters in two pairs, range radar between them. Osa-AK/AKM: six ribbed missile containers; first Osa had four exposed missiles.

Radar Strela-10 9A35 adds Flat Box-B passive antennas on hull and turret; 9A34 has none. Osa: surveillance array folds back 90 degrees at rear, tracking group at front.

Chassis Strela-10: modified MT-LB, tracked, six equally spaced road wheels, no return rollers. Osa: BAZ-5937, 6x6 wheeled, amphibious; 4.20 m high with mast stowed.

Complex Strela-10 battery: one 9A35, three 9A34, PPRU-1M command post with Dog Ear radar. Osa battery: four launch vehicles and two reload vehicles with crane.

NOT TO BE CONFUSED WITH **9K31 Strela-1 (SA-9 Gaskin)** Four-wheeled BRDM-2 chassis; Strela-10 is on a tracked MT-LB. **2K22 Tunguska (SA-19 Grison)** p. 17 Radar-directed gun and missile hybrid; Strela-10 is visually aimed and has no cannon, only a 7.62 mm MG.

Vitaliy V. Kuzmin, CC BY-SA 4.0

MOBILITY Strela-10 is tracked and floats only with fitted buoys (M2). Osa is a wheeled amphibious 6x6 (WH-AAT-A class); it fires from short stops, not on the move.

Weight, combat **12.1 t** Strela-10
 Weight, combat **18.68 t** Osa-AKM, APA8 comparative table
 L × W × H **6.45 × 2.85 × 2.22 m** Strela-10

Nebo-M 55Ж6М «He60-M»

NATO: Tall Rack **WH-AT**

Mobile multiband air surveillance radar complex; paired low-altitude radar **Podlet-K1** In service 2012

OPERATED BY unit not identified, 4 Nebo-M and Nebo-UM combined **R 2015 L**

unit not identified, air defence and radio-technical crews with a division-level command post (MoD release; unit not named)

R 2017-09 L

INDICATES Nebo-M or Podlet-K1 indicates an Aerospace Forces radio-technical (radar) unit building the air picture, often near an S-300 or S-400 position that the radars cue. One reported Podlet-K1 site (Kherson, Jul 2022) lay over 100 km behind the front.

RECOGNISE **Antenna** RLM-M: very large VHF array of short Yagi elements, 24 x 7. RLM-D: flat L-band panel, 38 x 48 elements; outer segments fold and stow flat under clamshell doors.

Antenna Podlet-K1: one large upper phased array, two smaller back-to-back IFF arrays below it, a narrow anti-jam antenna beside it. Antenna lies lowered on the truck in travel.

Mast Nebo-M antennas raised and folded hydraulically on a mast with a compact equipment cabin at its base; small navigation antenna package at the top of each array.

Chassis Nebo-M: each module on a BAZ-6909-015 8x8 truck, the chassis of the S-400 TEL. Podlet-K1: KamAZ-6350 8x8 truck.

NOT TO BE CONFUSED WITH 55Zh6U Nebo-U Transportable, not self-propelled: six transport units and hours to deploy. RLM-M is one 8x8 truck that deploys in about 15 min.

11L19 Nebo-SVU Box-shaped T/R module enclosures on the mast and rear backlobe elements; both absent on RLM-M.

59N6E Protivnik-GE Semi-trailer mounted L-band radar; RLM-D uses a smaller antenna on a self-propelled 8x8.

Nebo-M RLM-M. Ministry of Defence of the Russian Federation, CC BY 4.0

RLM-D and KU-RLK control cabin. Ministry of Defence of the Russian Federation, CC BY 4.0

MOBILITY Self-propelled 8x8 trucks; Nebo-M can also move by rail. Each Nebo-M module has its own 100 kW generator. Hydraulic levelling and antenna deployment.

Road speed, KamAZ-6350	95 km/h maximum, base truck, Podlet-K1 carrier
Height, Podlet-K1 antenna deployed	12 m Podlet-K1, radar fully deployed
Time into action, Nebo-M	15 min Nebo-M, manufacturer cited stow and deploy time, claim
Time into action, Podlet-K1	20 min Podlet-K1, deployment or stowage, claim

Detection range, Nebo-M 600 km maximum, complex; target type, size and altitude not stated, claim

Altitude coverage, Nebo-M 600 km maximum, complex, ballistic targets implied; not stated, claim

Detection range, Podlet-K1 200 km maximum, main mode, 10-200 km; target size not stated, claim

Minimum range, Podlet-K1 10 km air targets, lower limit of stated 10-200 km detection zone, claim

96L6 all-altitude acquisition radar 96Л6 «Всевысотный

обнаружуватель»

NATO: Cheese Board **WH-AT**

3D C-band acquisition and target designation radar for S-300PM/PMU2 and S-400 SAM units In service 1997

OPERATED BY aerospace forces air defence regiment, 3rd SAM battalion, INA (photographed deployed and stowed) **O 2010-02 M**

aerospace forces air defence regiment, S-400 'battery' in Armada's usage; APA export diagram lists it as a battery component, 1 per S-400 battery (Armada, term undefined; APA lists 96L6E as a battery component without a count); S-300PMU2 count INA **R 2014 M**

INDICATES A 96L6 usually marks a nearby long-range SAM fire unit (S-300PM/PMU2 or S-400) of the Aerospace Forces, which are district-level assets. The maker also offers it to radio-technical units, so on its own it does not confirm a SAM site.

RECOGNISE **Antenna** Deployed: one flat rectangular array, slightly taller than wide, near-vertical, tilted back a little, on a rotating pedestal just behind the cab; lattice IFF array below.

Antenna, stowed Stowed: array folds forward and lies flat and horizontal over the pedestal and cab roof, giving a long, low, box-like vehicle outline.

Mast Normally no mast. Antenna post can be lifted onto a 40V6M (23.8 m) or 40V6MD lattice mast for low-level cover; the roughly 2 h fitting time is an unverified maker figure.

NOT TO BE CONFUSED WITH 76N6 Clam Shell Split antenna with a large beak-like shroud, usually raised on a 40V6M mast. A mast-mounted 96L6 shows one flat rectangular array.

64N6E / 91N6E Big Bird Janus-faced (back-to-back) space-fed array on a semi-trailer towed by an MZKT-7930 or BAZ-6403 tractor. 96L6 is a single self-propelled vehicle with one array.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Self-propelled 8x8. Single-vehicle version ready 5 min from march. Two-trailer and mast versions are semi-mobile; maker figures of 30 min to about 2 h not verified. Not amphibious. L x W x H 11.7 x 3.07 x 2.92 m WEG figure for MAZ-543 chassis; radar vehicle is MZKT-7930

Road speed	65 km/h maximum, WEG figure for MAZ-543 chassis
Road range	650 km cruising, WEG figure for MAZ-543 chassis
Fording	1.3 m WEG figure for MAZ-543 chassis

Detection range 300 km instrumented, Range band 5 to 300 km for detected targets; target size and altitude not stated, claim

Maximum target altitude 100 km All-altitude mode, aerodynamic targets, claim

Band C-band claim
Frequency 5.25 to 5.925 GHz
Elevation cover, all-altitude mode -1.5° to +20° 360° azimuth

Zoopark-1 / Zoopark-1M 1A219, 1A219M; 1A260 «3oonapk-1», «3oonapk-1M»

TR

Tracked radar that locates enemy guns, mortars, rockets and missile launchers In service 1970

OPERATED BY motor rifle brigade, fire control and artillery reconnaissance battery, radar platoon (with SNAR-10M1) [D 2016 M] tank brigade, fire control and artillery reconnaissance battery, radar platoon [D 2016 M] motor rifle division [D 2024 L]

INDICATES Doctrinally held in the radar platoon of a manoeuvre brigade's fire control battery and by artillery formations. Seeing one suggests brigade-level or higher artillery is nearby and set up for counter-battery fire.

RECOGNISE **Antenna** One flat rectangular phased-array panel. 1L219/1L219M: raised upright at rear of roof. 1L260: a much taller panel.

Mast No separate mast. Panel is lifted and turned on the roof by a lift and rotation mechanism. For travel it folds down flat along the roof.

Chassis 1L219/1L219M: low MT-LBu tracked carrier, flat sides, raised rear hull. 1L260: larger GM-5955 tracked chassis, 7 road wheels a side, boxy hull with side lockers.

Complex Radar vehicle can work alone. Support: 1I30 (1L219M) or 1I38 (1L260) maintenance vehicle and a generator; same brigade fire control battery as SNAR-10M1 and PRP-4A.

NOT TO BE CONFUSED WITH SNAR-10 / SNAR-10M1 (1RL232) battlefield surveillance radar p. 20 Same MT-LBu hull but has a turret with a PKT machine gun and a rotating parabolic radar, not a large flat panel.

ARK-1 / ARK-1M Rys (1RL239) counter-battery radar p. 19

Predecessor on the same MT-LBu hull and looks alike. No reliable distance cue found; confirm by markings or close imagery.

Boevaya mashina, CC BY-SA 3.0 de

MOBILITY Tracked, cross-country capable. Emplaces or displaces in about 5 min. Swimming ability not documented for either chassis.

Weight, 1L261 (1L260)	38.1 t
Road speed, 1L219M	62 km/h maximum
Road speed, 1L260	70 km/h maximum
Road range	500 km Both chassis

Detection range, mortar, 1L219M

20 km detection of launch position, Mortar firing position; calibre not stated

Detection range, tube artillery, 1L219M

15 km detection of launch position, Field artillery firing position

Detection range, rocket artillery, 1L219M

30 km detection of launch position, MLRS firing position

Detection range, tactical missile, 1L219M

40 km detection of launch position, Tactical missile launch position

TR

Artillery weapon-locating and fire-control radar In service 1977

OPERATED BY unit not identified, division's reconnaissance battery (WEG wording, identical to Wikipedia; Soviet-era) [R 2024 L]

INDICATES A single sighting points to an artillery reconnaissance element supporting a formation's guns. Sources give no current Russian subunit or count, so it says little about formation type.

RECOGNISE **Antenna** Parabolic antenna (JREW02); radiator in a compact radio-transparent housing plus a large receiving antenna (TOPWAR). Sizes INA.

Mast No mast described in any read source. Two emitters and a receiving antenna sit outside the hull (MILN); TOPWAR names one emitter housing. Height INA.

Chassis MT-LBu unarmed tracked carrier; electronics mostly inside the armoured hull.

Complex Single self-contained vehicle with own navigation, topographic survey, communications and power supply (ARK-1M generator). Crew 4.

NOT TO BE CONFUSED WITH 1L219 Zoopark-1 p. 19 Also MT-LB based; Zoopark-1 uses a phased array antenna, ARK-1M a parabolic antenna.

1L260 Zoopark-1M p. 19 Built on the GM-5955 tracked chassis with a phased array antenna.

1RL232 SNAR-10 p. 20 Same MT-LBu hull, parabolic antenna and near-identical size; SNAR-10 has a turret with a 762 mm PKT MG. No source arms the ARK-1M.

1K148 Yastreb-AV Four-axle BAZ-6910-025 wheeled chassis, not tracked; antenna post at the rear.

ShinePhantom, CC BY-SA 3.0

MOBILITY Tracked MT-LBu chassis; WEG says it may not be amphibious given radar weight. Forging depth INA.

Weight	15.7 t
L × W × H	7.61 × 2.85 × 2.72 m Chassis overall
Road speed	61 km/h maximum
Road range	500 km cruising

Detection range, ARK-1M vs artillery (howitzers) **8 km** unspecified, Artillery (WEG), howitzers (JREW02); target and mode not stated by WEG

Detection range, ARK-1M vs mortars **13 km** unspecified, Mortar (WEG); mode not stated

Detection range, ARK-1M vs MRL rockets **25 km** unspecified, Rocket (WEG); mode not stated

Detection range, ARK-1M vs battlefield missiles **30 km** unspecified, Missile (WEG)

Frequency band **NATO H band (6–8 GHz)**
Track capacity **3 tracks/min**

1B75 Penicillin 1B75 «Пенициллин»

WH-AT

Passive acoustic-thermal gun locator (1B75); man-portable counter-mortar radar (1L271) In service 2018

OPERATED BY self-propelled artillery battalion, battalion fire control network, conceptual ATP fig. 5-3 (1L271) [D 2024 M]
 tank division, 1L271; holding subunit not stated [O 2018-01 M]
 combined arms army, 1L271 in rocket, missile and tube artillery units [R 2017 L]

INDICATES A 1B75 points to an artillery regiment or brigade counter-battery element, as deliveries were planned for those units. A 1L271 was issued down to company and battalion level and marks forward mortar or artillery fire control.

RECOGNISE **Antenna** 1L271: transceiver on hand-turned tripod pedestal; reflector described as single-curvature parabolic or as phased array with mirror. 1B75 has no radar antenna.

Mast 1B75: stabilised head with six TV and six thermal cameras on a raising mast. Per GlobalSecurity only, the mast folds rearward onto the van roof in transit.

Chassis 1B75: KamAZ cross-country truck, 8x8 per GlobalSecurity and Wikipedia; van body and four jacks per GlobalSecurity only. 1L271: man-carried or on a UAZ-2966.

Complex 1B75: two KamAZ vehicles plus remote ground acoustic sensors, up to six vehicles. 1L271: 135 kg set of radar, processor, power unit, console and radio.

NOT TO BE CONFUSED WITH **Zoopark-1 / Zoopark-1M** p.19 Radar complex on one armoured amphibious vehicle; 1B75 is a KamAZ truck with a camera mast and no radar.

1B33M AZI-7M Older sound-ranging system, acoustic only; lacks the 1B75 thermal and TV camera mast.

Alloer, CC BY-SA 3.0, GFDL

MOBILITY 1B75 on KamAZ 8x8 truck; mast raised and ground sensors laid out at site, crew relocates daily. 1L271 man-portable (135 kg in loads) or vehicle-carried.

Weight, 1L271	135 kg complete set: radar, processor, power unit, claim
Road speed, 1B75	90 km/h maximum, KamAZ chassis, claim

TR

Tracked battlefield surveillance and artillery-adjustment radar In service 1975

OPERATED BY motor rifle brigade, fire control and artillery reconnaissance battery, radar platoon [D 2016 M]
 tank brigade, fire control and artillery reconnaissance battery, radar platoon [D 2016 M]

military district, artillery units of the tank formation stationed in the South Urals (MoD wording; formation not named) [R 2019-01 M] seen with Central Military District

military district, artillery reconnaissance subunits (SNAR-10M Panthera, deliveries by end March 2016) [R 2016-03 L] seen with Western Military District

INDICATES A SNAR-10M1 points to a maneuver brigade's fire control battery radar platoon, so an artillery-adjustment and ground-surveillance element is working for that formation. Ukraine also holds the SNAR-10, so a sighting alone is not proof of a Russian unit.

RECOGNISE **Antenna** Rectangular reflector nearly vehicle width, raised electromechanically for use; folds forward when travelling.

Mast No mast described: radar is built into the vehicle's turret, antenna on the roof (SNAR-10); on the M1 the antenna module sits on the rear roof.

Chassis MT-LB family tracked hull; the Big Fred version is a roof-mounted radar on an MT-LB.

Complex Single vehicle with its own diesel generator (M1); sources describe no separate power or command vehicle.

NOT TO BE CONFUSED WITH **MT-LBu command vehicle** MT-LBu has canvas cover extending to rear and extra radios, no folding radar reflector on roof.

PRP-4A Argus p. 36 Built on the BMP-1 infantry fighting vehicle chassis with a mast-mounted radar; SNAR-10 is on the MT-LB tractor hull.

Detection range, SNAR-10M1 radar	up to 40 km maximum, tanks and vehicles; Russian MoD figure; instrumented range 0.2-40 km, claim

Krasukha-2 / Krasukha-4 1A269; 1PA257 «Kpacuxa-2»; «Kpacuxa-4»

WH-AT

Truck radar jammers: Krasukha-2 vs S-band AEW radar; Krasukha-4 vs X/Ku-band radars In service 2011

OPERATED BY EW brigade, REB-S [counter-air] EW battalion, INA; usually one Krasukha-2 and one Krasukha-4 per brigade (reported 2022) [D 2018 H]

EW brigade, part of 1 Krasukha-4 complex (command-post container found near Makariv); Armada estimates 4 complete Krasukha systems in theatre [R 2022-03 M]

EW battalion, independent REB-S battalion of an Air and Air Defence Army (VKS); FOI infers, does not name Krasukha there [R 2018 L]

unit not identified, 1 Krasukha-4 reported hit [R 2023-11 L]

unit not identified, 1 Krasukha-2 reported [R 2018-08 L]

INDICATES *Krasukha jammers belong to EW brigades (REB-S battalions): four under the military districts, the 15th (Tambov) under the General Staff. Manoeuvre brigades have EW companies. A sighting points to an EW brigade element or a protected site such as an air base.*

RECOGNISE **Antenna** Krasukha-2: one very large solid circular dish, about twice a wheel diameter across, on a turntable at the rear; rotates 360° and tilts. Stowed look not documented.

Antenna Krasukha-4: box-shaped rotating turret on a van-body roof with three dishes, two large on the sides, one small on the front; all far smaller than the Krasukha-2 dish.

Mast Krasukha-4: telescopic mast with a small antenna head behind the turret; the second vehicle also carries a mast antenna. Krasukha-2: no tall mast in photos.

Stowed Krasukha-4: in travel position the turret is stored inside the shelter (AR); in action two hydraulic stabilisers are lowered on each side of the shelter.

Chassis Krasukha-2: BAZ-6910-022 8x8, angular flat-faced cab, axles 2+2 with a wide gap. Krasukha-4: KamAZ-6350 8x8, standard KamAZ cab-over, spare wheel behind cab.

Complex Krasukha-4: two KamAZ-6350 trucks, jammer plus command-post container vehicle. Krasukha-2: three vehicles (one source); probably procured with Moskva-1 (FOI).

NOT TO BE CONFUSED WITH 1L269 Krasukha-2 vs 1RL257 Krasukha-4 Krasukha-2: one big dish on a BAZ-6910 with angular cab. Krasukha-4: turret with three smaller dishes on a KamAZ-6350 van body.

Pelena-1 (older S-band counter-AEW jammer) Antenna is a tall curved rectangular reflector on a towed wheeled trailer (APA photos), not a solid circular dish on a self-propelled 8x8 truck.

1L267 Moskva-1 ELINT and command complex p. 22 Three KamAZ trucks (FOI: one ELINT, two command; 3G: KamAZ-6350-1335, third with a jamming control station); no Krasukha-4 style dish turret.

GT-01 Murmansk-BN HF jamming complex p. 22 Has KamAZ-6350 support trucks, but its signature is very tall extendable HF antenna masts on KamAZ-53501 trucks, not dishes.

55Zh6M Nebo-M radar modules (BAZ-6909-015) p. 18 Same heavy BAZ 8x8 family, but antennas are a flat rectangular planar array or a Yagi array, not a solid circular dish.

VARIANTS 1L269 Krasukha-2 (Krasukha-20) BAZ-6910-022 8x8 with one large solid circular dish at the rear. S-band jammer aimed mainly at AEW radars such as E-3 and E-8. Analogue equipment per ru.wikipedia. 1RL257 Krasukha-4 (Krasukha-S4) KamAZ-6350 8x8 van with a three-dish turret, plus a second KamAZ-6350 carrying the command post. X/Ku-band jammer vs fighter fire-control and ISR radars, UAVs and LEO satellites. Digital equipment per ru.wikipedia.

Krasukha-4. The Ministry of Defence of the Russian Federation, CC BY 4.0

Krasukha-2. The Ministry of Defence of the Russian Federation, CC BY 4.0

MOBILITY Heavy 8x8 trucks. Must halt and emplace to jam: Krasukha-4 needs under 20 min to emplace or displace; Krasukha-2 lowers jacks before operating.

Krasukha-4: weight	39,000 kg also 12,450 kg AR6
Krasukha-2: weight	40,000 kg BAZ-6910-022 chassis full mass; kerb mass 18 t
Krasukha-4: road speed	95 km/h maximum, KamAZ-6350 truck figure (AR)
Krasukha-2: road speed	80 km/h maximum
Krasukha-4: road range	1,000 km KamAZ-6350 truck figure (AR)
Krasukha-2: road range	1,000 km
Krasukha-4: fording	1.75 m KamAZ-6350 truck figure (AR), claim
Krasukha-2: fording	1.4 m BAZ-6910-022 chassis figure (REACH)
Krasukha-4: time into action	less than 20 min

Krasukha-2: jamming range	up to 250 km up to, air target: AEW aircraft radar; target altitude not stated
Krasukha-4: jamming range	150–300 km maximum, air and ground-based radar targets; target size and altitude not stated, claim
Krasukha-2: target band	S-band also 2.3–2.7 GHz CRFS
Krasukha-2: main targets	AEW aircraft radars (E-3 Sentry, E-8 JSTARS) air targets
Krasukha-4: operating band	8–18 GHz (X and Ku band) also 8.5–10.7 and 13.4–17.7 GHz 3G
Krasukha-4: main targets	Fighter and interceptor radars, UAVs, reconnaissance aircraft, LEO satellites air and space targets
Krasukha-4: coverage	360° azimuth; 1° to 60° elevation
Krasukha-4: output power	24 dBW (8 GHz); 23 dBW (13 GHz); 21 dBW (18 GHz)
Krasukha-4: power consumption	30 kW
Krasukha-4: continuous operation	24 h
Krasukha-2: crew	INA also 7 or 3 REACH
Krasukha-4: crew	INA also 3 AR6

SEEN WITH Krasukha-4 command-post vehicle (KamAZ-6350 with container) (1 per Krasukha-4 complex); 1L267 Moskva-1 ELINT and command complex (INA; one Moskva-1 can link up to nine Krasukha-type jammers); KamAZ-6350 8x8 truck (2 per Krasukha-4 complex); BAZ-6910-022 8x8 chassis (1 per Krasukha-2 jammer vehicle); RB-109A Bylina EW brigade command system (brigade-level EW C2, not Krasukha-specific)

Murmansk-BN «Мурманск-БН»

WH-AT

Strategic HF (3-30 MHz) communications intercept and jamming complex, multi-truck In service 2014

OPERATED BY EW brigade, Probably a company of the REB-N (anti-ground) battalion [FOI assessment] [D 2018 H](#)
 unit not identified, Radio-jamming node (y3ea paguonome); its 1st section named at the 471st (KZ), 2 complexes at the Kamchatka centre (KZ, reported Jan 2016; FOI: delivered 2014) [O 2019 H](#)

EW brigade, At least 1 complex per brigade (Armada); 2 antenna groups observed at 16th EW bde, vehicle count at 19th suggests 2 (PAS imagery, 2019) [O 2019 M](#)

INDICATES Seeing Murmansk-BN indicates an Army EW brigade (IISS lists 5; 15th under General Staff) or a fleet EW centre, with long-range HF intercept and jamming in place; it takes about 72 hours to deploy, so a raised complex marks a deliberate, fixed position.

RECOGNISE **Antenna** Wire HF antennas and mast guy lines run from the masts to the ground; from afar like a giant spider's web. Antenna field about 800 m a side. Stowed: carried on trucks.

Mast Four hydraulic telescopic masts up to 32 m, guyed. Armada: antenna trucks typically about 35 m apart across a 90-degree arc. Mast lowered for travel.

Chassis Heavy multi-axle KamAZ (or Ural) trucks with unified box bodies (kungs); some masts reported on towed trailers.

Complex Seven trucks: four mast vehicles plus generator, stowed-antenna and command post vehicles. Kola site seen with two groups of four antenna vehicles about 350 m apart.

NOT TO BE CONFUSED WITH Krasukha-2 / Krasukha-4 p. 21 Each is housed on a single truck; Murmansk-BN is spread over several trucks with tall guyed masts.

Samarkand Stationary coastal jamming complex, probably a fixed version of Murmansk-BN; not truck-mounted.

SOURCES 3G ARMADA5 B02 CRFS FOI ICDS IHS25 IZ KZ3 MIL18 PAS RG16 RG173 RWW UKRINF2 WEG21

Министерство обороны России, CC BY 4.0

MOBILITY Road-mobile truck column; needs a prepared antenna field about 800 m a side, marking and engineer work; 72 hours to deploy. Trucks up to 35 t need category E drivers.

Weight, vehicle	up to 35 t	Loaded KamAZ trucks of the complex, claim
Time into action	72 h	Normative deployment time, claim
Number of vehicles	7	Complex in travel order, claim
Time out of action	INA	

Jamming range, HF communications	5,000 km	effective (Armada's term), HF (shortwave) radio links, skywave; ship, aircraft and ground emitters, claim
Frequency band	3-30 MHz (HF)	
Power	up to 400 kW	In some operating modes (KZ); generator output (Armada), claim
Mast height	32 m	4 telescopic masts, fully raised, claim
Deployed position area	640,000 m ²	Antenna field about 800 x 800 m, claim

EW M

Moskva-1 1A267 «MockBa-1»

WH-AT

Passive ELINT and automated control of counter-air jammers and air defence cueing In service 2014

OPERATED BY EW brigade, REB-S (counter-air EW) battalion, reported [D 2018 H](#)

EW brigade, INA [ARM22 lists one Moskva-1 among five brigade systems] [R 2023-09 L](#)

unit not identified, 1 claimed destroyed [R 2022-09 L](#)

INDICATES Moskva-1 is held by Ground Forces EW brigades, four of which answer to the military districts. Seeing it suggests a brigade counter-air EW element and Krasukha-type jammers at other sites, up to nine of which one complex can task.

RECOGNISE **Antenna** No automatically raised antenna array, unlike Krasukha. The ELINT module (1L265) was withheld from press; its antenna is not described in text (INA).

Chassis KamAZ-6350 8x8 trucks with plain box bodies (kung); a Russian reporter wrote the vehicles are hard to tell from other trucks.

Complex Three KamAZ vehicles per complex: an ELINT module and control vehicles; one account names a power-station truck as the third.

Complex Deployed: the control module stands on hydraulic legs on the ground while its truck drives 30-100 m away.

NOT TO BE CONFUSED WITH 1RL257 Krasukha-4 Krasukha deploys an automatically raised antenna block; Moskva-1 vehicles show plain box bodies.

1L269 Krasukha-20 p. 21 Krasukha-20 is on the larger BAZ-6910 chassis, not KamAZ.

Other KamAZ-6350 box-body vehicles No reliable external mark in text sources; FOI says Krasukha-20 is probably procured together with Moskva-1, so Krasukha jammers nearby are the main clue.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Road and track mobile truck complex; manufacturer gives 45 min to deploy. Control module can be set down on legs apart from its truck.

Weight	12,450 kg	chassis only
L × W × H	9.3 × 2.5 × 3.25 m	chassis
Road speed	95 km/h	maximum
Road range	1,000 km	cruising

Truck-and-trailer jammer and direction finder against satcom, GPS and GSM user equipment In service 2008

OPERATED BY EW company, EW company, jamming platoon (radio, GPS, cellular, radio-controlled fuses), jamming squad, 1 (single station on RWW chart; no count stated) [D 2016 M]

EW brigade, REB-S (anti-aircraft communications and navigation) battalion [D 2018 M]

EW company, EW company of motor rifle or tank division (sources confirm the company exists; Zhitel holding not stated) [D 2018 L]
unit not identified, 25 lost in Ukraine Feb 2022 to Sep 2026 (visually confirmed) [R 2026-09 H]

EW company, EW company deployed to Ukraine, 2 in the deployed company [R 2014 L]

motor rifle brigade [R 2014 L] seen with 18th motor rifle brigade (Army Recognition claim, undated; not in WEG; AR article dated 2014 per RUSIAD footnote)

INDICATES Doctrinally one Zhitel sits in the EW company of a manoeuvre brigade, so a sighting usually points to such a formation nearby. It is also held by the REB-S battalions of district EW brigades, so it can indicate an attached higher-level EW element.

RECOGNISE **Antenna** Four active phased-array transmit antennas, one atop each trailer mast. Truck has a separate DF array: ring of about 8 vertical elements.

Mast Stowed: four telescopic masts upright at trailer corners, just above the box. Deployed: four guyed masts, raised by hand winch.

Chassis, truck Ural-4320-family or KamAZ-43114 6x6 with full-length box body; air-conditioner box at front of body above cab; DF mast at body rear. Houses all operator equipment.

Chassis, trailer Two-axle trailer carrying a tall rectangular box with the antennas and a diesel generator; outrigger jacks at the corners.

Complex In action the trailer is uncoupled and parked well away from the truck, cable-linked. May work in pairs (master and slave) or under an automated EW command post.

NOT TO BE CONFUSED WITH R-934BMV jamming station (Borisoglebsk-2) p. 23 Listed on tracked MT-LB chassis, no trailer; Zhitel is a wheeled 6x6 truck towing a four-mast antenna trailer. RB-301B Borisoglebsk-2 complex (R-330KMM, R-378BMV, R-330BMV, R-934BMV, R-325BMV) p. 23 Group of up to nine tracked MT-LB vehicles; Zhitel is a single wheeled truck plus trailer. R-934UM, R-378UM and other R-330M1P Diabazol stations p. 24 Share the Ural-43203 box-body base. Confirm Zhitel by the separate two-axle trailer with four corner masts; appearance of the others INA. RB-341V Leer-3 (KamAZ box-body truck) p. 27 KamAZ box-body truck working with Orlan-10 UAVs, no antenna trailer; Zhitel has the four-mast trailer and a DF ring mast on the body.

SEEN WITH Antenna trailer with four phased-array antennas and diesel generator (1 per station); Second R-330Zh (paired master/slave for synchronous DF) (1 when paired); R-330KMA EW command post (controls up to 20 stations); R-330M1P Diabazol automated jamming complex (with R-934UM, R-378UM, Altaets-AM); Ural-43203 6x6 (1); KamAZ-43114 6x6 (1)

VARIANTS R-330Zh on Ural-4320-family chassis Bonneted Ural cab with long nose; spare wheel on rear of box body. None reported. FOI and WEG give Ural-43203 as the standard carrier. R-330Zh on KamAZ-43114 chassis Flat-fronted KamAZ cab-over cab. Seen at Army-2015 and in Ukraine 2022. None reported.

Mil.ru (D. Abramov), CC BY 4.0

MOBILITY 6x6 truck, but the towed antenna trailer is fragile; WEG expects it near roads, not cross-country. Masts raised by hand, up to 40 min to deploy.

L × W × H	7.36 × 2.55 × 2.71 m	Truck; trailer not included (unclear in source)
Road speed	85 km/h	maximum, Truck, maximum road

WH-AT

UAV-borne cellular (GSM) jamming, phone location and fake-SMS system using Orlan-10 drones In service 2015

OPERATED BY EW brigade, Leer-3 platoon, platoon operates the complex; number per brigade INA **D 2024 H**

EW battalion, Leer-3 drone/EW company **R 2019 M**

unit not identified **R 2015 M** seen with 4th Military Base, South Ossetia
unit not identified, Leer-3 crews **R 2022-11 M** seen with Western Military District

motor rifle division, separate EW battalion **R 2022-01 M** seen with 3rd Motor Rifle Division (Vislenskaya), separate EW battalion, Belgorod oblast

unit not identified **R 2020-11 M** seen with Russian peacekeeping contingent, Nagorno-Karabakh

INDICATES A Leer-3 control truck points to an EW brigade platoon, an army EW battalion company or a division EW battalion. Expect Orlan-10 flights that jam or imitate cell networks, locate phones for artillery and send SMS within about 6 km of the drone.

RECOGNISE **Antenna** Control truck carries a command-telemetry radio antenna system for the UAVs. From photograph: small drum-shaped radome on a thin vertical pole. Size INA.

Mast From photograph: the antenna pole rises from the rear top corner of the box body; no large telescopic mast seen on the exhibited vehicle. Height INA.

Chassis KamAZ-5350 6x6 truck, closed box body with operator workstations. From photograph: bonneted cab, chamfered roof edges, side door, small windows, spare wheel on rear wall.

Complex Up to three Orlan-10 fixed-wing UAVs, catapult-launched and recovered by parachute; wingspan over 3 m.

Complex From photograph: Orlan-10 has a slim fuselage, straight wing and tail fin.

NOT TO BE CONFUSED WITH Leer-2 p. 24 Leer-2 is built on a Tigr-M 4x4 armoured car; the Leer-3 control vehicle is a KamAZ-5350 6x6 truck with a box body.

Orlan-10 Same airframe also flies artillery reconnaissance with UAV companies; the airframe alone does not show the EW role. Look for the Leer-3 control truck or cellular jamming.

Vitaly V. Kuzmin, CC BY-SA 4.0

Orlan-10 UAV, Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Control vehicle is a KamAZ-5350 6x6 truck; complex deploys in about 30 minutes. Leer-3 vehicle weight, dimensions and fording not found.

Road speed **100 km/h** maximum, KamAZ-5350 base truck at maximum permitted mass; not a Leer-3 figure, claim also 120 km/h WP-RU21

Road range **1,550 km** minimum at reference consumption, KamAZ-5350 base truck, 420 l tanks, at reference fuel consumption; not a Leer-3 figure, claim also 1,000 km WP-RU21

Time into action **30 min** whole complex, claim

Pole-21 P-340PП «Поле-21»

NA

Networked GNSS jamming posts protecting fixed sites from GNSS-guided weapons and UAVs In service 2016

OPERATED BY combined arms army, Army EW specialists; first used in an exercise with battalion tactical groups, with R-934BMV and Silok-01 (MoD via AiF) [\(O 2021-04 M\)](#)

INDICATES A post on a cell tower or fixed mount suggests a protected fixed site such as a strategic facility or command post. A single R-340RP in the field indicates a GNSS-jamming layer near that position.

RECOGNISE Antenna Transmit and receive antennas on cellular communications towers. Small antennas resembling civilian cell antennas, 1 to 3 per post (Ukrainian expert, 2023). Size: INA.

Mast Posts attach to existing cell towers or buildings, or to a stationary ground mount. Height: INA.

Chassis Also shown as a wheeled mobile unit and as a unit deployed in the field. Vehicle type: INA.

NOT TO BE CONFUSED WITH R-330Zh Zhitel p. 26 Zhitel is a vehicle-borne station; Pole-21 posts sit on towers or fixed mounts. FOI notes similarities in function. Focus.ua wrongly calls Pole-21 'Zhitel'.

MOBILITY Posts are fixed on masts or mounts. A wheeled mobile unit is also reported. Weights and dimensions: INA.

Power supply 220 V, 50 Hz; 600 W consumption WEG (Pole-21E)

Operating temperature -40 to 50 C Pole-21E per WEG

Weight INA

Jamming range, GNSS receivers (ground or air not stated) up to 25 km effective, WEG (Pole-21E); Russian press gives 25 km per jamming module for the domestic Pole-21

Jamming frequency band 1.176 to 1.602 GHz (GPS, GLONASS, Galileo, BeiDou)

Coverage area of one complex 150 km2 WEG; number of posts not stated

Output power per module 300 to 1,000 W variable max radiation pattern, single frequency; Pole-21E

SEEN WITH Jamming posts (up to 100 per complex); jamming modules (1 to 3 per post)

EW m

Infauna РБ-531Б «Инфауна»

WH-AT-A

Vehicle-mounted radio jammer and IED jammer, with smoke self-screening In service 2012

OPERATED BY unit not identified, dedicated EW units and manoeuvre reconnaissance units [D 2024 L]

EW battalion, EW battalions of the Airborne Forces (VDV) (WEG 2015); RIA 2012 and FOI say VDV EW units [R 2015 M]

unit not identified, Russian military base in Armenia: MoD release title, 27 May 2015 (via FOI); filmed at Alag'yz range, 2019 (state media)

[R 2019-04 M]

INDICATES Presence suggests a VDV or other EW subunit escorting a column or protecting a battalion-level position against radio-controlled IEDs and guided munitions. WEG 2015 places it in VDV EW battalions; no source gives counts.

RECOGNISE **Antenna** Main antenna in a domed housing on the roof, raised on a telescopic mast when deployed. Size INA. Auxiliary antenna on starboard side.

Mast Telescopic mast raises the roof antenna. Mast height INA.

Chassis Modified BTR-80 (K1Sh1), 8x8, turret removed. Middle hull larger and higher than BTR-80; four hatches at front, one door at each side centre.

Complex Starboard side carries an optoelectronic sensor and smoke grenade launchers (WEG: 6 x 81 mm in 2 x 3). No crew-served weapon.

NOT TO BE CONFUSED WITH Kushetka-B command vehicle (BTR-80 chassis) Small turret, and a long rectangular box where Infauna has a camera; a 2018 Horlivka sighting was misidentified as Infauna.

Standard BTR-80 Infauna has no turret; roof carries an antenna dome and a raised middle hull.

Иллюстрация: Pygwenko, CC BY 4.0

MOBILITY Amphibious 8x8 on BTR-80 derivative; operates on the move and escorts columns.

Weight **13,614 kg** WEG: combat weight, listed under BTR-80 chassis

L × W × H **7.65 × 2.90 × 2.46 m**

Road speed **80 km/h** maximum

Road range **600 km** maximum

Jamming range, target not stated **3 km** disruption range, WEG 'Disruption Range'; target and conditions not given

Smoke screen distance **130 m** up to, aerosol against laser and TV-guided weapons

Jamming band, communications **20-2020 MHz** frequency range as given by WEG, WEG 2015 and RWW; sub-bands not given

Output power **60 W**

Crew **3**

PMP heavy folding pontoon bridge park ПМП

WH-AT

Truck-carried folding pontoon park for 60-t floating bridges and 40-170 t rafts In service 1961

OPERATED BY motor rifle division, engineer battalion, pontoon bridge company (also in tank divisions), half set: 16 river and 2 shore links and 1 service vehicle on KrAZ-214; 6 BMK-90/150 boats per company D 1991 M

engineer-sapper brigade, pontoon bridge battalion of the army or front engineer brigade (FM 100-2-3 'Engineer Brigade, Army or Front'), one full set: 32 river and 4 shore links on KrAZ-255, 15 BMK-150 boats D 1991 M

pontoon-bridge regiment, two pontoon bridge battalions (army or front/district level), three full sets: 96 river and 12 shore links on KrAZ-255 D 1991 M

motor rifle brigade, engineer battalion, pontoon bridge company, one pontoon park; RWW calls it 'PP-61' but its figures (268 m at 60 t; 90- and 120-t bridges) match PP-91, not PMP 6 BMK boats, 7 PTS-2 D 2016 L

unit not identified, INA; Oryx lists 47 PMP(-M) river links and 3 shore links lost R 2026-09 M

INDICATES A half set (16 river links, 2 shore links, about 6 boats) matches a division engineer battalion's pontoon company. Over 100 link carriers, or three full sets, matches an army or front pontoon-bridge regiment. Either points to a planned bridged river crossing.

RECOGNISE Chassis 6x6 truck carriers: KrAZ-214, later KrAZ-255B. Ural-4320 and KamAZ-53501 carriers also seen. Separate trucks carry river links, shore links and boats.

Working equipment Roller bed on the truck; a folding jib and a winch behind the cab recover the link. Truck backs to the water, brakes hard and the link slides off the rollers.

Stowed River link: four hinged steel pontoons folded into one tall block filling the truck bed, 6.75 m long. Shore link is shorter, 5.6 m, with a ramp end.

Stowed, boats BMK-90/150 tug-motor boats ride on their own truck carriers, 6 per half set and 12 per full set; PMP-M sets have 16.

Deployed Link unfolds on hitting the water to a flat deck 6.75 m long, about 8 m wide. Links pin into a continuous steel ribbon, 6.5 m roadway, held in line by boats.

Deployed, 20-t For 20-t loads each link is split into half-links, giving a narrower 3.29 m roadway and a longer bridge.

NOT TO BE CONFUSED WITH PP-91 / PP-2005 (PP-91M) pontoon parks Larger links (7.36 x 8.28 m) on KrAZ-260G/Ural-53236 or, for PP-2005, KamAZ-63501 8x8. Truck alone does not settle it: VPK lists Ural-4320-30 for PP-91 too.

TMM-3 truck-launched scissors bridge p. 31 Same KrAZ-255B chassis, but carries a folded 10.5 m scissors span with a launching girder and folding trestle legs, not a pontoon block.

PMM-2 self-propelled ferry p. 31 Tracked, boat-bowed hull with seven road wheels and two box pontoons stacked on top; one vehicle forms a ferry.

VARIANTS PMP-M Same folding river links; shore link has a streamlined deck; hydrodynamic shield kit. Carried on KrAZ-255B; KamAZ-53501 carriers also recorded. Bridge usable in currents up to 3 m/s against 2 m/s for PMP; set lists 16 boats instead of 12. PMP on Ural-4320 carriers PMP links on Ural-4320 6x6 trucks in place of KrAZ-255B. None known; same links. PP-91 Bigger river link, 7.36 m long and 8.28 m wide, on KrAZ-260G (Ural-53236) carriers; BMK-225 boats. 60-, 90- and 120-t bridges and double-width roadway; lengths per set differ between sources [see open questions]. PP-2005 (PP-91M, PP-2005M) PP-91-type links on KamAZ-63501 8x8 carriers. Boats: BMK-MT with PP-2005M (VPK); BMK-3 seen with PP-91M (AIF, 2025). Bridges to 120 t; rafts 90-360 t (PP-91) or 90/190/380 t (PP-2005M per VPK). In a Group Centre pontoon-bridge company, 2025-02.

ZinnSoldat, CC BY-SA 4.0

MOBILITY Carriers must back to the water's edge to launch and recover links. PMP bridge limited to currents of 2 m/s, PMP-M to 3 m/s.

River link weight **6,790 kg** one river link
Shore link weight **7,252 kg** one shore (ramp) link
Time into action, bridge **7 m of bridge per minute** ideal conditions

Time out of action, per link **a few minutes** retrieval of one link by winch and jib

River link, unfolded **6.75 m long, 8 m wide**

Weight, carrier with link **INA**

Road speed **INA** maximum

Road range **INA** cruising

Fording **INA**

Bridge, full set, 60-t **227 m** maximum, 32 river + 4 shore links, 6.5 m roadway

Bridge, full set, 20-t **382 m** maximum, split half-links, 3.29 m roadway

Maximum current **2 m/s** PMP

Bridge, half set, 60-t **119 m** 16 river + 2 shore links

Bridge, half set, 20-t **191 m** 16 river + 2 shore links, split

Load capacity, bridge **60 t** full-width bridge; 20 t on split-link bridge

Bridge width **6.5 m** 60-t bridge

Rafts **40, 60, 80, 110, 170 t** 2, 3, 4, 5+1 shore, 8+1 shore links

Raft assembly, 40-t **8 min** 2 river links, working party 6

Tank speed on bridge **up to 30 km/h** tanks on 60-t bridge

PTS-4 tracked amphibious transporter and PMM-2 self-propelled amphibious ferry

TR-A

Amphibious carrier for cargo and vehicles (PTS-4); self-propelled river ferry (PMM-2) In service 2007

OPERATED BY motor rifle brigade, engineer battalion, 7 PTS-2 per engineer battalion (RWW names PTS-2, not PTS-4) **D** 2016 M

tank brigade, engineer battalion, 7 PTS-2 per engineer battalion (RWW names PTS-2, not PTS-4) **D** 2016 M

unit not identified, INA (PMM-2: held by Russian Army; no count given)

R 2024 L

INDICATES PTS-2 amphibians are a brigade engineer battalion asset in RWW, so PTS-type carriers suggest engineer river-crossing support. IIS25 lists PMM-2 without unit type; no unit is tied to PTS-4 here.

RECOGNISE **Chassis** PTS-4: tracked amphibious hull with forward armoured cab; T-80 tracks and torsion bars, T-72 engine and gearbox. Road wheel count INA.

Working equipment PTS-4: open rear cargo area, platform 8.28 x 3.3 m, one remote-controlled 12.7 mm machine gun. PMM-2: boat-like bow, PTS-2-style cab.

Stowed PMM-2: MT-T-type chassis, seven road wheels and four return rollers per WEG; two large box pontoons carried one above the other on the hull.

Deployed PMM-2: pontoons hinge out to each side, with wave deflectors and ramps; deck 10 m long, 4.2 m wide; two 5 m loading ramps; two propellers lowered aft.

NOT TO BE CONFUSED WITH PTS-2 / PTS-3 Older, on MT-T chassis with T-64 components; PTS-3 has higher sides. PTS-4 uses T-80 and T-72 units and has a more heavily armoured cab.

PMM-2 vs PTS-2 PMM-2 has similar cab and bow but carries two stacked box pontoons on top of the hull.

Aleksei Kumaev (Aleksy Kitayev), CC BY-SA 4.0

MOBILITY Amphibious tracked. PMM-2 fording 1.2 m, vertical step 2.8 m (WEG15; implausible, see open questions). PTS-4 vertical step 0.65 m, trench 2.5 m (WEG).

TR

Tank-based heavy engineer vehicle for obstacle and minefield clearing In service 1980

OPERATED BY engineer-sapper battalion, mine clearing platoon (brigade engineer battalion), 2 IMR-3M per platoon **D 2016 M** engineer-sapper brigade, 2 delivered Nov 2018, 1 more due first half 2019 (Central MD press service, state claim) **R 2018-11 L** engineer-sapper brigade, INA; listed with UR-77, BMR-3 and GMZ-3 (English Wikipedia, citing a 2023 Russian regional news item) **R 2023-06 L**

INDICATES An IMR-3M in a column suggests the mine clearing platoon of a brigade engineer battalion; its elements may join the movement support detachment (OOD) ahead of the main body to clear routes and minefield lanes. Separate engineer brigades also hold it.

RECOGNISE **Chassis** Tank chassis: T-72 for IMR-2 (six road wheels a side, torsion bar); T-90 for IMR-3M. No gun; superstructure carries a crane.

Working equipment Wide dozer blade at the front; telescopic boom with grab or bucket on a rotating superstructure where a turret would be.

Stowed Blade raised onto the hull roof; boom drawn back and turned. A KMT track-width mine plough may be fitted.

Deployed Blade works as a dozer, V-blade or grader; boom traverses 360 deg. IMR-3M has a remote 12.7 mm gun mount; IMR-2 a machine gun on the operator's cab.

NOT TO BE CONFUSED WITH BAT-2 Also a tracked bulldozer with adjustable blade and boom crane; RWW gives 7.3 m boom reach and 700 hp against about 8.4 m and 840 hp for IMR.

MTU-72 p. 31 Also a T-72 hull with turret removed; carries a bridge-launching system, not a dozer blade and crane.

Kirill Borisenko, CC BY-SA 4.0

MOBILITY Fords 1.2 m unprepared; 5 m with snorkel equipment (Russian Wikipedia). Not amphibious. Heavy: 44 to 50 t.

Weight, IMR-2	44.3 t	combat weight
Weight, IMR-3M	49.5 t	combat weight with KMT-R3 plough
L × W × H	9.55 × 3.735 × 3.68 m	
Road speed, IMR-2	50 km/h	maximum

Crew	2 (commander-operator, driver-mechanic)
Boom lifting capacity	2 t
Boom reach	8.4 m IMR-2M
Dozer capacity	200 to 250 m ³ /h IMR-2 earthmoving
Armament, IMR-3M	12.7 mm NSVT or Kord remote mount
Armament, IMR-2	7.62 mm PKT original IMR-2

SEEN WITH UR-77 mine clearing vehicle (2 per mine clearing platoon); BAT-2 combat engineer vehicle (4 per brigade engineer battalion)

VARIANTS IMR T-54/55 tank chassis; articulating dozer blade and telescoping crane.

UR-77 Meteorit YP-77 «Memeopum»

NATO: M1979

TRA

Tracked mine-clearing vehicle firing rocket-towed explosive line charges In service 1978

OPERATED BY engineer-sapper battalion, mine clearing platoon (organic engineer battalion of a maneuver brigade), 2 per platoon **D 2016 M**

engineer-sapper brigade **R 2023 L** seen with 1st Guards Engineer Brigade (Murm, MUN 11105)

INDICATES Doctrine places two per engineer mine clearing platoon, so one suggests engineers preparing a breach or route clearing. In Ukraine it has also been fired as improvised short-range artillery.

RECOGNISE **Chassis** Tracked hull derived from the 2S1 Gvozdika, itself built on MT-LB parts; driver and engine compartment front left on the 2S1.

Working equipment Turret-like superstructure with launch ramps at top rear of hull. RWW gives two launch ramps, TWZ two charges; JANSRG says three rockets.

Stowed Charges carried on board: hull holds two launchers and compartments for the line charges (UZP-77 or UZ-67).

Deployed Rocket tows a hose about 7 cm thick and 93 m long (UZP-77) across the minefield, then it is detonated; lane about 6 m wide.

NOT TO BE CONFUSED WITH 2S1 Gvozdika Same chassis; the 2S1 has a fully enclosed turret with a 122 mm howitzer, the UR-77 a launcher superstructure.

UR-67 Older predecessor on a BTR-50PK chassis.

UR-07M BMP-3 chassis, not 2S1; ordered in small numbers, not in series production as of 2024 (GSEC). Named Razgon (GSEC) or Peresortirovka (RUWIKI).

UR-83P Same line-charge role but not mounted on a vehicle chassis: towed or trailer-based.

ML.ru / Dmitry Golovko, CC BY 4.0

MOBILITY Tracked, 2S1-derived, amphibious: WEG gives 5 km/h swimming, GlobalSecurity 4.5 km/h. Fording depth and ground pressure INA. Reload after firing takes 30 to 40 minutes.

Weight, combat	15.5 t
L × W × H	8.4 × 2.8 × 3.1 m
Road speed	60 km/h
Road range	500 km

Range, UZP-77 line charge	200 to 500 m	not stated, charge launch distance, UZP-77; UZ-67 charge 200 to 350 m (WEG)
---------------------------	--------------	---

Crew	2	
Cleared lane length, UZP-77	80 to 90 m	anti-tank minefield; UZ-67 charge 75 to 80 m
Cleared lane width	up to 6 m	one line charge
Line charge length	93 m	UZP-77; UZ-67 is 83 m
Cleared lane length, ZRSchh	100 m	lane 6 m wide; charge in 6 m sections of 41 kg

SEEN WITH UZP-77 / UZ-67 line charge (2 per vehicle)

ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer ИСДМ «Земледелец»

WH-AT

Remote minelaying by 122 mm rockets (ISDM) and tracked mechanical minelaying (GMZ-3) In service 2020

OPERATED BY engineer-sapper battalion, obstacle platoon (brigade engineer battalion per RWW; division engineer battalion per WEG), 3

GMZ-3 per obstacle platoon **D 2016 M**

engineer-sapper brigade **D 2024 L**

engineer-sapper regiment **D 2024 L**

INDICATES An ISDM points to an engineer brigade or army engineer regiment remote-mining subunit preparing minefields 5–15 km out. A group of three GMZ-3 suggests a brigade engineer obstacle platoon, likely a mobile obstacle detachment.

RECOGNISE Chassis ISDM: four-axle KamAZ-6560 8x8 truck; cab armoured per Za Rulem (WEG: armour none). The transloader uses the same chassis.

Chassis GMZ-3: tracked, on the SA-4 Ganef chassis; seven road wheels, front drive sprocket, rear idler, four return rollers. Driver front left, engine to his right.

Working equipment ISDM: launcher on rear deck carrying two box containers, each of 25 tubes in five rows of five. Transloader carries a small crane (blog source).

Working equipment GMZ-3: operator compartment at rear; mines leave through ports in the rear hull plate onto a conveyor and plough. PKT MG; three 81 mm smoke launchers each side.

NOT TO BE CONFUSED WITH BM-21 Grad p. 4 Ural 6x6 truck with 40 open tubes; ISDM is an 8x8 KamAZ with two 25-tube box containers. UMZ ZiL-131 6x6 truck with six firing modules of 30 tubes (180 tubes) scattering mines 30–60 m from the truck.

Mil.ru, CC BY 4.0

MOBILITY ISDM: 8x8 truck, not amphibious, fords 1.8 m per WEG. GMZ-3: tracked, not amphibious, 28.5 t; lays surface mines at up to 16 km/h, buries at 6 km/h.

Weight, GMZ-3 **28.5 t** combat
L × W × H **10.3 × 2.5 × 3.27 m**

Road speed, ISDM **90 km/h** maximum, KamAZ-6560 chassis

Road speed, GMZ-3 **60 km/h** maximum

Range, ISDM mine rocket **15 km** maximum, cassette rocket with AP or AT mines, claim

Minimum range, ISDM mine rocket **5 km** cassette rocket with AP or AT mines, claim

Laying speed, GMZ-3 **16 km/h surface; 6 km/h buried** maximum

Range, 762 mm PKT (GMZ-3) **2,000 m** max effective, day

Rocket calibre, ISDM **122 mm** claim

R-149 command and staff vehicles P-149

WH-AT-A

Tactical command and staff vehicles with HF/VHF radios and data terminals (ESU TZ) In service 1990

OPERATED BY motor rifle regiment, R-149MA3  2022-09 M

command brigade, R-149AKSh-1  2022-03 L

motor rifle division, R-149AKSh-1  2022-03 L

INDICATES An R-149MA1 or R-149AKSh-1 suggests a brigade, regiment, division or army control-brigade command post nearby. An R-149MA3 is meant for company to squad command and was lost with motor rifle and tank regiments.

RECOGNISE Cab R-149AKSh-1: KamAZ-5350 6x6 truck cab. BTR-based R-149MA1, MA3 and BMR: no cab; commander and driver sit at front of an 8x8 armoured hull.

Body AKSh-1: van body split into electronics compartment (3 workstations) and officer compartment (5). MA1 and BMR: K1Sh1 hull, larger than BTR-80, unarmed turret.

Axles AKSh-1: three axles. BTR-based: four large tyred wheels a side; hatch/door between 2nd and 3rd wheels, upper part opens to right, lower folds down (BTR-80 base).

Details R-149MA3: WEG lists a 14.5 mm KPVT turret (BTR-80 sheet text); one lost MA3 was turretless. R-149BMR carries an ASH-4 telescopic mast, AZI NVIS HF and discone antennas.

NOT TO BE CONFUSED WITH BTR-80 APC R-149MA1 and BMR use the K1Sh1 hull, larger than BTR-80 with an unarmed turret; WEG lists the MA3 with the standard armed turret.

BMM-80 ambulance and 1V152 on K1Sh1 p. 35 WEG 2015: the Kuchetka-B/R-149BMR 'shares the same configuration as BMM medical vehicles and the 1V152/Kapustnik-B ACRV'.

Ministry of Defence of the Russian Federation, CC BY 4.0

MOBILITY BTR-80-based versions swim (WEG). R-149AKSh-1 on KamAZ-5350 is not amphibious; fords 1.75 m (WEG).

Weight, R-149MA1	15,000–15,050 kg	maximum, claim
Weight, R-149BMR	13.6 t	combat
L × W × H	7.65 × 2.9 × 2.41 m	
Road speed, BTR-based versions	80 km/h	maximum

R-145BM Chayka command and staff vehicle P-1455M «Чаўка»

WH-AT-A

Turretless radio command and staff vehicle for mobile command posts In service 1960

OPERATED BY anti-tank battalion, ACV listed as 'BTR-60PU/BRDM-2'; battery placement unclear in OCR, 5 per battalion (BTR-60PU or BRDM-2)  1991 L

artillery brigade, 1 per brigade  1994 L

unit not identified, RKhBZ (NBC protection) troops; Wikipedia names the vehicle BTR-60PU/PUM and equates BTR-60PU with R-145BM

 2022 L

INDICATES Built for radio links at mobile command posts, so it points to a command post or communications node. A Soviet-era source places it at tank, motor rifle and artillery regiment and formation HQs; the current echelon is not fixed.

RECOGNISE Cab BTR-60 hull (BTR-60PA base) with no turret; two compartments, command section forward and radio section aft.

Body Collapsible frame antenna on left side of roof; cylindrical box (TZK) on the roof; characteristic 'horns' on left and right upper edges of front armour.

Axles 8x8 wheeled, amphibious, individual torsion-bar suspension.

Details Hinged antenna leg supports on side armour upper edge, mid-length; 10 m telescopic mast and AB-1-P/30 roof generator (Jane's: BTR-60PU has roof generator, 10 m antenna).

NOT TO BE CONFUSED WITH BTR-60PU-12 (9S482) air defence command vehicle p. 37 Telescopic mast on right of front roof, generator on the turret-ring blanking plate, large stowage box on right of hull; turretless like R-145BM.

BTR-60 1V18/1V19 Unarmed turret with observation devices; R-145BM has no turret.

VargaA, CC BY-SA 4.0

MOBILITY Amphibious 8x8, light armour; swims (no fording depth given). Petrol engines.

Weight, combat	10.3 t
L × W × H	7.56 × 2.83 × 2.31 m
Road speed	80 km/h
Road range	500 km

Range, R-130M zenith antenna	75 km	HF, halted or moving, symmetrical zenith-radiation antenna
Range, R-130M dipole	350 km	HF, halted only, symmetrical dipole
Range, R-123MT 4 m whip	20 km	VHF, halted or moving
Range, R-111 3.4 m whip	35 km	VHF, halted or moving
Crew	2	
Radio fit	2 × R-111, R-123MT, R-130M, R-012M call device	

VARIANTS BTR-60PUM Not stated in source. Russian late-2000s refit of BTR-60PU with new engines adapted from the BTR-80 series.

BMP-1KSh command and staff vehicle БМП-1КШ «Помок-2»

NATO: M1978

TR

Command and staff vehicle for regimental and battalion commanders In service 1972

OPERATED BY motor rifle regiment, regimental command post, 1 in regimental HQ of a BMP-equipped motor rifle regiment (FM 100-2-3 table, OCR scrambled) [D 1991 M]

tank regiment, regimental command post, INA (FM 100-2-3 table reads 0 for the tank regiment HQ) [D 1990 M]

motor rifle regiment, 501st signal company [O 1986 L]

INDICATES A BMP-1KSh marks a regimental command post; one source also gives one per battalion. Sources describe it for motor rifle and tank regiments. Oryx records 15 Russian losses 2022-26 but names no unit.

RECOGNISE Hull BMP-1 hull: pointed nose, almost horizontal ribbed glacis, driver front left, engine louvres roof right, two bulged rear doors. KSh keeps only two roof hatches.

Armament No gun or missile rail; turret fixed; one 7.62 mm PK fired from the rear-door port. Most firing ports blocked. Tube case for mast parts on right rear.

Turret Fixed turret cap carries the telescopic antenna mast (10 m per WEG and VALKA) in place of the gun; only two roof hatches behind the turret.

Roof and rear Box-shaped generator set centre rear of hull roof; four elevatable whip antennas at rear, two each side.

Suspension BMP-1 running gear: six road wheels each side, front sprocket, rear idler, three return rollers, skirts over upper track.

NOT TO BE CONFUSED WITH BMP-1K Keeps the 73 mm gun and rotating turret; K1/K2 have a semi-telescopic antenna, K3 a 10 m mast (WEG). KSh has a fixed turret with the mast in place of the gun.

PRP-3 artillery reconnaissance vehicle Enlarged two-man turret set to the rear with a folding rectangular radar antenna.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY Amphibious, swims. Radios run on the move from an engine-driven generator; a portable generator set is used at halts (RUWK2).

Weight, combat	13 t
L × W × H	6.74 × 2.94 × 2.15 m
Road speed	65 km/h
Road range	550 km
Swimming speed	7 km/h
Fording	Amphibious, swims

Crew	3 crew plus 4 staff officers
Armament	1 x 7.62 mm PK, 2,000 rounds carried machine gun, fired through the rear-door port (RUWK2); WEG lists it as PKT

Antenna mast height	10 m AMU Hawkeye telescopic mast, raised
Radios	2 x R-111, R-123MT, R-130M

Navigation	TNA-3 gyroscopic navigation device
------------	------------------------------------

VARIANTS BMP-1KShM Extra power sources on top of the troop compartment (VALKA). MP-31 INA.

1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) 1В12 «Машинa-С»

NATO: M1974

TR-A

Tracked command, observation and fire direction vehicles, SP howitzer battalion In service 1972

OPERATED BY self-propelled artillery battalion, each battery: one 1V13 (battery FDC) and one 1V14 (battery COP); battalion HQ: one 1V15 (battalion COP) and one 1V16 (battalion FDC), 8 per battalion: 3 1V13, 3 1V14, 1 1V15, 1 1V16 [D 2016 H]

self-propelled artillery regiment, howitzer battalion with 2S19M1, at least 3 1V13 and 3 1V14 seen with one battalion [R 2021-09 L]

INDICATES A 1V13 marks a battery firing position, where it stands behind the guns. A 1V14 or 1V15 marks a battery or battalion command observation post, usually with the supported manoeuvre unit. A full set of eight serves one SP howitzer battalion.

RECOGNISE Hull High box-like MT-LBu hull with steep glacis; straight vertical rear with a single door. Three or four antennas on the hull roof.

Armament 1V13 and 1V16: 12.7 mm DShKMT machine gun on the turret. 1V14 and 1V15: 7.62 mm PKMB machine gun on a mount on the turret roof.

Turret Flat, round rotating turret shaped as a truncated cone on the rear half of the hull. On 1V14 and 1V15 it carries a laser rangefinder and optical sights.

Suspension Seven road wheels each side, no return rollers. The MT-LB it derives from has one road wheel fewer.

NOT TO BE CONFUSED WITH MT-LB Six road wheels, lower hull and a small machine-gun turret at the front over the driver's compartment instead of a turret at the rear.

ARK-1M Rys p. 19 Same MT-LBu chassis but carries a parabolic radar antenna.

Simon Q from United Kingdom, CC BY 2.0

MOBILITY Amphibious, propelled by its tracks in water.

Weight	14.8 t 1V13 and 1V14, combat weight
L × W × H	7.475 × 2.85 × 2.425 m hull
Road speed	62 km/h maximum, claim
Road range	500 km maximum, claim

Detection range, 1V14 optical reconnaissance	up to 10,000 m maximum, day
--	-----------------------------

Detection range, 1V14 optical reconnaissance (night)	up to 2,500 m maximum, night
--	------------------------------

Range, laser target illumination (1V14)	up to 7,000 m maximum, for laser-guided (corrected) munitions
Radio range	20-25 km stated, 1V13 and 1V14, vehicle radios
Radio range, R-111	220-250 km stated, 1V15 and 1V16, vehicle radio

Mobile artillery reconnaissance post on BMP-1 chassis (target location, fire adjustment) In service 1988

OPERATED BY motor rifle brigade, fire control and artillery reconnaissance battery, artillery spotting platoon [D 2016 M](#)
tank brigade, fire control and artillery reconnaissance battery, artillery spotting platoon [D 2016 L](#)
self-propelled artillery battalion, battalion fire control platoon, artillery spotter squad [D 2016 L](#)

INDICATES Doctrinally a brigade- or regiment-level artillery reconnaissance asset feeding a fire direction centre. In defence it sits behind first-echelon companies; in offence it moves with forward reconnaissance detachments up to 20 km ahead of the main body.

RECOGNISE Hull BMP-1 infantry fighting vehicle chassis, amphibious; 4 crew.

Armament One 7.62 mm PKTM machine gun and four smoke dischargers only. PRP-4M is reported with a fake gun mantlet and offset barrel, resembling a BMP-2.

Turret PRP-4/4M/4MU: retractable radar; 4M antenna mount on roof behind radar hatch; 4MU left optical flap hinged at top. Argus: WEG says must-mounted radar.

Turret sides PRP-4 family: extra fairing on right side of turret (GlobalSecurity); protected mountings either side of turret house optical devices (Wikipedia).

NOT TO BE CONFUSED WITH BMP-2 PRP-4M with a fake gun mantlet has no real 30 mm gun, only a 7.62 mm machine gun.

PRP-3 Val Earlier post; carries a 90 mm 2P130-1 launcher, which PRP-4 removed.

PRP-4 Nard Earlier base model (1V121, in service 1984); radar 1RL133-1 'Tall Mike' (Wikipedia, WEG 2015) vs WEG's '1L120-1' on Argus. No visible mark in a text source.

WH-AT-A

Air defence battery command post: fuses radar data and cues SHORAD fire units In service 1977

OPERATED BY motor rifle regiment, air defence missile-artillery battery; also regimental air defence chief's post (ARMF: PU-12 family 1977-95; ORUZH: undated PU-12M7 sheet), 1 per battery (PU-12 family)

D 1995 M

tank regiment, air defence missile-artillery battery; also regimental air defence chief's post (ARMF: PU-12 family 1977-95; ORUZH: undated PU-12M7 sheet), 1 per battery (PU-12 family)

D 1995 M

motor rifle regiment, regiment on BTR, Soviet 1980s establishment, 3 PU-12 per regiment

D 1989 L

INDICATES A PU-12-series or Ranzhir vehicle marks the command post of a short-range air defence battery (Strela-10, Tunguska, Tor, Osa, Shilka or Igla teams, up to 4-f fire units) or a regimental air defence chief's post nearby.

RECOGNISE Body BTR-80 based K1Sh1 hull: raised centre section and extra roof hatches; no turret (from photograph).

Mast Telescopic mast at hull rear, raised for work; dome-shaped head on top and a box halfway up (from photograph). WEG: passive antennas mid-mast, day/night camera on top.

Axles Four axles, 8x8, front two axles steer; single waterjet at hull rear; amphibious (BTR-80 base).

Details Roof-mounted box sensor with two lenses on a pan-tilt head (from photograph); BTR-80 side door between second and third axles.

NOT TO BE CONFUSED WITH PPRU-1M / PPRU-M1 Also on MT-LBu but carries its own 9S80 Dog Ear radar; 9S737 Ranzhir takes data from external radars such as P-19 or 9S18M1.

BTR-60PU-12 p. 34 BTR-60 hull with large stowage box on right side, generator and telescopic mast; PU-12M6/M7 use the BTR-80 hull.

Vitaly V. Kuzmin, CC BY-SA 4.0

MOBILITY PU-12M7 is amphibious on the BTR-80 base. 9S737 and 9S737M are tracked; 9S737M fords 1.0 m.

Weight, PU-12M7

13.6 t

Weight, 9S737 (WEG figure)

25000 kg WEG lists a Tata LPT 2518 truck chassis; see open_questions

Weight, 9S737M

31 t GM-5965.05 tracked chassis; RUSA2 gives 'not more than 31,000 kg'

L × W × H

7.7 × 2.9 × 2.41 m

Coordinates measurement envelope, PU-12M7 (connected radars)

up to 100 km maximum, coordinates measurement envelope from connected radars; PU-12M7 has no radar of its own, claim

Data link range, PU-12M7 by radio

up to 40 km maximum, radio link to higher and subordinate posts, claim

Data link range, PU-12M7 by field cable

up to 15 km maximum, field telephone cable, claim

Data link range, 9S737 to higher post

up to 30 km maximum, radio, claim

Barnaul-T «Барнаул-Т»

TR-A

Automated command and control set for tactical short-range air defence, battery to brigade In service 2015

OPERATED BY motor rifle brigade, brigade AD subunit; BO quotes a 'missile division' (battalion) commander

O 2021-12 M

airborne division, air defence missile regiment, one full divisional set

O 2018-06 M

airborne division, air defence missile regiment

O 2018 L

INDICATES A 9S932-1 marks a short-range air defence battery command post. Strela-10, Tor, Osa, Tunguska or MANPADS fire units it controls are likely nearby; in VDV units the kit belongs to the division's AD regiment.

RECOGNISE Antenna 1L122-1E rectangular L-band antenna array, 1.2 × 0.8 m (maker's figure), on the top rear of the hull; folded down in transit.

Mast INA: no text source describes a mast on the 9S932-1.

Chassis Modified MT-LBu tracked amphibious carrier (9S932-1).

Airborne version on BTR-MD/BTR-MDM tracked carrier.

Complex Tracked 9S932-1 at battery, 9S931 on MT-LBu, 9S931-1 on KamAZ 6x6 with trailer at brigade; 9S933 and 9S935 are portable MANPADS kits.

NOT TO BE CONFUSED WITH PPRU-1M / PPRU-M1 Also an MT-LBu AD battery command post, but carries a 9S80-series X-band radar, not the 1.2 × 0.8 m 1L122 L-band array.

1L122-2E Self-propelled Garmon radar on MT-LBu with its antenna on a lifting boom; antenna 1.9 × 1.8 m per TW, but GS gives 1.2 × 0.8 m for both versions.

9S737 Ranzhir p. 37 Older AD battery command post on MT-LBu-derived chassis; check for the 1L122 array on the rear hull.

Doomych, Public domain

MOBILITY Amphibious tracked MT-LBu; swims 5 km/h maximum.

The BTR-MDM (VDV) version is parachute-droppable.

Weight, combat

11,000 kg MT-LBu chassis figure; 9S932-1 weight INA

L × W × H

6.45 × 2.86 × 1.86 m MT-LBu chassis

Road speed

60 km/h maximum, maximum

Road range

500 km cruising, cruising

Detection range, 1L122-1E

40 km maximum (1-40 km), aircraft, helicopters, cruise missiles, UAVs at up to 700 m/s; export 1L122-1E brochure figure, claim

Minimum detection range, 1L122-1E

1 km export 1L122-1E, claim

Detection altitude, 1L122-1E

10 km maximum, export 1L122-1E; 'at least 10 km', claim

Data link range, 9S932-1

20 km communication range, stationary; 10 km on the move (9S933: 3 km / 1 km)

Radar band, 1L122-1E

L-band claim

SEEN WITH 1L122-1E Garmon (1 per 9S932-1)

Table 1. Master list of designations

Every system, vehicle, component and munition in this guide's lexicon, 809 in all, sorted by designation (digits sort as numbers). NATO reporting names and codes and US designations are set in **BLUE CAPITALS**, for example **STONE**, **SS-26** or **M1974**. NATO designations and reporting names can also be looked up in Table 1b. **(UA)** marks a type reported in Russian use in Ukraine since 2014. A **bold** page number leads to a full entry; a *grey italic* one to the entry of the system it belongs to. Look up other names and Cyrillic forms in Tables 1b and 1c.

Table 2. Unit type to equipment

Tag gives basis, date and confidence. See page 3 for explanations.

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
aerospace forces air defence regiment	96L6 all-altitude acquisition radar	3rd SAM battalion. INA (photographed deployed and stowed)	O 2010-02 M	18
	96L6 all-altitude acquisition radar	S-400 'battery' in Armada's usage; APA export diagram lists it as a battery component. 1 per S-400 battery (Armada, term undefined; APA lists 96L6E as a battery component without a count); S-300PMU2 count INA	R 2014 M	18
	Buk-M1 / Buk-M2 / Buk-M3	4 Aerospace Forces regiments with Buk-M1-2, Buk-M2 and S-300V; about 80 Buk-M1-2/Buk-M2 in Aerospace Forces holdings	R 2024 M	14
	Pantsir-S1	Pantsir vehicles deployed with each S-400 battalion (Armada); Lenta: batteries attached to S-400 regiments. 3 per S-400 battalion (Armada, 2024)	D 2024 H	16
	Pantsir-S1	Pantsir-S battery. 6 Pantsir-S delivered to Eastern MD air defence units on Kamchatka, Dec 2015; the regiment was reported due one battery	O 2015-12 M	16
	Pantsir-S1	Pantsir-S1 gun-missile battalion; each battery covers one S-400 battalion	O 2020-02 M	16
air defence missile battalion	Pantsir-S1	INA per regiment; IISS lists 9 SAM regts with Pantsir-S1 in the 45th, 4 in the 14th, 3 in the 4th and 4 in the 11th AF&AD Army	R 2024 M	16
	S-400 Triumf	IISS: 13 Aerospace Forces regts with S-400 and Pantsir-S1, plus 2 mixed with S-300	R 2024 M	12
	S-350 Vityaz	Battalion set: 1 command post 50K6A, 2-3 multifunction radars 50NGA, 12 launchers 50P6A. 12 launchers (12 missiles each) per battalion, per Russian MoD statement	R 2020 M	13
air defence missile brigade	S-400 Triumf	IISS: 2 SAM bn in Belarus; 1 SAM bty in Syria	R 2024 M	12
	Buk-M1 / Buk-M2 / Buk-M3	4 air defence missile battalions, each 3 batteries; brigade command post Polyana-D4. Buk-M1: 6 TELARs, 3 loader-launchers, 1 CP, 1 search radar per battalion; 24 TELARs per 4-battalion brigade (JIT: 53rd Bde had 3 operational battalions in 2014)	D 2016 H	14
	Buk-M1 / Buk-M2 / Buk-M3	battalion TELAR. INA per battalion; brigade had 3 operational battalions in 2014 (JIT)	O 2014-07 M	14
	Buk-M1 / Buk-M2 / Buk-M3	air defence missile battalion (brigade set of Buk-M3). Buk-M3: up to 6 TELARs or 9S36M radars and up to 12 launchers per battalion	R 2019 M	14
	Buk-M1 / Buk-M2 / Buk-M3	air defence missile battalion	R 2018 L	14
	Polyana-D4	brigade command post (combat control post MP06 and command-staff vehicle MP02)	D 2021-12 H	36
	Polyana-D4	brigade command post; vehicle captioned as 9S52M Polyana-D4M	O 2010-12 M	36
	S-300V4	air defence missile battalion (up to 4 per brigade, under Polyana-D4M1 brigade CP); battalion CP 9S457M controls up to 4 batteries; WEG: an upper-level 9S52 Polyana-D4 command post may integrate S-300V with Buk into one brigade. S-300V battery: 1 9S32, 4 9A83, 2 9A82, 1 9A84, 2 9A85; S-300V4 battery counts INA	D 2017 M	13
	S-300V4	INA. IISS lists S-300V and S-300V4 in Army holdings without a count and counts 16 SAM brigades, but does not say which hold them; Izvestia reports S-300V4 brigades under the OSK	R 2024 M	13
	Pantsir-S1	30 held by the Navy (IISS p. 187)	R 2024 M	16
air defence missile regiment	Pantsir-S1	INA (1 SAM regt with S-400 and Pantsir-S1)	R 2024 M	16
	S-400 Triumf	about 12 launchers reported at the unit site; 4 launchers and 96L6 and 92N6 radars reported destroyed	O 2025-11 M	12
	S-400 Triumf	air defence missile battalion (division). usually 2 battalions of 8 launchers each (16 per regiment); 2012 press report relating MoD press service	R 2012 M	12
	S-400 Triumf	Navy: regiments under fleet air defence divisions. IISS: 64 S-400 in Navy; 3 SAM regts: 2 Baltic Fleet, 1 Pacific Fleet (naval aviation)	R 2024 M	12
	Strela-10 and Osa short-range SAM	division air defence regiment (Osa-AKM, being deactivated in 2019)	D 2019 L	17
airborne division	Barnaul-T	air defence missile regiment. one full divisional set	O 2018-06 M	37
	Barnaul-T	air defence missile regiment	O 2018 L	37
	Leer-2	EW subunit (FOI: VDV EW companies formed from 2016). INA; MoD announced 10 complexes for VDV EW units, Dec 2012 (title only, state claim)	R 2018 M	24
anti-tank battalion	R-145BM Chayka command and staff vehicle	ACV listed as 'BTR-60PU/BRDM-2'; battery placement unclear in OCR. 5 per battalion (BTR-60PU or BRDM-2)	D 1991 L	34
army corps	Iskander-M	corps missile brigade. 1 missile brigade (12 launchers)	O 2021 M	11

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
artillery brigade	2A36 Giatsint-B 152 mm towed gun	gun battalion (152 mm) of the army artillery brigade; 2A36 or 2S5 or M-46. 36 per brigade (two 18-tube gun battalions) or 48 (four 24-tube battalions)	D 1991 M	10
	2A36 Giatsint-B 152 mm towed gun	gun brigade of the front artillery division; 2A36 or 2S7. 72 per brigade	D 1991 M	10
	2A65 Msta-B	artillery battalions (several per brigade; 2S19 or 2A65)	D 2019 M	10
	2S35 Koalitsiya-SV	self-propelled artillery battalions. INA: planned replacement of the brigade's 2S19 by 2S35, reported 2017, not carried out by late 2024	R 2019 L	8
	2S5 Giatsint-S	gun battalion (152 mm). 18 per battalion (24 in forward armies); 2S5 or 2A36 or M-46	D 1991 M	7
	2S7 Pion / 2S7M Malka	2S7 battalion (1Z17, 2017); 2S7M Malka (mil.ru via RDP18). 1 battalion; 12 x 2S7 (RUWIKI, 2019)	O 2018-04 M	9
	2S7 Pion / 2S7M Malka	12 x 2S7 each (RUWIKI, 2019)	O 2019 L	9
artillery regiment	R-145BM Chayka command and staff vehicle	1 per brigade	O 1994 L	34
	Uragan-1M	MRL battalion (Uragan 'being succeeded' by Uragan-M1; no holding confirmed)	R 2019-10 L	5
	BM-21 Grad 122 mm MRL	one Grad MRL battalion in division field artillery regiment, being replaced by Tornado-G	D 2019 M	4
combined arms army	1B75 Penicillin	1L271 in rocket, missile and tube artillery units	R 2017 L	20
	Iskander-M	army missile brigade. 1 missile brigade (12 launchers) per army	D 2024 H	11
	Iskander-M	army missile brigade. 12 launchers per brigade	O 2023 M	11
	Palantin	EW units of a Western MD combined arms army in Voronezh Oblast (army not named)	R 2019-04 M	25
	Palantin	EW troops of a Guards combined arms army, Western MD, Luga range, Leningrad Oblast (Palantin-K, Oct 2019); Feb 2022 exercise in Leningrad Oblast names only the Western MD	R 2022-02 M	25
	Pole-21	Army EW specialists; first used in an exercise with battalion tactical groups, with R-934BMV and Silok-01 (MoD via AIF)	O 2021-04 M	28
	Polyana-D4	army air defence and aviation command post (SKP PVO i aviatsii)	R 2021-12 M	36
command brigade	R-149 command and staff vehicles	R-149AKSh-1	O 2022-03 L	34
engineer-sapper battalion	IMR-2 / IMR-2M / IMR-3M combat engineer vehicle	mine clearing platoon (brigade engineer battalion). 2 IMR-3M per platoon	D 2016 M	32
	ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer	obstacle platoon (brigade engineer battalion per RWW; division engineer battalion per WEG). 3 GMZ-3 per obstacle platoon	D 2016 M	33
	TMM-3 truck-mounted scissors bridge and MTU-72 armoured vehicle-launched bridge	brigade engineer battalion; sets almost always attached to the movement support detachment (OOD). 4 TMM-3 truck-launched bridge sets per brigade engineer battalion, each laying a 10 m span; together a 42 m bridge	D 2024-02 M	31
	UR-77 Meteorit	mine clearing platoon (organic engineer battalion of a maneuver brigade). 2 per platoon	D 2016 M	32
engineer-sapper brigade	IMR-2 / IMR-2M / IMR-3M combat engineer vehicle	2 delivered Nov 2018, 1 more due first half 2019 (Central MD press service, state claim)	R 2018-11 L	32
	IMR-2 / IMR-2M / IMR-3M combat engineer vehicle	INA; listed with UR-77, BMR-3 and GMZ-3 (English Wikipedia, citing a 2023 Russian regional news item)	R 2023-06 L	32
	ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer		D 2024 L	33
	PMP heavy folding pontoon bridge park	pontoon bridge battalion of the army or front engineer brigade (FM 100-2-3 'Engineer Brigade, Army or Front'). one full set: 32 river and 4 shore links on KrAZ-255, 15 BMK-150 boats	D 1991 M	30
engineer-sapper regiment	UR-77 Meteorit		R 2023 L	32
	ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer		D 2024 L	33
	TMM-3 truck-mounted scissors bridge and MTU-72 armoured vehicle-launched bridge	engineer and bridge subunit (press-release wording)	O 2020-11 M	31
EW battalion	Infaua	EW battalions of the Airborne Forces (VDV) (WEG 2015); RIA 2012 and FOI say VDV EW units	R 2015 M	29
	Krasukha-2 / Krasukha-4	independent REB-S battalion of an Air and Air Defence Army (VKS); FOI infers, does not name Krasukha there	R 2018 L	21
	Leer-3	Leer-3 drone/EW company	R 2019 M	27

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
EW brigade	Krasukha-2 / Krasukha-4	REB-S (counter-air) EW battalion. INA; usually one Krasukha-2 and one Krasukha-4 per brigade [reported 2022]	D 2018 H	21
	Krasukha-2 / Krasukha-4	part of 1 Krasukha-4 complex (command-post container found near Makariv); Armada estimates 4 complete Krasukha systems in theatre	R 2022-03 M	21
	Leer-3	Leer-3 platoon. platoon operates the complex; number per brigade INA	D 2024 H	27
	Moskva-1	REB-S (counter-air EW) battalion, reported	D 2018 H	22
	Moskva-1	INA (ARM22 lists one Moskva-1 among five brigade systems)	R 2023-09 L	22
	Murmansk-BN	Probably a company of the REB-N (anti-ground) battalion (FOI assessment)	D 2018 H	22
	Murmansk-BN	At least 1 complex per brigade (Armada); 2 antenna groups observed at 16th EW bde, vehicle count at 19th suggests 2 (PAS imagery, 2019)	O 2019 M	22
EW company	R-330Zh Zhitel	REB-S (anti-aircraft communications and navigation) battalion	D 2018 M	26
	R-330B Mandat-B and R-934BMV	EW company of a motor rifle or tank brigade: R-330B squad in the VHF-band jamming platoon; R-934B squad (VHF aircraft) in the radio-communications jamming platoon	D 2016 H	24
	R-330Zh Zhitel	EW company, jamming platoon (radio, GPS, cellular, radio-controlled fuses), jamming squad. 1 (single station on RWW chart; no count stated)	D 2016 M	26
	R-330Zh Zhitel	EW company of motor rifle or tank division (sources confirm the company exists; Zhitel holding not stated)	D 2018 L	26
	R-330Zh Zhitel	EW company deployed to Ukraine. 2 in the deployed company	R 2014 L	26
high-power artillery brigade	2S4 Tyulpan	2S4 battalion (ATP figure 5-18 shows two 2S4 groups; subunit name not given). ATP fig. 5-18: groups of 6 and 4 2S4 (OCR uncertain); 8 reported in 45th brigade (2017)	D 2024 H	9
	2S4 Tyulpan	heavy mortar battalion (240-mm); brigade allocated to a front (Soviet RVGK)	D 1991 M	9
	2S7 Pion / 2S7M Malka	2S7 battalions (45th bde: two battalions of eight, 2017). ATP fig. 5-18: 24 x 2S7 per brigade, 8 x 2S7 battalion block (OCR uncertain); 16 reported in 45th bde, 2017	D 2024-02 H	9
	2S7 Pion / 2S7M Malka	16 x 2S7 Pion (with 8 x 2S4 Tyulpan)	O 2017-12 M	9
military district	S-400 Triumf	SAM regiments of the district's Air Force and Air Defence Army. IISS late 2024, SAM regiments listed with S-400 in each district's Air Force and Air Defence Army: 45th (Leningrad MD) 5, plus 4 listed with S-300PS, S-300PM1 and S-400; 14th (Central MD) 4; 4th (Southern MD) 3; 11th (Eastern MD) 4 listed with S-300PS and S-400, plus 1 with S-300V and S-400; 6th (Moscow MD) none (Moscow area: 5 regiments under Aerospace Defence Command). Launchers per district INA	D 2024 H	12
	SNAR-10 / SNAR-10M1 Leopard	artillery units of the tank formation stationed in the South Urals (MoD wording; formation not named)	R 2019-01 M	20
	SNAR-10 / SNAR-10M1 Leopard	artillery reconnaissance subunits (SNAR-10M Pantera, deliveries by end March 2016)	R 2016-03 L	20
missile battalion missile brigade	Iskander-M	4 launchers	O 2008 M	11
	Iskander-M	3 missile battalions of 2 batteries each; 2 launchers per battery. 12 launchers and 12 transloaders per brigade; 4 of each per battalion	D 2021 H	11
motor rifle brigade	2S19 Msta-S	two self-propelled artillery battalions, each of three batteries of 6 howitzers; ATP notes 2S3 may be held instead. 18 per battalion (6 per battery), 36 per brigade; ATP: some battalions up to 24 systems	D 2024 M	8
	Barnaul-T	brigade AD subunit; 80 quotes a 'missile division' (battalion) commander	O 2021-12 M	37
	BM-21 Grad 122 mm MRL	MRL battalion; 6 launchers per battery. 18 per battalion	D 2016 M	4
	BM-21 Grad 122 mm MRL	BTG, attached BM-21 battery. 1 battery	O 2022-04 M	4
	Borisoglebsk-2	EW company	D 2024-02 H	23
	Borisoglebsk-2	EW subunit	O 2018 M	23
	PMP heavy folding pontoon bridge park	engineer battalion, pontoon bridge company, one pontoon park; RWW calls it 'PP-61' but its figures (268 m at 60 t; 90- and 120-t bridges) match PP-91, not PMP. 6 BMK boats, 7 PTS-2	D 2016 L	30
	PRP-4A Argus / PRP-4M Deytery	fire control and artillery reconnaissance battery, artillery spotting platoon	D 2016 M	36
	PTS-4 tracked amphibious transporter and PMM-2 self-propelled amphibious ferry	engineer battalion. 7 PTS-2 per engineer battalion (RWW names PTS-2, not PTS-4)	D 2016 M	31
	R-330Zh Zhitel		R 2014 L	26
	SNAR-10 / SNAR-10M1 Leopard	fire control and artillery reconnaissance battery, radar platoon	D 2016 M	20

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
motor rifle division	Strela-10 and Osa short-range SAM	air defence missile-artillery battalion, missile battery (SA-13). 6 launchers per battery	D 2024 M	17
	Tor	air defence missile battalion, three batteries. 12 launcher vehicles per battalion (4 per battery)	D 2024 M	15
	Tor	air defence missile battalion (Tor-M2DT); brigade link by location and retraining report only	R 2019-11 L	15
	Tornado-G	brigade artillery, MRL battalion. INA for Tornado-G; it replaces the BM-21, 18 per brigade MRL battalion (RWW p.100); 18 delivered to one brigade 2012 (RBASE)	D 2019 M	4
	Tornado-G	18	O 2012-04 M	4
	Tunguska	air defence missile-artillery battalion, Tunguska battery. 6 launcher vehicles per battery	D 2016 M	17
	Zoopark-1 / Zoopark-1M	fire control and artillery reconnaissance battery, radar platoon (with SNAR-10M1)	D 2016 M	19
	Borisoglebsk-2	separate EW battalion	O 2022-01 M	23
	Leer-3	separate EW battalion	R 2022-01 M	27
	PMP heavy folding pontoon bridge park	engineer battalion, pontoon bridge company (also in tank divisions). half set: 16 river and 2 shore links and 1 service vehicle on KrAZ-214; 6 BMK-90/150 boats per company	D 1991 M	30
motor rifle regiment	R-149 command and staff vehicles	R-149AKSh-1	O 2022-03 L	34
	Tor	air defence missile regiment. 16 per regiment (4 batteries of 4, bmpd); ATP: two battalions; ru.wikipedia: Tor-M2 'divisional' set of 3 batteries, 12 vehicles	D 2024 H	15
	Tor	air defence missile regiment. one regimental set of Tor-M2 (16 combat vehicles)	O 2017-11 M	15
	Tornado-G	artillery regiment, MRL battalion (replacing Grad battalion)	D 2019 H	4
	Zoopark-1 / Zoopark-1M		D 2024 L	19
	BM-21 Grad 122 mm MRL	BTG, attached MRL element. 3 in one BTG	O 2022-04 M	4
	BMP-1KSh command and staff vehicle	regimental command post. 1 in regimental HQ of a BMP-equipped motor rifle regiment (FM 100-2-3 table, OCR scrambled)	D 1991 M	35
	BMP-1KSh command and staff vehicle	501st signal company	O 1986 L	35
	PU-12M7	air defence missile-artillery battery; also regimental air defence chief's post (ARMF: PU-12 family 1977-95; ORUZH: undated PU-12M7 sheet). 1 per battery (PU-12 family)	D 1995 M	37
	PU-12M7	regiment on BTR, Soviet 1980s establishment. 3 PU-12 per regiment	D 1989 L	37
ponton-bridge regiment	R-149 command and staff vehicles	R-149MA3	O 2022-09 M	34
	PMP heavy folding pontoon bridge park	two pontoon bridge battalions (army or front/district level). three full sets: 96 river and 12 shore links on KrAZ-255	D 1991 M	30
	RKhBZ brigade	flamethrower battalion of 3 batteries, each 6 BM-1 and 6 T2M-T; RWW places these battalions in NBC defence brigades and regiments and does not state the echelon. 18 per battalion (6 per battery)	D 2016 M	7
	TOS-1A Solntsepek	TOS battalion of 3 companies of 6 launchers (ATP para 5-146). 18 per battalion	D 2024 M	7
rocket artillery brigade	BM-27 Uragan	rocket launcher battalions. 54 per brigade (3 battalions of 18)	D 1991 M	5
	BM-30 Smerch	three groups of 4 x 9A52-2 in ATP fig. 5-16; whether each group is a battalion or a battery is not readable from the text. 12 x 9A52-2 shown in ATP fig. 5-16 (3 groups of 4)	D 2024 M	6
rocket artillery regiment self-propelled artillery battalion	BM-30 Smerch	7 delivered April 2017, 5 more announced	O 2017-04 M	6
	BM-30 Smerch		O 2026-09 M	6
	BM-27 Uragan	three rocket launcher battalions. 54 per regiment (3 battalions of 18)	D 1991 M	5
	1B75 Penicillin	battalion fire control network, conceptual ATP fig. 5-3 (1L271)	D 2024 M	20
	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16)	each battery: one 1V13 (battery FDC) and one 1V14 (battery COP); battalion HQ: one 1V15 (battalion COP) and one 1V16 (battalion FDC). 8 per battalion: 3 1V13, 3 1V14, 1 1V15, 1 1V16	D 2016 H	35
	2S35 Koalitsiya-SV	self-propelled howitzer battery. 6 per battery, 18 per battalion	D 2016 M	8
	PRP-4A Argus / PRP-4M Deytery	battalion fire control platoon, artillery spotter squad	D 2016 L	36
	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16)	howitzer battalion with 2S19M1. at least 3 1V13 and 3 1V14 seen with one battalion	R 2021-09 L	35
	2S35 Koalitsiya-SV	8 2S35 on troop trials	R 2020-05 M	8
	BM-27 Uragan	Uragan rocket artillery battalion. 8 per battalion	R 2017-12 M	5

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
tank army	Uragan-1M	rocket artillery battalion (planned replacement for 9K57 Uragan, MoD statement; no holding confirmed)	R 2017-12 L	5
	Iskander-M	army missile brigade. 1 missile brigade (12 launchers)	O 2021 M	11
tank brigade	2S19 Msta-S	two howitzer (self-propelled artillery) battalions, three batteries of 6. 18 per battalion, 36 per brigade	D 2016 M	8
	Borisoglebsk-2	EW company	D 2024-02 H	23
	PRP-4A Argus / PRP-4M Deytery	fire control and artillery reconnaissance battery, artillery spotting platoon	D 2016 L	36
	PTS-4 tracked amphibious transporter and PMM-2 self-propelled amphibious ferry	engineer battalion. 7 PTS-2 per engineer battalion (RWW names PTS-2, not PTS-4)	D 2016 M	31
	SNAR-10 / SNAR-10M1 Leopard	fire control and artillery reconnaissance battery, radar platoon	D 2016 M	20
	Strela-10 and Osa short-range SAM	air defence missile-artillery battalion, missile battery (SA-13). 6 launchers per battery	D 2024 L	17
	Tor	air defence missile battalion, three batteries. 12 launcher vehicles per battalion (4 per battery)	D 2024 M	15
	Tunguska	anti-aircraft missile-artillery battalion, SA-19 battery; ATP 4-161 gives this battalion to tank brigades, but the battery figure is for brigades generally. 6 per battery (generic brigade figure: RWW 'maneuver brigade', ATP fig. 4-19)	D 2024 L	17
tank division	Zoopark-1 / Zoopark-1M	fire control and artillery reconnaissance battery, radar platoon	D 2016 M	19
	1B75 Penicillin	1L271; holding subunit not stated	O 2018-01 M	20
	Tor	air defence missile regiment. one regimental set of Tor-M2 (16 combat vehicles)	O 2017-03 M	15
tank regiment	Tornado-G	artillery regiment, MRL battalion	D 2019 H	4
	BMP-1KSh command and staff vehicle	regimental command post. INA (FM 100-2-3 table reads 0 for the tank regiment HQ)	D 1990 M	35
	PU-12M7	air defence missile-artillery battery; also regimental air defence chief's post (ARMF: PU-12 family 1977-95; ORUZH: undated PU-12M7 sheet). 1 per battery (PU-12 family)	D 1995 M	37
unit not identified	2A36 Giatshint-B 152 mm towed gun	IIS estimate: 150 in service, 350 in store (Ground Forces total)	R 2024-12 M	10
	2A36 Giatshint-B 152 mm towed gun	IIS estimate: 50 across Naval Infantry; holding unit not stated	R 2024-12 L	10
	2A65 Msta-B	Naval Infantry artillery; brigade not named. 50 (IIS 2024 figures)	R 2024 M	10
	2A65 Msta-B	Russian deployment in Syria; unit not named. 12 (IIS 2024 figures)	R 2024 M	10
	2S5 Giatshint-S	Airborne Forces artillery; unit not named. 18 (IIS 2024 figures)	R 2024 M	7
	ARK-1M Rys	division's reconnaissance battery (WEG wording, identical to Wikipedia; Soviet-era)	R 2024 L	19
	Borisoglebsk-2	EW units	O 2018 M	23
	Borisoglebsk-2		O 2022-03 L	23
	Infaua	dedicated EW units and manoeuvre reconnaissance units	D 2024 L	29
	Infaua	Russian military base in Armenia: MoD release title, 27 May 2015 (via FOI); filmed at Alagyaz range, 2019 (state media)	R 2019-04 M	29
	Krasukha-2 / Krasukha-4	1 Krasukha-4 reported hit	R 2023-11 L	21
	Krasukha-2 / Krasukha-4	1 Krasukha-2 reported	R 2018-08 L	21
	Leer-2	Ground Forces EW units ('possibly' in FOI; state media: Southern MD column Mar 2018)	R 2018 M	24
	Leer-2	Position 17 km behind line of contact, Novoluhanske, Donetsk region. 1 vehicle	R 2023-11 M	24
	Leer-2	Navy EW centres	R 2018 L	24
	Leer-3		R 2015 M	27
	Leer-3	Leer-3 crews	R 2022-11 M	27
	Leer-3		R 2020-11 M	27
	Moskva-1	1 claimed destroyed	R 2022-09 L	22
	Murmansk-BN	Radio-jamming node (yзел пагуономех); its 1st section named at the 471st (KZ). 2 complexes at the Kamchatka centre (KZ, reported Jan 2016; FOI: delivered 2014)	O 2019 H	22
	Nebo-M	4 Nebo-M and Nebo-UM combined	R 2015 L	18
	Nebo-M	air defence and radio-technical crews with a division-level command post (MoD release; unit not named)	R 2017-09 L	18
	Palantin	EW subunits of the Eastern MD in Zabaykalsky Krai (planned deliveries by end 2020)	R 2020-07 L	25

UNIT TYPE	EQUIPMENT	HOLDING SUBUNIT AND NUMBER	TAG	PAGE
	PMP heavy folding pontoon bridge park	INA; Oryx lists 47 PMP(-M) river links and 3 shore links lost	R 2026-09 M	30
	PTS-4 tracked amphibious transporter and PMM-2 self-propelled amphibious ferry	INA (PMM-2 held by Russian Army; no count given)	R 2024 L	31
	R-145BM Chayka command and staff vehicle	RKhBZ (NBC protection) troops; Wikipedia names the vehicle BTR-60PU/PUM and equates BTR-60PU with R-145BM	R 2022 L	34
	R-330B Mandat-B and R-934BMV	R-934B (2024), Borisoglebsk-2 R-934 station (2023-11) and R-934BMV (2023-10, 2024-11, 2025-04) reported hit by Ukrainian units; no Russian holding unit named	R 2025 M	24
	R-330Zh Zhitel	25 lost in Ukraine Feb 2022 to Sep 2026 (visually confirmed)	R 2026-09 H	26
	S-350 Vityaz	training centre of the Anti-aircraft Missile Forces, Zhukov Military Academy of Aerospace Defence. first S-350 set (crews and instructors training)	R 2020-02 M	13

Table 3a. Reach of indirect fire

Guns, howitzers, mortars and rocket launchers, including mine-laying rockets. Practical rows give observed employment ranges.				
SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	TERM	PAGE
BM-30 Smerch 9M544 and 9M549 guided Tornado-S guided cluster rockets, inertial and GLONASS; Tornado-S guided rockets; crew statement	120 km	20–40 km	maximum (claim), minimum (claim)	6
CEP 5–10 m (inertial and GLONASS; official claim)				
Uragan-1M 9M544 guided 300 mm 9M544 guided rocket; claim in Russian press (ZR gives 120 km as the system maximum without naming the rocket)	120 km		claimed	5
BM-30 Smerch Employment range, Tornado-S guided rockets against a command post (2026–08) and a fortified strongpoint (2026–09); MoD figures via state media	about 100 km		practical (claim)	6
BM-30 Smerch 9M528 HE-frag unguided extended-range rocket, separable HE-frag warhead	90 km		maximum (claim)	6
2S35 Koalitsiya-SV 2S35 guided or extended-range shell precision-guided or rocket-assisted projectile; munition not named	80 km		maximum (claim)	8
BM-30 Smerch 9M55K cluster unguided, range-corrected rocket with fragmentation submunitions	70 km	20 km	maximum, minimum	6
CEP 150 m (inertial range and attitude correction, no terminal guidance; also given for 9M528)				
BM-30 Smerch 9M55F HE-frag unguided, separable HE-frag warhead	70 km	20 km	maximum, minimum	6
BM-30 Smerch Employment range, Smerch unguided rockets, Ukraine 2022, used at or near maximum range	35–70 km		practical	6
Uragan-1M 9M55F HE-frag 300 mm 9M55F HE-frag rocket with trajectory correction	70 km	20 km	maximum, minimum	5
BM-27 Uragan Employment range, observed 9K57 and 9K58 Smerch together, Donbas, May–June 2022; RUSI does not separate the two	35–70 km		practical	5
2S7 Pion / 2S7M Malka HE rocket-assisted RAP projectile, 103 kg	47.5 km		maximum	9
2S35 Koalitsiya-SV 2S35 standard HE-frag standard (unassisted) rounds	40 km		maximum	8
BM-21 Grad 122 mm MRL 9M521 HE-frag 9M521 HE-frag, export round for 9K51M Tornado-G; in 9K51 only with a manual electronic-fuze setter (RUWPI); not adopted by the Russian Army (MISSIL)	40 km	15 km	maximum (claim), minimum (claim)	4
Tornado-G 9M521 HE-frag 9M521 extended-range HE-frag rocket; attribution to 9M521 from RUWIKI (Karpenko), WEG, ZR and WWW1 give 40 km as system maximum	40 km		maximum	4
2S7 Pion / 2S7M Malka HE-frag Conventional HE-frag, 110 kg projectile	37.5 km		maximum	9
Tornado-G 9M522 HE-frag 9M522 rocket, separable HE-frag warhead	37.5 km		maximum	4
2S19 Msta-S rocket-assisted HE rocket-assisted projectile (HERA/RAP), type not named	36 km		range	8
Uragan-1M 9M27F HE-frag 220 mm 9M27F unguided HE-frag rocket	35 km	10 km	maximum effective, minimum effective	5
Uragan-1M 9M27K cluster 220 mm 9M27K rocket, 30 9N210 fragmentation submunitions	35 km		maximum effective	5
BM-27 Uragan 9M27F HE-frag 9M27F HE-frag rocket	35 km	10 km	maximum, minimum	5
BM-27 Uragan 9M27K cluster 9M27K rocket, 30 9N210 HE-frag submunitions	35 km	10 km	maximum, minimum	5
BM-27 Uragan 9M27K2 AT mines 9M27K2 rocket, 24 PTM-1 anti-tank mines	35 km	10 km	maximum, minimum	5
BM-27 Uragan 9M27K3 AP mines 9M27K3 rocket, PFM-1 anti-personnel mines	35 km	10 km	maximum, minimum	5
2A36 Giatsint-B 152 mm towed gun rocket-assisted 3V0F41 active-rocket projectile 30F30	33.5 km		maximum	10
2S5 Giatsint-S rocket-assisted HE-frag 30F30 rocket-assisted HE-frag	33 km		maximum	7
2S5 Giatsint-S HE-frag 30F59 HE-frag 30F59, improved aerodynamic shape, full charge	30.5 km		maximum	7
2A65 Msta-B OF61 HE-frag base bleed OF61 (30F61) HE-frag with base-bleed gas generator, round 3V0F91	29 km		maximum (claim)	10
2S19 Msta-S HE-frag base bleed 30F61 HE-frag base bleed (round 3V0F91)	29 km		maximum	8

SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	TERM	PAGE
2A36 Giatsint-B 152 mm towed gun HE-frag 3VOF39 HE-frag 3OF29, full charge; ammunition not stated; listed with HE-frag maximum	28.5 km	8.6 km	maximum, minimum	10
2S5 Giatsint-S HE-frag 3OF29 HE-frag 3OF29, full charge; HE-frag, indirect fire	28.4 km	8,600 m	maximum, minimum	7
2A65 Msta-B OF45 HE-frag OF45 (3OF45) HE-frag projectile; OF45 HE-frag projectile	24.7 km	6.5 km	maximum (claim), minimum (claim)	10
2S19 Msta-S HE-frag 3OF45 (OF-45) HE-frag, full charge	24.7 km		maximum	8
2S35 Koalitsiya-SV 2S43 HE-frag 2A64 gun; munition not stated by WEG or WPMALRU (Rostec: HE-frag more than 24 km)	24.5 km		maximum	8
2S5 Giatsint-S HE-frag 3OF29 reduced charge HE-frag 3OF29 with reduced charge 4Zh48	21.5 km		maximum	7
BM-21 Grad 122 mm MRL 9M22U HE-frag 9M22U (M-21OF) HE-fragmentation rocket	20.4 km	5 km	maximum, minimum	4
Tornado-G 9M22U HE-frag legacy Grad 9M22U HE-frag rocket	20.4 km	5 km	maximum effective, minimum effective	4
2S5 Giatsint-S Krasnopol guided 3OF39 laser-guided HE-frag Krasnopol	20 km		maximum	7
2S19 Msta-S guided Krasnopol laser-guided projectile; laser designation by an observer required	20 km		maximum	8
Tornado-G 9M538 HE-frag 9M538 rocket, enhanced monobloc HE-frag warhead	20 km		maximum (claim)	4
Tornado-G 9M539 HE-frag 9M539 rocket, separable HE-frag warhead; Tecmash statement at IDEX 2019; 9M539 rocket; Tecmash statement at IDEX 2019	20 km	5 km	maximum (claim), minimum (claim)	4
Tornado-G 9M541 cluster 9M541 rocket, cluster warhead with HEAT-frag submunitions	20 km		maximum	4
2S4 Tyulpan 308 rocket-assisted cluster mine cluster mine, 14 submunitions	19.3 km	7.1 km	maximum, minimum	9
2S4 Tyulpan Sayda incendiary rocket-assisted mine incendiary (napalm) rocket-assisted mine; incendiary rocket-assisted mine	19 km	0.7 km	maximum, minimum	9
2S4 Tyulpan 3F2 rocket-assisted HE mine 228 kg rocket-assisted HE mine; WEG and GS do not name the round, 3F2 per RUWIKI	18 km	0.8 km	maximum, minimum	9
BM-21 Grad 122 mm MRL 9M28F HE-frag 9M28F HE-fragmentation rocket	15 km	1.5 km	maximum, minimum effective	4
Tornado-G 9M28F HE-frag legacy Grad 9M28F HE-frag rocket	15 km	1.5 km	maximum effective, minimum effective	4
ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer ISDM mine rocket cassette rocket with AP or AT mines	15 km	5 km	maximum (claim), minimum (claim)	33
BM-27 Uragan 9M51 thermobaric 9M51 thermobaric rocket	13 km	5 km	maximum, minimum	5
2S4 Tyulpan 53-F-864 HE mine HE mine 130.7 kg, full charge; HE mine, smallest charge	9.65 km	0.8 km	maximum, minimum	9
2S4 Tyulpan Smel'chak-M laser-guided mine laser-guided mine, 134 kg	9.5 km	0.9 km	maximum, minimum	9
2S4 Tyulpan 3FS Smel'chak laser-guided mine laser-guided mine, target designated by 1D15 from 0.2-5 km CEP 80-90% within a 2-3 m circle [semi-active laser homing, target lit in final 400-800 m of flight]	9.2 km	3.6 km	maximum, minimum	9
TOS-1A Solntsepek thermobaric rocket MO.1.01.04M thermobaric rocket, 3.7 m, 217 kg	6,000 m		maximum	7
TOS-1A Solntsepek incendiary rocket MO.1.01.04M.OP incendiary rocket, 3.7 m, 204 kg	6,000 m		maximum effective	7
TOS-1A Solntsepek original short rocket MO.1.01.04 thermobaric rocket, 3.3 m, 173 kg, fired from TOS-1A	2,700 m		maximum	7
TOS-1A Solntsepek minimum range MO.1.01.04M rocket		600 m	minimum	7

Table 3b. Reach of long-range missiles and one-way attack drones

Ballistic and cruise missiles and one-way attack drones. CEP, where known, is printed under the munition.				
SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	TERM	PAGE
Iskander-M 9M723 ballistic missile 9M723, domestic Iskander-M; From the MIS Iskander-E (export) data table, max 280 km; domestic 9M723 minimum not confirmed CEP 10 to 30 m (With electro-optical terminal seeker)	up to 500 km	50 km	maximum, minimum	11
Iskander-M 9M728 (R-500) cruise missile 9M728 cruise missile, Iskander-K	500 km		official maximum (claim)	11

Table 3c. Reach of direct fire

Guns, cannons, machine guns and grenade launchers, smallest calibre first, with the vehicles that carry them. The headline range follows the manufacturer, then WEG, then other sources; 'Sources' gives the spread where they disagree. Line charges are in the engineering table.

WEAPON, TARGET AND AMMUNITION	TERM	RANGE	SOURCES
PKT 7.62 mm vehicle machine gun Carried by, e.g.: T-62M, T-62MV, T-72A, T-72B, T-72B3, T-72B3M, T-80BV, T-80U, T-80BVM, T-90, T-90A, T-90M, T-14, BMPT, BMP-1, BMP-2, BMP-3, BMD-1, BMD-2, BMD-3, BMD-4, BMD-4M, BTR-D, BTR-60PB, BTR-70, BTR-80, BTR-80A, BTR-82, BTR-82A, BTR-82AM, BRDM-2, BRM-1K, BRM-3K, MT-LB, GAZ-3937 Vodnik, ZS3, ZS3M Akatsiya, ZS3 Giatint-S (7), ZS34 Khosta, ZS25 Sprut-SD, 9K35 Strela-10 (17), SNAR-10 (20), PRP-4M (36), GMZ-3			
ground. ball and API (57-N-323S, 7BZ-3)	effective	1,500 m (disputed)	1,000 to 2,000 m
ground. ball and API (57-N-323S, 7BZ-3)	maximum	4,000 m	3,800 to 4,000 m
DShKM 12.7 mm heavy machine gun; anti-aircraft gun on older tanks Carried by, e.g.: T-62M, T-62MV, T-55A			
ground. API (B-32), API-T (BZT-44)	effective	2,000 m	2,000 to 3,500 m
air. API (B-32), API-T (BZT-44)	effective	1,000 m	
ground. API (B-32)	maximum	7,850 m	2,500 to 7,850 m
Kord 6P49 12.7 mm heavy machine gun, vehicle version of the Kord Carried by, e.g.: T-72B3 (2016 standard), T-90 (late production), T-90M, T-14, ZS35 Koalitsiya-SV (8), MT-LBVMK, GAZ-3937 Vodnik, Tigr, Tigr-M			
ground, personnel, light armour. B-32 API, BZT-44 API-T	effective	2,000 m	
air. B-32 API, BZT-44 API-T	effective	1,000 m (disputed)	1,000 to 1,500 m
ground. B-32 API	maximum	7,850 m	6,000 to 7,850 m
NSVT 12.7 mm heavy machine gun, vehicle version of the NSV Carried by, e.g.: T-72A, T-72B, T-72B3 (early), T-80BV, T-80U, T-90 (early production), T-62M (some), ZS19 Msta-S (8), BREM-1, MT-LBVM			
ground. API (B-32), API-T (BZT-44)	effective	2,000 m	
air. API (B-32), API-T (BZT-44)	effective	1,000 m (disputed)	1,000 to 1,500 m
ground. API (B-32)	maximum	7,850 m	2,000 to 7,850 m
KPVT 14.5 mm heavy machine gun, vehicle version of the KPV Carried by, e.g.: BTR-60PB, BTR-70, BTR-80, BTR-82, BRDM-2, MT-LBM 6MA (Object 6MA), GAZ-3937 Vodnik			
ground, light armour. API, API-T (B-32, BZT)	effective	2,000 m	
air. API, API-T (B-32, BZT)	effective	1,500 m	1,000 to 1,500 m
ground. 14.5 mm (not specified)	maximum	9,000 m	
2A14 23 mm automatic cannon, twin mount ZU-23-2 Carried by, e.g.: Ural-4320, Ural-43206 (truck-mounted ZU-23-2), KamAZ trucks (truck-mounted ZU-23-2), MT-LB, MT-LBM 6MA4, BTR-ZD Skrezhet			
ground. BZT, OFZ	effective	2,500 m	2,000 to 2,500 m
air. BZT, OFZ	effective	2,500 m	
2A38M 30 mm twin-barrel anti-aircraft automatic cannon Carried by: ZS6M, ZS6M1 Tunguska-M, -M1 (17), Pantsir-S1, Pantsir-SM (96K6) (16)			
air. HE-I, AP-T	effective	4,000 m	2,000 to 4,000 m
ground	maximum	2,000 m	
2A42 30 mm automatic cannon Carried by, e.g.: BMP-2, BMP-2D, BMP-2M Berezhok, BMD-2, BMD-3, BTR-90, BTR-82AT, BMPT, BMPT-72, Ka-52, Mi-28N, Mi-28NM, Ka-29, T-15, Kurganets-25, VPK-7829 Bumerang			
light armour. armour-piercing (BT, APDS)	effective	1,500 m	1,500 to 2,000 m
personnel. HE (OFZ, OT)	effective	4,000 m	
air. HE	effective	2,000 m	2,000 to 4,000 m
2A72 30 mm automatic cannon Carried by, e.g.: BMP-3, BMP-3M, BMD-4, BMD-4M, BTR-80A, BTR-82A, BTR-82AM, BRM-3K Rys, BTR-90M, MT-LBM 6MB, BMP-1AM Basurmanin, GAZ Vodnik with BPPU, Uran-9			
light armour	effective	1,500 m	1,500 to 2,000 m
personnel. HE	effective	4,000 m	2,000 to 4,000 m
air. HE	effective	4,000 m (disputed)	1,500 to 4,000 m
AGS-17 30 mm automatic grenade launcher Carried by, e.g.: BMPT (Terminator), BMD-3, Mi-24 (Hind), Mi-8T, LuAZ-967M			
personnel, ground. Frag-HE VOG-17M	effective	1,200 m	800 to 1,730 m
personnel, ground. Frag-HE VOG-17M	maximum	1,730 m	
personnel, ground. Frag-HE GPD-30 (extended range)	maximum	2,100 m	

WEAPON, TARGET AND AMMUNITION	TERM	RANGE	SOURCES
AGS-30 30 mm automatic grenade launcher Carried by, e.g.: BMP-2M Berezhok			
personnel, ground. Frag-HE VOG-17M, VOG-30	maximum	1,700 m	
personnel, ground. Frag-HE GPD-30 [extended range]	maximum	2,100 m	2,100 to 2,200 m
57 mm gun of AU-220M Baikal (2A91 or 2A90, disputed) 57 mm automatic gun in AU-220M remote weapon station Carried by, e.g.: BMP-3 'Derivatsiya' (with AU-220M), BRM-3K with AU-220M, 2S38 Derivatsiya-PVO			
ground	effective	3,000 m	
air	effective	7,500 m	6,000 to 7,500 m
ground	maximum	more than 14,000 m	12,000 to 14,500 m
2A28 73 mm low-pressure smoothbore gun Carried by: BMP-1, BMP-1P, BRM-1K, BMD-1, BMD-1P, Improvised towed mount			
armour. HEAT-FS PG-15V	effective	1,300 m	500 to 1,300 m
armour. HEAT-FS PG-15V	maximum	1,300 m	
ground. Frag-HE OG-15V	maximum	4,400 m	4,400 to 4,500 m
SPG-9 73 mm recoilless gun Carried by, e.g.: UAZ-469			
armour. HEAT PG-9VS (PG-9V)	effective	1,300 m	800 to 1,300 m
armour. tandem HEAT PG-9VNT	effective	1,000 m	700 to 1,000 m
personnel, ground. Frag-HE OG-9VM1	maximum	4,500 m	
2A70 100 mm rifled gun-launcher Carried by, e.g.: BMP-3, BMP-3M, BMP-3K, BMP-3F, BMD-4M, BMD-4			
ground. HE-Frag 3UOF17 (3OF32)	effective	4,000 m	
air. HE-Frag	effective	4,000 m	
ground. HE-Frag 3UOF19 (3OF70)	maximum	6,500 m	6,500 to 7,000 m
D-10T2S 100 mm rifled tank gun of the T-54B/T-55, manually loaded Carried by, e.g.: T-55, T-55A, T-55AM, T-55AMV			
armour. APFSDS (BM-412M, BM-25 type)	effective	2,000-2,500 m	
armour. HEAT (BK-17)	effective	1,000 m	
ground. HE-Frag (OF-32)	effective	2,500-4,000 m	2,500 to 6,000 m
ground. HE-Frag	maximum	15,000 m	14,600 to 16,000 m
MT-12 100 mm smoothbore towed anti-tank gun Carried by, e.g.: MT-LB, Ural-4320, Ural-375D			
armour. APFSDS (BM-412M)	effective	2,500 m	1,880 to 2,500 m
armour. direct fire sight OP4M-40U	sighting	3,000 m	
ground. HE-Frag (OF-15)	maximum	8,200 m	
2A20 115 mm smoothbore tank gun of the T-62, manually loaded Carried by: T-62M, T-62MV			
armour. APFSDS (BM-6, BD/36-2)	effective	1,800 m	1,800 to 2,100 m
armour. HEAT (3BK4)	effective	1,500 m	1,200 to 1,500 m
ground. HE-Frag (OF-27)	effective	4,000 m	4,000 to 6,000 m
ground. HE-Frag	maximum	9,000 m	
2A45M 125 mm smoothbore towed anti-tank gun with auxiliary power unit Carried by, e.g.: MT-LB			
armour. APFSDS (BM-42M)	effective	3,000 m (disputed)	2,000 to 3,000 m
ground. HE-Frag OF-26	direct fire	5,000 m	
ground. HE-Frag	maximum	12,200 m	12,000 to 12,200 m
2A46M 125 mm smoothbore tank gun and ATGM launcher, autoloader Carried by, e.g.: T-72B, T-72BM, T-90, T-80BV, T-80U, T-80BVM, T-64BV			
armour. APFSDS (3BM42M type)	effective	3,000 m	2,500 to 4,000 m
armour. HEAT (3BK29M, 3BK27 type)	effective	3,000 m	2,000 to 4,000 m
ground. HE-Frag (3OF26)	effective	5,000 m	4,000 to 5,000 m
ground. HE-Frag	maximum	10,000 m	
2A46M-5 125 mm smoothbore tank gun and ATGM launcher, improved-accuracy 2A46M Carried by, e.g.: T-72B3, T-72B3M, T-90A, T-90M			
armour. APFSDS (3BM42M type)	effective	3,000-4,000 m	3,000 to 4,000 m
armour. HEAT-MP (3BK29M)	effective	4,000 m	
ground. HE-Frag (3OF26)	effective	5,000 m	

WEAPON, TARGET AND AMMUNITION	TERM	RANGE	SOURCES
air. HE-shrapnel, time-fuzed (Ainet)	effective	4,000-5,000 m	
ground. HE-Frag	maximum	10,000 m	
2A75 125 mm smoothbore gun with autoloader, a version of the 2A46M tank gun Carried by: 2S25 Sprut-SD, 2S25M Sprut-SDM1			
armour. APFSDS (BM-42M / 3BM42)	effective	3,000 m	
armour. APFSDS, HEAT (BK-29M) and guided rounds with 1A40M-1 sight	sighting	4,000 m	
ground. HE-Frag OF-26 (3OF26)	effective	5,000 m	
2A82-1M 125 mm smoothbore tank gun of the T-14, in an unmanned turret Carried by: T-14 Armata			
armour. APFSDS	effective	3,500+ m	3,500 to 5,000 m
ground. HEAT, HE-Frag	effective	4,700 m	
ground	maximum	12,000 m (disputed)	7,000 to 12,000 m

Other direct-fire figures in the entries

SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	TERM	PAGE
2A65 Msta-B Direct fire range ATP Table E-2 and RWW table; projectile not stated; the same table's maximum-range row is misaligned	2,130 m		direct fire	10
2S19 Msta-S secondary MG 12.7x108 mm, ground and air targets	2,000 m ground; 1,500 m air		effective	8
2A36 Giatsint-B 152 mm towed gun direct fire ammunition and target not stated in source	1,530 m		direct fire	10
2S5 Giatsint-S HEAT BP-540 HEAT BP-540, direct fire	1,000 m		direct fire	7

Table 3d. Reach of air defence weapons

Missiles and guns. Range is horizontal; altitude is the vertical reach. Figures are against the target named in the condition.						
SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	ALTITUDE	TERM	PAGE	
S-300V4 9M82MD air targets incl. AEW aircraft; S-300V4 new long-range missile	400 km			claimed maximum (claim)	13	
S-400 Triumf 40N6 aerodynamic targets (STRASAM); APA brochure figure is for export 40N6E, 215 nmi; 40N6; the 27 km often quoted is reported for the 48N6DM missile specifically	400 km		30-35 km	maximum (claim)	12	
S-400 Triumf 48N6DM (48N6E3) aerodynamic targets; RUSIAD names export 48N6E3 (Army Technology lineage); TASS 2018 state_claim: 48N6DM up to 250 km	250 km			maximum (claim)	12	
S-300V4 9M82M aircraft targets; S-300VM	200 km		25 m-30 km	maximum (claim), maximum and minimum (claim)	13	
S-350 Vityaz 9M96D extended-range domestic 9M96D; target type not stated by TWZ	about 121 km (75 miles)			range	13	
S-350 Vityaz 9M96E2 aerodynamic target; export missile	120 km	1 km	5 m to 30 km	maximum (claim), minimum (claim)	13

S-300V4 9M82 aircraft and jammer targets; S-300V; aircraft targets; S-300V	100 km	13 km	1-30 km	maximum, minimum (claim), maximum and minimum	13	
S-300V4 9M83 aircraft targets; S-300V	75 km	6 km	250 m-25 km	maximum, minimum, maximum and minimum	13	
Buk-M1 / Buk-M2 / Buk-M3 9M317M (Buk-M3) air target	2.5-70 km		35 km	maximum effective, maximum	14	
S-350 Vityaz S-350E system aerodynamic targets; export exhibit figure, also given by Russian MoD for the domestic S-350 (state claim); aerodynamic targets; export system brochure	1.5 to 60 km		10 m to 30 km	maximum (claim)	13	
S-400 Triumf 48N6 (ballistic targets) ballistic missile targets, 48N6 series	60 km			range	12	
Buk-M1 / Buk-M2 / Buk-M3 9M317 (Buk-M2) aircraft; air target	3-50 km		15 m-25 km	engagement zone, intercept altitude	14	
Pantsir-S1 Pantsir-SM missile Pantsir-SM with new missile; KBP chief designer, 2016	40 km			claimed (claim)	16	
S-300V4 9M83/9M82 vs ballistic missile ballistic targets; S-300V and S-300VM; ballistic targets; S-300V (S-300VM: 1-30 km)	40 km		1-25 km	maximum, maximum and minimum (claim)	13	
S-350 Vityaz 9M96E aerodynamic target; export missile	40 km	1 km	5 m to 20 km	maximum (claim), minimum (claim)	13	
S-400 Triumf 9M96E export 9M96E; aerodynamic targets; APA gives 21.6 nmi; export 9M96E; APA gives 15 ft to 66 kft	40 km		0.005-20 km	range (claim)	12	
Buk-M1 / Buk-M2 / Buk-M3 9M38M1 (Buk-M1) air target	3.25-34 km		30 m-22 km	maximum, intercept altitude	14	
Pantsir-S1 Pantsir-S1M missile export Pantsir-S1M; new missile, designation not given by source; High Precision Systems, 2019	30 km			claimed (claim)	16	
S-350 Vityaz S-350E system vs ballistic ballistic targets	1.5 to 30 km		2 to 25 km	maximum (claim)	13	
S-350 Vityaz 9M96 basic domestic 9M96; target type not stated by TWZ	about 29 km (18 miles)			range	13	
S-400 Triumf S-400 (missile not stated) reported engagement altitude band			0.1-27 km	reported	12	
Buk-M1 / Buk-M2 / Buk-M3 9M317 vs ballistic and cruise missiles ALCM-type cruise missile at 30 m (MISM2; ROE gives 100 m, unchecked); Lance-type tactical ballistic missile 15-20 km (MISM2)	20 km			maximum (claim)	14	
Pantsir-S1 57E6 missile aircraft-type targets; KBP figures for export 57E6-E; KBP figures for export 57E6-E; 5 m only in optical mode over water	20 km	1.2 km	5 m to 15 km	maximum (claim), minimum (claim)	16	
Tor 9M338K Tor-M2 domestic, air targets	16 km		10 m to 10 km	maximum (claim)	15	

SYSTEM, MUNITION AND CONDITION	RANGE	MINIMUM	ALTITUDE	TERM	PAGE
Strela-10 and Osa short-range SAM 9M33M3 Osa-AKM missile; Osa-AKM missile; WEG figure	15 km		4 km	operational range, maximum flight altitude	17
Tor 9M330/9M331 aircraft and PGM targets, Tor/Tor-M1	12 km	1.5 km	10 m to 6 km	maximum, minimum	15
Tor 9M331 (Tor-M2E) Tor-M2E export; target 300 m/s; Tor-M2E export; target 300 m/s (10 m to 6 km at 600 m/s)	1 to 12 km		10 m to 10 km	maximum (claim)	15
S-350 Vityaz 9M100 IR-homing short-range missile; fielding unconfirmed	10 km			maximum (claim)	13
Tunguska 9M311-M1 missile Tunguska-M1, air target; Tunguska-M1, air target; APA gives 2.5 km for 2K22 and 2K22M too; air target; ceiling for 9M311 family	10 km	2.5 km	3.5 km	maximum, minimum	17
Pantsir-S1 TKB-1055 small missile anti-drone round, up to 48 per vehicle in cannon-less versions	7 km			claimed (claim)	16
Strela-10 and Osa short-range SAM 9M37M/9M333 Strela-10 engagement zone, all variants; target closing at up to 415 m/s or receding at 310 m/s; Strela-10; 9M333 minimum 10 m	0.8 to 5 km		25 m to 3.5 km	engagement envelope	17
Pantsir-S1 30 mm 2A38M gun air and ground targets; air targets	4 km	200 m	0 to 3 km	maximum (claim), minimum (claim)	16
Tunguska 30 mm 2A38M guns air target	4 km	200 m	3 km	maximum, minimum	17

Table 3e. Reach of sensors

Detection, tracking and location ranges, grouped by what the sensor is for. Target type and size are part of the figure: a radar that sees a bomber at 600 km sees a small drone much closer.

REACH	SYSTEM, DATUM AND CONDITION	TARGET	TERM	PAGE
Ground surveillance				
up to 40 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10M1 radar. tanks and vehicles; Russian MoD figure; instrumented range 0.2–40 km	tank, vehicle	maximum (claim)	20
30 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10 radar. moving ships, without MTI	ship	maximum (claim)	20
20 km	1B75 Penicillin Detection range, 1L271. tank-type moving ground target	tank	maximum (claim)	20
16 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10 radar. moving vehicles, without MTI; 10 km with MTI	vehicle	maximum (claim)	20
15 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10M1 radar. moving person; developer figure	person	claimed (claim)	20
12 km	PRP-4A Argus / PRP-4M Deytery Detection range, radar (moving tank-type target). moving tank-type target	tank	up to	36
up to 10,000 m	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Detection range, 1V14 optical reconnaissance. day	not stated	maximum	35
10 km	PRP-4A Argus / PRP-4M Deytery Recognition range, laser rangefinder. up to three tank-type targets; large targets incl. buildings 25 km; WEG names the 1D14–1 periscopic rangefinder	tank	up to (claim)	36
10 km	PRP-4A Argus / PRP-4M Deytery Detection range, PSNR-5M radar on PRP-4M. moving tank, PRP-4M application; Jane's 2001 export data, confidence reported	tank	range (claim)	36
8 km	PRP-4A Argus / PRP-4M Deytery Detection range, optical-electronic (tank-type target, day). tank-type target, daytime	tank	up to	36
7 km	PRP-4A Argus / PRP-4M Deytery Detection range, radar (person). single soldier	person	up to	36
3 km	PRP-4A Argus / PRP-4M Deytery Detection range, optical-electronic (tank-type target, night). tank-type target, night	tank	up to	36
up to 2,500 m	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Detection range, 1V14 optical reconnaissance (night). night	not stated	maximum	35
2 km	PRP-4A Argus / PRP-4M Deytery Detection range, stationary tank, engine off (sensor not stated). stationary tank-type target, engine not running; ARMYR and RWW name no sensor, WEG lists it under radar	tank	no less than (claim)	36
750 m	1B75 Penicillin Minimum range, 1L271. mortar firing positions; 200 m for moving ground targets	mortar	minimum (claim)	20
Counter-battery				
65 km	Zoopark-1 / Zoopark-1M Detection range, tactical missile, 1L260. Launch positions of Lance / ATACMS type missiles	tactical missile	up to	19
45 km	Zoopark-1 / Zoopark-1M Detection range, rocket artillery, 1L260. MLRS firing position (DOGS, unverified, specifies M270 type)	rocket launcher, artillery	up to	19
40 km	Zoopark-1 / Zoopark-1M Detection range, tactical missile, 1L219M. Tactical missile launch position	tactical missile	detection of launch position	19
mortar 22, artillery 20, MLRS 35, tactical missile 40 km	Zoopark-1 / Zoopark-1M Fire-correction range, 1L219M. Adjusting friendly fire, by weapon type	not stated	fire correction range	19
30 km	ARK-1M Rys Detection range, ARK-1M vs battlefield missiles. Missile (WEG)	not stated	unspecified	19
30 km	Zoopark-1 / Zoopark-1M Detection range, rocket artillery, 1L219M. MLRS firing position	rocket launcher, artillery	detection of launch position	19
23–27 km	Zoopark-1 / Zoopark-1M Detection range, tube artillery, 1L260. 155–203 mm gun firing positions (23 km for 155 mm, 27 km for 203 mm)	artillery	up to	19
Iskander 80, Smerch 70, Uragan 50, Grad 40, 203 mm 32, 152 mm 27 km	Zoopark-1 / Zoopark-1M Own-fire tracking range, 1L260. Tracking friendly fire, by weapon	not stated	up to	19

REACH	SYSTEM, DATUM AND CONDITION	TARGET	TERM	PAGE
25 km	ARK-1M Rys Detection range, ARK-1M vs MRL rockets. Rocket (WEG); mode not stated	rocket launcher	unspecified	19
up to 25 km	1B75 Penicillin Detection range, 1B75. radius; artillery, mortar and MLRS firing positions, sound and thermal	rocket launcher, mortar, artillery	maximum (claim)	20
20 km	Zoopark-1 / Zoopark-1M Detection range, mortar, 1L219M. Mortar firing position; calibre not stated	mortar	detection of launch position	19
20 km	Zoopark-1 / Zoopark-1M Detection range, mortar, 1L260. Mortar firing position; calibre not stated. ATP lists this figure under '1L219M Zoopark-1M'	mortar	range as listed by ATP (no qualifier)	19
15 km	1B75 Penicillin Detection range, 1L271 (fire adjustment). by shell bursts; by trajectory 5 km	shell bursts	maximum (claim)	20
15 km	Zoopark-1 / Zoopark-1M Detection range, tube artillery, 1L219M. Field artillery firing position	artillery	detection of launch position	19
13 km	ARK-1M Rys Detection range, ARK-1M vs mortars. Mortar (WEG); mode not stated	mortar	unspecified	19
10 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10 radar. shell impact (100 mm), without MTI	shell bursts	maximum (claim)	20
10 km	SNAR-10 / SNAR-10M1 Leopard Detection range, SNAR-10M1 radar. shell burst on land; 20 km on water; developer figure	shell bursts	claimed (claim)	20
8 km	ARK-1M Rys Detection range, ARK-1M vs artillery (howitzers). Artillery (WEG), howitzers (JREW02); target and mode not stated by WEG	artillery	unspecified	19
5 km	1B75 Penicillin Detection range, 1L271 (mortar positions). mortar firing positions, 81-120 mm	mortar	maximum (claim)	20
SIGINT and DF				
400 km	Moskva-1 Detection range, airborne emitters. passive; emitting aircraft and cruise missiles; 360 deg sector	cruise missile, emitters	up to (claim)	22
up to 30 km	Repellent-1 Detection range, UAV control-link signals. ground-station command signals; UAV telemetry up to 10 km; target size and altitude not given	UAV, emitters	up to (claim)	28
6 km	Leer-3 Detection range, GSM base stations. cellular base stations, GSM and possibly 3G/4G, measured from the UAV	UAV, cell base station	within	27
Laser designation				
up to 7,000 m	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Range, laser target illumination (1V14). for laser-guided (corrected) munitions	not stated	maximum	35
Air tracking and fire control				
120 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9A317 / 9A317M TELAR radar (M2/M3). RCS 1-2 m2 at 3 km altitude and 18-20 km vs same target at 10-15 m (M2); M3: RCS 1-2 m2, altitude not stated	RCS 1-2 m ²	detection range	14
80 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9S35 TELAR radar (M1). RCS 2 m2; 100 km vs RCS 3 m2	RCS 2 m ²	detection range	14
80 km	Strela-10 and Osa short-range SAM Detection range, Dog Ear (PPRU-1M) battery radar. Strela-10 battery acquisition radar, F/G-band; target type not stated; tracking 35 km (JREW02)	not stated	acquisition range	17
36 km	Pantsir-S1 Detection range, IRS1 search radar. 2 m2 target; S-band; up to 20 targets tracked	RCS 2 m ²	maximum (claim)	16
28 km	Pantsir-S1 Detection range, IRS2-1 tracking radar. target size not stated; WEG and Armada	not stated	maximum (claim)	16
17-26 km	Pantsir-S1 Detection range, optical post. F-16 autotracking, 10 km visibility; 13-15 km for HARM missile	fighter, anti-radiation missile	auto-tracking (claim)	16
20 km	Strela-10 and Osa short-range SAM Detection range, Land Roll tracking radar. Osa; target type not stated in source	not stated	tracking range	17
20 km	Tor Detection range, TV sight. target not stated	not stated	maximum	15
15 km	Tor Detection range, tracking radar (Tor/Tor-M1). 60-degree sector; target and variant not stated	not stated	maximum	15
13 km	Tunguska Detection range, 1RL144M tracking radar. J-band tracker	not stated	maximum	17
Air surveillance				
600 km	Nebo-M Detection range, Nebo-M. complex; target type, size and altitude not stated	not stated	maximum (claim)	18
600 km	Nebo-M Altitude coverage, Nebo-M. complex, ballistic targets implied; not stated	ballistic missile	maximum (claim)	18

REACH	SYSTEM, DATUM AND CONDITION	TARGET	TERM	PAGE
580-600 km	S-400 Triumf Detection range, 91N6E. target RCS >10 m ² (strategic bomber)	RCS 10 m ² , bomber	detection/ tracking	12
330 km	S-300V4 Detection range, 9S15 Bill Board. target size not stated by WEG	not stated	maximum	13
300 km	96L6 all-altitude acquisition radar Detection range. Range band 5 to 300 km for detected targets; target size and altitude not stated	not stated	instrumented (claim)	18
300 km	S-400 Triumf Detection range, 96L6E. export 96L6E in S-300PMU family, target not stated; JREW-p1877, PDF p. 1877	not stated	max (claim)	12
200 km	Nebo-M Detection range, Podlet-K1. main mode, 10-200 km; target size not stated	not stated	maximum (claim)	18
175 km	S-300V4 Detection range, 9S19 High Screen. ballistic missile search; target size not stated	ballistic missile	maximum	13
160 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9S18M1-3 / 9S18M3 search radar (M2/M3). RCS 1-2 m ² ; Buk-M2 9S18M1-3	RCS 1-2 m ²	detection range	14
100-150 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9S18M1 search radar (M1). target size and altitude not stated	not stated	detection range	14
150 km	S-300V4 Detection range, 9S32 Grill Pan. 2 m ² RCS target, manual mode (140 km automatic)	RCS 2 m ²	maximum acquisition	13
120 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9S36 mast radar (M2). RCS 1-2 m ² at 3 km altitude; 30-35 km vs same target at 10-15 m	RCS 1-2 m ²	detection range	14
100 km	96L6 all-altitude acquisition radar Maximum target altitude. All-altitude mode, aerodynamic targets	aircraft	maximum (claim)	18
75 km	Pantsir-S1 Detection range, Pantsir-SM radar. target size not stated	not stated	claimed (claim)	16
70 km	Buk-M1 / Buk-M2 / Buk-M3 Detection range, 9S36M mast radar (M3). cruise missile flying at 5 m	cruise missile	detection range	14
40 km	Barnaul-T Detection range, 1L122-1E. aircraft, helicopters, cruise missiles, UAVs at up to 700 m/s; export 1L122-1E brochure figure	cruise missile, helicopter, UAV	maximum (1-40 km) (claim)	37
32 km	Tor Detection range, surveillance radar (Tor-M2). air targets, size not stated	aircraft	detection (claim)	15
30 km	Strela-10 and Osa short-range SAM Detection range, Land Roll surveillance radar. Osa; target type not stated in source	not stated	acquisition range	17
25-27 km	Tor Detection range, surveillance radar (Tor/Tor-M1). aircraft; WEG does not state the variant	aircraft	maximum	15
18 km	Tunguska Detection range, 1RL144 surveillance radar. E-band; low-flying search mode for targets at about 15 m (JREW02)	not stated	maximum	17
9-15 km	Tor Detection range, surveillance radar (Tor/Tor-M1), UAV. UAVs	UAV	maximum	15
12 km	Tor Detection range, surveillance radar (Tor/Tor-M1), helicopter. helicopters	helicopter	maximum	15
10 km	Barnaul-T Detection altitude, 1L122-1E. export 1L122-1E; 'at least 10 km'	not stated	maximum (claim)	37
10 km	Nebo-M Minimum range, Podlet-K1. air targets, lower limit of stated 10-200 km detection zone	aircraft	minimum (claim)	18
10 km	Nebo-M Altitude coverage, Podlet-K1. maximum detection altitude	not stated	maximum (claim)	18
0.45 to 10 km	Strela-10 and Osa short-range SAM Detection range, 9S86 Snap Shot. Strela-10 range-only radar; target type not stated; minimum 0.45 km	not stated	maximum	17
1 km	Barnaul-T Minimum detection range, 1L122-1E. export 1L122-1E	not stated	minimum (claim)	37
Other				
up to 100 km	PU-12M7 Coordinates measurement envelope, PU-12M7 (connected radars). coordinates measurement envelope from connected radars; PU-12M7 has no radar of its own	not stated	maximum (claim)	37

Table 3f. Reach of communications

Radio and data-link ranges. Ranges depend on antenna, terrain and whether the vehicle is halted.

REACH	SYSTEM, DATUM AND CONDITION	TERM	PAGE
450 km	R-149 command and staff vehicles Range, HF air-ground Prima, R-149MA1. HF to aircraft	maximum (claim)	34
350 km	R-145BM Chayka command and staff vehicle Range, R-130M dipole. HF, halted only, symmetrical dipole	range	34
350 km	R-149 command and staff vehicles Range, HF R-168-100KBE, R-149MA1. halted, mast antenna; 50 km (20 km moving) on ASH-4 whip	maximum (claim)	34
350 km	R-149 command and staff vehicles Range, HF, R-149BMR. HF band 1.5-30 MHz	maximum (claim)	34
15-300 km	R-149 command and staff vehicles Range, HF R-168-SKV, R-149AKSh-1. 1.5-30 MHz, 2 sets	maximum	34
220-250 km	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Radio range, R-111. 1V15 and 1V16, vehicle radio	stated	35
130 km	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Radio range, R-130MT. 1V15 and 1V16, HF vehicle radio	stated	35
120 km	R-149 command and staff vehicles Range, VHF air-ground Prima, R-149MA1. VHF to aircraft	maximum (claim)	34
75 km	R-145BM Chayka command and staff vehicle Range, R-130M zenith antenna. HF, halted or moving, symmetrical zenith-radiation antenna	range	34
60 km	R-149 command and staff vehicles Range, VHF, R-149BMR. VHF band 30-108 MHz	maximum (claim)	34
25-60 km	R-149 command and staff vehicles Range, VHF R-168-100U-2, R-149AKSh-1. 30-108 MHz, 2 sets	maximum	34
55 km	R-149 command and staff vehicles Range, VHF R-168-100UE-2 on mast, R-149MA1. halted, mast antenna	maximum (claim)	34
40 km	1B75 Penicillin Radio range, 1B75. to external subscribers	maximum (claim)	20
up to 40 km	PU-12M7 Data link range, PU-12M7 by radio. radio link to higher and subordinate posts	maximum (claim)	37
25-40 km	R-149 command and staff vehicles Range, VHF R-168-25U-2, R-149MA3. 30-108 MHz, 2 sets	maximum	34
35 km	R-145BM Chayka command and staff vehicle Range, R-111 3.4 m whip. VHF, halted or moving	range	34
up to 30 km	PU-12M7 Data link range, 9S737 to higher post. radio	maximum (claim)	37
20-25 km	1V12 artillery fire control complex (1V13, 1V14, 1V15, 1V16) Radio range. 1V13 and 1V14, vehicle radios	stated	35
25 km	R-149 command and staff vehicles Range, VHF R-168-100UE-2, R-149MA1. on the move, vehicle antenna	maximum (claim)	34
20 km	Barnaul-T Data link range, 9S932-1. stationary; 10 km on the move (9S933: 3 km / 1 km)	communication range	37
20 km	R-145BM Chayka command and staff vehicle Range, R-123MT 4 m whip. VHF, halted or moving	range	34
6-20 km	R-149 command and staff vehicles Range, UHF R-168-MRA, R-149MA3. 1.5-1.75 GHz data radio	maximum	34
up to 15 km	PU-12M7 Data link range, PU-12M7 by field cable. field telephone cable	maximum (claim)	37
6 km	PRP-4A Argus / PRP-4M Deytery Dismounted observation post, distance from vehicle. dismounted observation post	maximum	36
up to 5 km	PU-12M7 Data link range, 9S737 to fire units. radio	maximum (claim)	37

Table 3g. Reach of electronic attack

Jamming ranges. Most are manufacturer claims.			
REACH	SYSTEM, DATUM AND CONDITION	TERM	PAGE
5,000 km	Murmansk-BN Jamming range, HF communications. HF (shortwave) radio links, skywave; ship, aircraft and ground emitters	effective (Armada's term) (claim)	22
about 1,000 km wide strip	Palantín Jamming frontage, radio communications. ground target: radio communications and radio reconnaissance; battalion tactical group exercise near Voronezh, Sep 2019	claimed (claim)	25
150–300 km	Krasukha-2 / Krasukha-4 Krasukha-4: jamming range. air and ground-based radar targets; target size and altitude not stated	maximum (claim)	21
up to 250 km	Krasukha-2 / Krasukha-4 Krasukha-2: jamming range. air target: AEW aircraft radar; target altitude not stated	up to	21
250 km	Moskva-1 Jamming range, airborne S-band radar. air targets; ARM23 says the 1L267 'can engage targets' per unnamed sources; Moskva-1 itself has no jammer (FOI)	up to	22
50 km or more	R-330Zh Zhitel Jamming range, airborne users. User equipment installed on aircraft	claimed minimum (claim)	26
up to 30 km	Repellent-1 Jamming range, small UAV control and telemetry links. air target: small UAVs; telemetry and satellite-navigation links; control link up to 10 km	up to (claim)	28
up to 25 km	Pole-21 Jamming range, GNSS receivers (ground or air not stated). WEG (Pole-21E); Russian press gives 25 km per jamming module for the domestic Pole-21	effective	28
25 km	R-330Zh Zhitel Jamming range. Ground user equipment (WEG gives no target type; matches manufacturer's ground-user figure)	maximum effective	26
22 km	2S19 Msta-S Range, jammer round. 3RB30 radio jamming projectile; jamming radius 700 m	range (claim)	8
up to 20 km	Palantín Jamming range, UAV control links. air target: UAV radio control links	maximum (claim)	25
up to 6 km	Leer-3 Jamming range, cellular terminals (ground). radius of the zone of blocked GSM terminals around the UAV	up to (claim)	27
3 km	Infaua Jamming range, target not stated. WEG 'Disruption Range'; target and conditions not given	disruption range	29

Table 3h. Reach of UAVs

How far from its control point a UAV operates, and at what altitude.			
REACH	SYSTEM, DATUM AND CONDITION	TERM	PAGE
120 km	Leer-3 Practical range, Orlan-10 from control vehicle. radius of UAV employment from the control point	up to (claim)	27
up to 5,000 m	Leer-3 Altitude, Orlan-10. operating altitude	up to (claim)	27

Table 3i. Deployment distances

Where the system has been seen deployed or employed relative to the line of contact, and how far its elements spread. These are observations and reports, not rules; they indicate what may lie at a given depth.

REACH	SYSTEM, DATUM AND CONDITION	TERM	PAGE
up to 100 km	S-400 Triumf Fire unit distance from command post. 98Zh6E fire unit from 55K6E, export composition	maximum (claim)	12
15 to 30 km	Borisoglebsk-2 Employment distance from line of contact. Donbas 2014-15, with Leer-3, Zhitel, R-934UM	practical	23
25 km	BM-27 Uragan Distance from front line, observed. one launcher hit by FPV drone, reported c. 2024-07	practical	5
about 15 km from enemy positions	2S4 Tyulpan Employment distance. reported MoD video, Ukraine, Nov 2022	practical (claim)	9
5-10 km behind forward edge	Tor Deployment distance, Tor-M1 in defence. first defensive position; 5-10 km between vehicles	practical	15

Table 3j. Engineering equipment

What engineer vehicles can do, grouped by task: gap crossing, breaching, mine laying, earthmoving and transport across water. Mine-laying rockets also appear under indirect fire.

SYSTEM, DATUM AND CONDITION	CAPABILITY	PAGE
Gap crossing		
PMP heavy folding pontoon bridge park	227 m	30
Bridge, full set, 60-t. 32 river + 4 shore links, 6.5 m roadway		
Bridge, full set, 20-t. split half-links, 3.29 m roadway	382 m	
Bridge, half set, 60-t. 16 river + 2 shore links	119 m	
Bridge, half set, 20-t. 16 river + 2 shore links, split	191 m	
Load capacity, bridge, full-width bridge; 20 t on split-link bridge	60 t	
Roadway width, 60-t bridge	6.5 m	
Rafts, 2, 3, 4, 5+1 shore, 8+1 shore links	40, 60, 80, 110, 170 t	
Raft assembly, 40-t. 2 river links, working party 6	8 min	
Maximum current, PMP	2 m/s	
Tank speed on bridge, tanks on 60-t bridge	up to 30 km/h	
Working party, full bridge, full bridge set	approx. 65	
TMM-3 truck-mounted scissors bridge and MTU-72 armoured vehicle-launched bridge	up to 40 m wide, 3 m deep	31
Obstacle, TMM-3 bridge set. Set of four spans; ATP gives 42 m total length		
Load class, TMM-3. Wheeled and tracked loads; tracked vehicles at 15 km/h on bridge	60 t	
Bridge geometry, TMM-3. Spans can be connected to 10.5, 21, 31.5 or 42 m (RWW); ATP gives 10 m per set and 42 m together	4 spans of 10.5 m; roadway 3.8 m	
Bridge, MTU-72. Single-span bridge; ENT72 and RUWM support only the 18 m span and 50 t	20 m long, 3.3 m wide, spans 18 m; 6,400 kg	
Load class, MTU-72	50 t	
Breaching and mine clearing		
IMR-2 / IMR-2M / IMR-3M combat engineer vehicle	6 km/h	32
Mine plough lane clearing, IMR-2M. AT mines, lane clearing rate (WEG term)		
UR-77 Meteorit	200 to 500 m	32
Range, UZP-77 line charge. charge launch distance, UZP-77; UZ-67 charge 200 to 350 m (WEG)		
Cleared lane length, UZP-77. anti-tank minefield; UZ-67 charge 75 to 80 m	80 to 90 m	
Cleared lane width, one line charge	up to 6 m	
Line charge length, UZP-77; UZ-67 is 83 m	93 m	
Cleared lane length, ZRShch. lane 6 m wide; charge in 6 m sections of 41 kg	100 m	
Time to clear a path, one full demining cycle	3 to 5 min	
Mine laying		
ISDM Zemledeliye remote mine-laying system; GMZ-3 tracked minelayer	15 km	33
Range, ISDM mine rocket. cassette rocket with AP or AT mines		
Minimum range, ISDM mine rocket. cassette rocket with AP or AT mines	5 km	
Reload, ISDM. container swap by transloader at a technical position	several minutes	
Mine load, GMZ-3	208 AT mines	
Minefield length per load, GMZ-3. one vehicle, one load	1 km (pressure mines); 2 km (influence mines)	
Platoon minefield, GMZ-3. 3 GMZ-3 of obstacle platoon	1,200 m, three rows, 624 mines in 26 min	
Laying speed, GMZ-3	16 km/h surface; 6 km/h buried	
Laying rate, GMZ-3	8 mines/min surface; 4 mines/min buried	
Mine spacing, GMZ-3	5 or 10 m	
Earthmoving		
IMR-2 / IMR-2M / IMR-3M combat engineer vehicle	2 t	32
Boom lifting capacity		
Boom reach, IMR-2M	8.4 m	
Dozer capacity, IMR-2 earthmoving	200 to 250 m ³ /h	
Transport across water		
PTS-4 tracked amphibious transporter and PMM-2 self-propelled amphibious ferry	12 t	31
Payload on land, PTS-4		
Payload on water, PTS-4	18 t	
Payload, PMM-2 single ferry. WEG; RUWM gives 42.5 t for the PMM-2M	42.5 t	
Payload, PMM-2 two joined. WEG gives 85 t for two PMM-2; RUWM gives 85 t for two PMM-2M, assembly 8 min	85 t	

Table 4. Mobility and time into action

SYSTEM	CODE	WEIGHT	FORDING	INTO ACTION	OUT OF ACTION	PAGE
